## Watching the End of the World Eric T. Knight

It's the end of the world ... or is it?

Nate came to LA to be a serious actor, but when he can't break in, he settles for a spot on a new TV reality show, hoping that it will give his career the exposure it needs.

But on the way to filming in Africa, the cast is told that terrorists have released a bioweapon in the world's major airports. Forced to crash land on a remote jungle airstrip, Nate and his fellow contestants duck bullets as they are attacked by a warlord. To Nate, it's terrifying danger. To the watching world, it's suspense and thriller and action all rolled up into one.

That's because it's all part of the reality show. The whole world is streaming it live. The terrorist attack never happened and the warlord was hired by the reality show. It's all fake.

Right up until the moment it all turns real.

I really enjoyed this story. I don't want to give anything away for anyone but suffice it to sY that parts of the book could be ripped from the war headlines in Africa. Also if you've ever watched/enjoyed survivor - think of survivor gone very very wrong. The twists and turns of the storyline were well thought out and spaced. Hope to here a lot more from this author!

I really enjoyed this book! In the story a group of contestants are chosen to participate in a Survivor like TV show, but on their way to the location they crash land in Africa and have to figure out how to survive. That's about all I feel comfortable giving away in terms of the plot. I loved how the author used multiple narrators to tell the story. It allowed the reader to see what was happening in different areas and, unlike some books I've read, it did not feel gimmicky or awkward. The dialogue is well written and really helps to build the characters. Once you reach the second half of the book it is very hard to put down!

I really enjoyed this book as the premise was interesting and different. The cast of characters were intriguing in their different reactions to the stressful situations they found themselves in. It was also a cautionary tale about being careful what you wish for.

Title: Would You Survive?

Watching the End of the World by Eric T Knight

Reality TV has become a huge part of society and anyone looking to get rich quick should look no further than an audition. A group of contestants, five men and 5 women, signed up thinking they were traveling to Madagascar to participate on a show in which Survivor meets The Real World. However, on their way to the island there is a major terrorist attack, the island closes its borders, and the contestant's plane crashes in some jungle in Africa. These contenders now must survive while watching the rest of world crumble.

This book has a plot that once you think you have figured it out, you probably have, however, the twists are

still there. The story is well-written and it is a page turner throughout, not once slowing down. From start to finish the reader will be captivated. Although the plot is not too unexpected, honestly, it is just that good. My adrenaline did not slow down until I read the last word.

Eric Knight has written a novel that if it ever were to become a reality I would be terrified and yet enthralled. The ideas he presents in this read speaks to the very nature of society, as it is today. We are desensitized to horrific acts, we can't turn away, like a bad car wreck you have to keep looking. While it was not a mystery book nor that difficult to deduce where they plot was heading, the ideas presented are very intriguing. It could be seen as a glimpse into the future of TV if the right people and the right prices are involved. With all the dystopian and zombie apocalypse movies and books filling the shelves this book was a great change of pace. It was a good dose of reality.

I give this book 4 out of 5 stars.

Enjoy!

Great premise, but I had trouble with the amount of characters and even caring about those characters after a while. I think the big "twist" that gets revealed early on, should've remained the twist throughout. But it was a quick and mostly fun read.

I usually only read epic fantasy. However since I love this authors fantasy books I thought I would give this book a try. I am so glad I did because I was pleasantly surprised to find it gripping, action packed and a very intriguing story. I was drawn in at the start. The storyline is so well developed and the characters are awesome. Could not put it down until I finished the last page. I highly recommend this book. You won't be sorry!
