Ride It Out Aden Lowe , Ashley Wheels

All Hound wants is a little peace and quiet from life. A stay at the beach house is the perfect opportunity, but when he arrives, he sees Anne. From that moment, his thoughts are anything but peaceful.

Anne has spent her life under the thumb of overbearing family members. Fed up with it, she orchestrates a getaway to show them, and herself, she's capable of a normal life. But Blake (Hound) invades her solitude and independence and makes her want the extraordinary.

When the hurricane warnings come, Hound has a choice. Leave for safety, or ride it out with Anne. Will he choose Anne and take the chance at love or escape for safety?

I really enjoyed Anne and Blake's love story. They were characters with depth and believable situations. The writing made me hope for the best in their relationship, bite my fingernails with worry, wish I was on the beach where they were, want to punch out certain characters lights, excited reading the love scenes and misty over the tenderness and love between them. What more could you ask for in a romance? I hope the authors write more stories. I'd like to read more of their work.

this a deffenetly a must read! This story is about to people (Hound /Blake and Anne) from different worlds overcoming all the odds to find strength and love in each other. the fact that Blake /Hound is one of my beloved Hell Riders is just pure icing on the cake . A beautifully written love story that says it all, nothing is impossible if you really want it!

Heartfelt and unique read!

I loved the characters and the connection they share.

Hound (Blake) is lost after his accident that is until he sees the girl in the yellow sundress. He can't get her out of his head.

Anne is looking to find her independence but when she meets Blake everything changes. There are immediate fireworks between them.

If you are looking for a quick read with a HEA, give this one a go.

The blurb on this is a little misleading, but this is a really pleasant, quick read. Very sweet, a little saucy. :) Anne & Blake's summer of quiet alone time at the beach turns into something more the minute they meet. And there were a couple surprises about them both that were rare plot points I don't see very often, and they get two thumbs up from me!

I enjoyed this story a lot, but there are definite editing issues that gave a few hiccups & the last chapter & epilogue are both a little abrupt, so that's the only reason for 4 instead of 5 stars for me! I just wished certain parts had been a little more fleshed out. All in all, tho, I would recommend this for a light, no angst read!! :)

3.5 Stars

Blake, known as Hound to his fellow Hell Raider MCs, is adapting to a new lifestyle. He's still part of the club, but his ride these days is a wheelchair instead of a motorcycle. While regrouping at the beach, he meets Anne. She's no stranger to life in a chair on wheels, but she has lead a sheltered 22 years.

I really appreciated the premise to this story. Having both the H and the h share a disability was unique and original and for the most part they didn't let it get them down. It was refreshing to see a disabled couple in romance with a positive presentation. The story has a lot of promise, but I definitely wish it would have been fleshed out more.

Told by their dual first person POV, Blake and Anne both present as interesting characters from different backgrounds but with shared circumstances and challenges. When Anne isn't falling into the innocent virgin, won't-utter-a-cuss-word troupe, and Blake isn't going all alpha male pissing contest with her brother, they have a lot of potential. Too bad we didn't see more of them working to make a life together. Instead the lust and love are insta.

While I was glad it avoided the angsty plot twists that generally befall the MC genre and the couple are exclusive, it missed other opportunities for tension and development. The circumstances of the hurricane for one. It doesn't exactly advance the plot in any way. Like other parts of the story it's rushed. It also requires some suspension of disbelief. (No one around them—her overprotective brother and his MC buddies—seems to know a category four hurricane is coming!)

With a good editor and proofreader (tense changes cropped up a few too many times), the story could definitely garner a much higher rating. None the less, if you're looking for a short afternoon read, this is still an engaging one to pass the time.

Love it

Blake and Anne's story is a cute love story - after being hit by a drunk driver Blake ends up in a wheelchair, he goes to the beach to get his head together and meets Anne who has been in a wheelchair all her life - working through each other's problems and learning requires that make each other unique leads to a lasting love. Enjoy

Great read

I really enjoyed this book. I loved following the love story of Blake and Anne. Anne's innocence throughout

the story was awesome. She learns a lot from Blake about life while she teaches him to accept his new life. I definitely recommend this story.

Loved this book!!! Once I started this book, I could not put it down. This book is about finding love against the difficulties and tragedy life can throw your way. This story highlighted the troubles faced by people in wheelchairs, it was cleverly written.

This is a sweet love story about a bad biker boy and a sweet girl. Who will overcome their problems to be together. This was a fantastic collaboration between these authors. I will look forward to more books by them!!!

I found the ending of the story and the epilogue short and abrupt, it would have been nice if more detail was here to end the story.

I truly loved everything about this book. From the very first page I was completely engulfed in Blake (Hound) and Anne's story. The strength and love that they find in each other is heartwarming - touching my heart so much that I was still smiling about it days after I turned the last page. I highly recommend this book to anyone in the mood for a light, romantic read.

Ride it Out, is sweet and sexy. The reader will fall in love with Blake and Anne.

When the story starts both Blake and Anne, are trying to get away from people. They are both dealing with having to adjust to life living on their own, which is harder for them because the two of them are both in wheelchairs.

Blake is in a MC called the Hell Raiders Tennessee. He needs to tell Anne about his life, but not sure how the sweet and quiet girl will handle a rough and rowdy life style.

