To be honest the story is getting stale and repetitive, the crisis can't always just be another guy or another girl in their lives to potentially break them up. Megumi seems to be the only interesting character right now.

Melanie says

There are a couple of interesting points worth mentioning in this volume. The first is obviously how realistic it felt to read about this transition between High-School to University and how your life and your friendships change with it. I really liked how Hazuki portrayed the beginning of new friendships and the struggle that is to maintain school friendships, specially when you and your old friends decide to follow separate ways. Hazuki is still keeping the old gang together (which is something that does happen in the beginning), but you can see how they slowly drift apart. The author did leave a note that she is going to "give them a happy ending", but I don't think the happy ending necessarily has to be in the form of them all being together (though I suspect this is exactly what will happen). People tend to drift away and this is fine. Sometimes friends are not meant to be forever, but if those moments in which they were together were worth it, then the friendship has served its purpose.

Another thing worth noting is the "rivalry" between Rin and Megumi. Not so much their relationship, but the way things work in this world: sometimes you'll put a lot of effort in something just to have it snatched by someone who supposedly is luckier than you. I liked how Megumi faced this in a mature way, specially in comparison to her own self in the past volumes.

I'm only a bit sad not to see Kai as often as I did before, he is still one of my favorite characters...

Judy (Geeky Reading) says

~3.5-4/5

(Contains some spoilers.)

Of course now that they're in college, Yamato has to meet some woman who immediately starts getting in the way. Of course.

I really hate these kinds of stories. I really do.

So. Yamato and Mei are doing different things, and while they're talking on the phone, they're not really seeing each other much. Mei is trying to branch out, while Yamato is meeting people and has made a new friend in this girl who is clearly interested. Then Asami and Takeshi start having problems, so this leads to even more worries.

Near the end, it looks like Mei is going to speak with Asami about some things, and I hope that happens. She needs to be more open with her friends about these things.

Then there's Megumi. She's doing better as a person, I guess, but she's also struggling as a model. I still want her to get closer to Kai, as well. I'm not really sure where her character is going from here, though.

I love college stories, but I also hate all these relationships that end right after high school. Ugh. I hope the next one is better, and that Yamato and Mei actually get to talk. We'll see, though.

Ahora cada uno esta decidiendo su futuro y es tan lindo ver como Mei y Yamato se apoyan mutuamente..

Sarah ~Sehrenity~ says

Probably one of my least favorite entries in the series so far. I like that they are exploring college life and life apart, but I think giving every character so many bumps in the road all at once is a little forced. Still, I want to see how they all deal with what's happening.

Mayra Garced says

Well another series that should of ended a while back. It was a great story at the beginning but this volume it just dragging the plot along. I may not buy the next volume. There are better Manga to read and spend my hard earn money.

Infinite Scythe says

Why is Yamato always so stupid?

Nidah (SleepDreamWrite) says

The main character has come a long way since the first volume. Liking her character arc so far. Good volume.

I am screaming. Yamato and Mei? What is going to happen? I'm upset over here. Asami and Takeshi, ahhh!!! I'm not liking them going to college now. I need the next one but I'm worried even more will change!

Holly Letson says

3.25*

Now that the crew is out of HS and is now in college, I feel like the story focuses too much on them worrying about things or doing things that they normally would not do.

Lu says

Atalinay says

[I like following Asami and Nakanishi even though it breaks my heart because it makes the story more real. She really deserves someone better and that other cute teacher just
