Aubrey Lane is a wonderful storyteller. She created characters that are believable and unforgettable. I felt like I was involved in a "mini-series," from beginning to end. The plot twists and surprises put friendships, families, and love to the test. Great chick-lit!

Early One Morning is not the typical science fiction or teen genre that I usually read, but I found it thoroughly enjoyable. Aubree Lane presents a well executed adult story that is very relatable.

Lane introduces us to two long time friends that share a high school fantasy surrounding a 'hot' latin boy from their past that one of the friends runs into seemingly by accident while on vacation in Hawaii. While both of the friends have moved on in their life, pursuing careers and relationships, they both find themselves drawn to him.

While Marissa is married—and clearly should not pursue an old crush—she devizes a plan to kiss her fantasy man. When she tells her friend, Annie of the plan, Annie beats her to the punch and charters the boat the fantasy man operates leaving Marissa behind.

While this story seemed to be heading along a typical romance theme Lane quickly introduces the true meaning behind the story. Erika is the six-year-old daughter of Terrence—the high school crush. This little girl is one that you will truly root for as she is drawn into a custody battle.

Throughout the story Lane takes the reader through a series of twists and turns regarding the the hearing,

keeping the reader guessing as to the outcome. Along the way romance develops, feelings get hurt, friendships are questioned, and a child's future lies in the balance.

The story moves at a good pace and brings the reader from LA to Hawaii. The romance is not too fast and not too much to overwhelm the story. Each character is well developed revealing motivations for each action and emotion.

Aubree Lane presents a well thought out theme and executes the story perfectly. The ending is not something that I saw coming. It is both satisfying and just right.

Aubree Lane knows what she is doing!

This was a greatly written story where each character is so defined. The descriptions of the scenes bring you into the story. The sex scenes are juicy, and the ending is AWESOME! (read it)

Seriously a great read that I have no trouble recommending. Bravo!

Annie Harper is one of San Diego's top interior designers, but when her friend Marissa calls her about to make a huge mistake, she rushes off to Hawaii to ensure that doesn't happen. What does happen is Annie meeting Terence Javier, her and Marissa's former high school crush. Terence is a diving instructor and father of a ten year old daughter. When she hires him to take her out in his boat and a storm causes them to take refuge at his family's home, sparks start to ignite between the two of them. When Terence seeks to get more time with his daughter, Erika, Annie enlists best friend and lawyer Marissa's help for Terence. Unfortunately for Terence and Annie, Marissa insists that they refrain from indulging in their attraction for one another, but that all changes when the heartbreaking discovery that Erika is not Terence's daughter comes out. After a judge decides that Erika should stay with Terence until the end of the school year, Annie and Terence are separated from one another, her in San Diego and him with Erika on the Hawaiian island of Oahu.

Fortunately for the two, it isn't for long. When Annie reunites with Terence after Christmas, he proposes to her yet Annie must return to the mainland for work. Shortly thereafter, Annie comes to the realization that things with Terence are moving too fast and that the attention should be focused on Erika upon her finding out Terence isn't her father, Annie ends their short engagement. Their love for one another brings them back together, while the impending court date to decide Erika's fate is still looming. Will Erika have to go live with her biological father or will she be able to remain with Terence, the father she's always known, and Annie, the woman she wants to be her mom?

Early One Morning is a wonderful read. The storyline is well written, with so many twists and turns that it makes you wonder if any of the characters will have a happy ending, especially Terence, Annie, and little Erika. There are also twists that will inevitably leave you wondering whether the characters you initially disliked are worthy of your sympathy and understanding instead. You won't be disappointed reading Early One Morning. There are so many characters whose fates are intertwined that there is no way to predict what the outcome will be, leaving you constantly turning the pages to find out the conclusion.

I started this book 2 days ago and literally could not put it down!

Aubree Lane has written a compelling beautiful and touching romance novel. From page 1 I was hooked! The characters Annie, Marissa and Hannah all swooned over Terrence Javier in high school. He was a GOD. When Annie met up with Terence, years later the attraction was still there. He was everything she remembered only now he had a beautiful daughter, Ericka. The twists and turns, along with the struggles and heartaches in the relationships that form only add to the page turning interests in this book.

Annie is a beautiful, talented interior designer who has put her heart and soul into building her business with the help of her best friend Marissa's father Larry. Marissa and David, her husband vacation to Hawaii where she discovers their high school crush Terence. Annie happens into the scene, where she and Terence rekindle a relationship that blossoms but with many obstacles. They are soul mates, destined to be together, but at what cost? Terence is hot, he's caring, he's a great father and everything Annie needs. It takes her a while to realize this relationship is meant to be. No matter the cost....Annie, Terence and Ericka ARE meant to be a family. Annie is a bit hard headed though and I fought with her in my mind over this.

I was torn with emotion, crying at parts as this family evolves and more characters emerge. As I became part of the relationship with Annie and Terence, I felt so much a part of this mixed up family. Each character literally tugged at my heart and I loved every moment of this book. I didn't want it to end and I just hope the author has plans for a sequel.... this isn't over and I look forward to book 2!