Will Anne be able to handle Blake's lifestyle or will he lose the one thing that matters most to him.

Aden Lowe and Ashley Wheels made a great team writing this book, I myself can't wait to see what they come up with next.

Sexy and heartwarming!

This is a beautiful story about finding love when you least expected it! Blake is the guy that had it all and any girl he wanted until a tragic event changed his life. Anna is a sweet sheltered girl pushing to be independent. They have one specific thing in common...both are in a wheelchair. I love how Blake pulls

Anna out of her shell and how Anna makes Blake believe in life again. This book is written well and you will be rooting for Blake and Anna all the way! The ending won't leave you disappointed!

Ashley Carr, LSoR says

This is the best collaboration of authors around. I haven't read a book that was quite like this. I never knew the troubles that people in a wheelchair faced. It was eye opening.

Then there was the love story behind it all. It wasn't your typical boy meets girl love story. They faced opposition from Anne's brother & the fear of Blake's "brothers" not accepting Anne. He was a Harley driving bad boy before his accident. She was a virgin that reads romance novels that has an obsession with Taylor Swift.

4/5 stars

Hound is relatively recently handicapped to his wheelchair ever since a drunk driver hit him on his motorcycle. As a brother in the Hell Raider MC, this has not been an easy transition for him. He feels like his usefulness to his club is limited to nothing physically related since he doesn't have the use of his legs. He's also kept to himself and doesn't "make use" of the club girls, even when they offer. He thinks that that part of his life might be over. That is, until he sees a beauty on the beach, in her wheelchair.

Anne has been in a wheelchair for most of her entire life after she suffered a sickness as a baby & never fully developed the muscles necessary in her legs to support her. She's also had to deal with overbearing family members her entire life who, give her no independence to live her life and treat her as though she couldn't take care of herself. She's fed up and wants to be able to be on her own. With the help of her brother, she goes to stay in their family beach house to try out independent living. She's excited to be on her own and maybe a little nervous. But when she sees Hound, she's attracted to him and wants to get to know him.

Hound & Anne start up a friendship which transitions into a relationship. Anne was completely innocent and Hound hadn't wanted to be with anyone since his accident until he saw her. They do get to know each other & spend time together before a hurricane is headed their way and threatens their safety. That would be dangerous enough, but there are more complications for those confined to wheelchairs. But at least this will give them time to talk about club life and whether or not they will be able to go the distance.

I enjoyed this sweet romance, especially with the first-hand knowledge of life in a wheelchair and the challenges of everyday life that people with use of their legs don't understand. One thing that would have helped was if the chairs had been described, because I had an idea in my mind and then a certain scene happened & I didn't understand how it was physically possible until I thought of a different chair. Also, I don't know if this novella is related to Aden Lowe's Hell Raiders MC series or not, or if we'll be seeing Hound & Anne in future books in that series or not. But I hope we do, because I really enjoyed them.

2.75 stars.hmm so this was just ok for me. the h and H are good together but I needed their relationship more developed.I just couldn't connect at times. maybe if it was longer I could of had more time with them. other than that I like that it was different in the sense they are both wheelchair bound.
safety: h is a virgin. of course H isn't but he hadnt been with anyone since his accident which was months ago. maybe some references that bothered ne like ,he never got complaints about sex.other than that it's completely safe.

Felicia says

In "Ride It Out", we have a H/h who are BOTH physically challenged, and their frustrations and obstacles are deftly portrayed without being preachy. People with disabilities are too often labeled, categorized...and invisible. This story shows what thinking, compassionate folks have always known - they're no different than anyone else.

Because of that, I wanted to love this story and cheer on Blake and Anne, but I never quite connected with either of them. I didn't feel the awe of new love, especially for sheltered virgin Anne. I didn't feel that connecting of souls when two people realize they've found their "one." For me, the story moved too fast and felt forced...and convenient. Anne is fighting for her independence from her loving, but extremely overprotective family who refuse to allow her to grow. Blake is searching for the man he was before the accident, and is determined to remain an asset to his MC, who are also a bit too quick to try to remove his physical obstacles. But when Blake tells Anne about his accident, she tells him, "I'm sorry, but not sorry. You wouldn't have noticed me, or considered talking to me before that happened." While Blake did not verbally respond, he admitted to himself she was right. I had to slam the Kindle shut behind that, and say, "Wait, what?" But now because YOU are in a wheelchair too, she's simply the most beautiful woman you've ever laid eyes on? *Credibility brick launched at Blake*

I also would have liked more of a sense of urgency with the hurricane...because, it's...you know...a HURRICANE. They were telling people to evacuate, but Anne refused to leave her chair. Again, I was rolling my eyes. I more than understand that for some, the chair is the difference between independence and depending on someone else for assistance, but she's in a tiny cottage on the beach and a hurricane is heading straight for them - this should not have been a hard decision because hurricanes come with a couple of things called death and destruction. *Credibility brick launched at Anne*

I was glad that Blake and Anne got their HEA and I was thrilled it was not immediate. I loved seeing time given for not only Blake and Anne to get to know each other better, but also for family and friends to get acquainted too. I'll bet future barbecues mixing the bikers and the suburbanites are a hoot! LOL!

I DO recommend this story. Books and the journeys they take us on are personal experiences, and where I didn't connect with certain aspects of the story, I more than sure others will.

Enjoy!