Well done Aubree Lane! You've given us all a beautiful story and I'm left wanting more. Kuddos for an amazing feel good romance novel!

Early One Morning is a beautiful tale of love and family with page turning drama

From the beginning of this book it is pretty obvious that Aubree Lane put a lot of work into developing characters that draw you into their story. I've read so many books lately where the characters were one dimensional and hard to care for but these characters were different and it made me love the modern day romance even more.

The description of the locales was awesome you really felt like you were there in the moment with the characters on the beach soaking up the sun. Well done!

The friendship between Marissa and Annie provided great conflict and the competition for who gets the kiss first. The sad story of Erika and Terrence will pull at your heart strings and the romance between Terrence and Annie was hot.

The plot twists were crazy insane and they kept you turning the pages to find out what could possibly happen next. I highly recommend this book.

This was a page-turner. I became completely absorbed in the story and felt invested in what was happening to the characters. Ms. Lane is a writer with a unique voice, and the writing talent to make that voice easily accessible to her readers. I found myself marveling at her insight into human nature, and thinking about how and why my own relationships with friends and family have changed over time. To be entertained while being urged to think, all at the same time, is a very good thing. "Early One Morning" deserves all five stars.

Cherime MacFarlane says

Great book! I really enjoyed this book. Waiting for her next one.

Tall, Dark, Handsome Terence...and that smile! No wonder the girls wanted him back then! And still do! I do!

Aubree Lane is a remarkable writer. A talent to draw you in from start to finish. Her writing style brings her characters to life. You get to know each and everyone of them personally. You feel what they feel. Amazing!

This book is filled with romance, emotion and some twists and turns along the way. We are introduced to Terence, that best catch from high school, is now the best dad. The girls who wanted him back then get the chance to fulfill their old dreams of desire. And the plot thickens...

Marissa, who spots him while on a romantic getaway with her husband. Annie, Marissa's best friend weaves her way in to get him for herself. Will their lives ever be the same?

This is a 'MUST HAVE'. I loved every moment I spent with this book. Please bring us more Aubree Lane!

From the moment I opened this book on my Kindle I was enthralled. The characters practically jump out of the virtual pages and grab hold of you as if to say, "I'm real. Feel what I feel." The story is enticing in a way that I found myself inching closer and closer to the edge of my seat like one would do when watching a particularly intense movie. And the twists!! I didn't suspect ANY of them. Aubree Lane has done it again! Early One Morning is definitely a must read!

Pradeep Chaswal says

'Early one Morning' is a fantastic read. Aubree Lane is a master craftsman of plot. She has portrayed immortal characters. Once you pick up the book it is hard to put it down without completing it.

The curiosity and interest remains alive from the first page to the last. You always wish to know "WHAT NEXT". The situations, incidents and the happenings are gripping. Language is powerful. One just fell in love with the protagonist. The work is an artistic success and I highly recommend it for all those who wish to read quality literature. FIVE STAR RATING STRAIGHT FROM MY HEART.

Kristy Oman says

There were parts that tug at your heartstrings and then some parts just completely unbelievable. Who flies thousands of miles on a whim to keep your (married) friend from kissing her charter captain on her anniversary trip? Does any of that sound remotely authentic? I seriously thought that was going to be a Marissa dream sequence and was so confused when it wasn't! Then her BFF turns out to be a raging mean girl and her "adoptive" father figure is a manipulative sleazeball. I mean, was this lady present in her own life ever? The ending was pretty great though, although it was disappointing that Eleanor didn't get some revenge and sounded like she was just trotting off to Hawaii to be with that jerk. I'd say this is a quick airplane or beach vacation read when you don't want to have to think too hard, but nothing I'm dying to read again.

Grace Augustine says

From giggly high school crushes to backstabbing teen drama and more, Aubree Lane takes us through a thirteen year journey through the lives of a group of "friends" who turn out to be enemies who eventually turn out to be family. I found myself transported into the thick of the story equating these characters with people I know who have faced similar if not the same situations.

Early One Morning is masterfully written with many story lines that have been woven into one extremely dysfunctional group of individuals. There are moments where you are jaw-dropping surprised to ones where you are so angry you want to throw the book on the coffee table. One thing is certain, you won't be able to stop reading once you begin.

Grab a banana split with lots of chocolate sauce because you will need every bite as you work your way through this fascinating story that takes place in two states I hope to someday visit...California and Hawaii. Good job, Ms. Lane! Good job!

I had the privilege of reading through a pre-publication draft of 'Early One Morning' for the author, Aubree Lane, in my role as editor. It was a rare pleasure. I found the story so absorbing that I had to use all my experience to keep focused on the job in hand.

The story tells of the friendship between Annie Harper and Marissa Crandall, and the love between Annie and Terence Javier. It is about the complexities of divorce, parenting and custody. The characters are believable. There is sexual tension, there is humour, and there are more twists in the tail than a bucket-full of

snakes; just when you think you have it figured, Lane pulls the rug from under you. It is a delight to read.
