## Geir Dale Mayer

Geir Winthrop, a former SEAL, has recovered from the damage done when his squad's truck drove over an antitank landmine more than two years ago. Six other team-mates were also badly injured, the seventh--Mouse--dead, in what their team leader realized later had to be a trap. Geir has been trying to uncover details about Mouse's history. The more he discovers, the more he fears their newest member was nothing of the man they thought they knew and believed they could trust.

Morning Blossom runs a B&B in San Diego that her father co-owns. Unfortunately, he wants to sell despite that the business is the safety net she needs to pursue her passion for painting. While she longs to make a career of what's only ever been a hobby, she isn't sure she has the ability to be a success. Morning has avoided long-term relationships after one man who'd stayed at the B&B wanted to take up perpetual residence despite her objections. Geir, however, is someone she could grow used to having around permanently.

While Geir doesn't understand her naïveté in letting strangers invade her world, Morning's innocence and belief in the goodness of humanity attracts him. Geir's innate protectiveness becomes much more than either of them anticipated when the nastiness of his world inevitably spills into hers...

## **Marie Brown (Marie's Tempting Reads) says**

Marie's Tempting Reads ARC Review:

A powerfully written romantic suspense with heart thumping action and romance so good, it will melt your heart!

The newest SEALS Of Honor novel by Dale Mayer is now here and its better than ever! Passionate and sweet with excellent characters and a terrific storyline, I devoured SEALS of STEEL : Geir within a day and wanted more. I enjoy these storied so much from Miss Mayer and get SO excited when I get a new one. And Geir, oh it was extra yummy and extra exciting with some extraordinary scenes and tender romance. A delight for sure.

Geir gets a ROMANTIC AND SUSPENSEFUL FOUR AND A HALF BOLD STARS!

---

## **Darlene says**

Time is running out as the complexities of this plot start to unravel...

Discipline, being secure in life and work is what Geir has had in his life until tragedy struck that forever changed his life and those of his team mates.

Theories, more questions, and not fully comprehending all that their deceased team member, Mouse was. What they are unravelling is proving confounding and frustrating, even though they feel they are now starting to learn more.

While going back to a past that holds former memories of wholeness, it will lead Geir and his team mate/friend, Jager, to more questions, and finding the depraved man who destroyed innocence under cunning guile,

It will also bring something completely unexpected and fresh. It's a feisty young woman, Morning Blossom, that with her naïveté, innocence, and a hard fought for belief that most people are inherently good will bring new possibilities. For all of them, as the net closes in... people become desperate and danger lurks in the very confines of what you hold dear and where you should feel safe.

Oh BOY!! Dale continues to reveal more layers of suspense and mystery. There is a sense that in GEIR, time is fast running out. Another layer to the mystery is evolving and those responsible are doing their level best to eliminate and get rid of any connection to the land mine that forever changed and shaped the men of Seals of Steel.

Dale continues this captivating series with yet another page-turning drama of Intrigue, twists and unexpected turns - with GEIR. I highly recommend not only reading GEIR, if you haven't already begun this series,

please go back to the beginning and start reading the SEALS OF STEEL series. It's for those that love military based heroes and the women that capture their attention, protect those they care and love. It's a bombshell of a mystery that you really want to delve deep into and solve. Plus, what's some romance on the side to keep of Seals of Steel captivated.

Are the friends we thought we knew, those we worked closely with, we saw war with, our friends, our protectors... really who they are? Only time will tell or is that time running out. Next up is Jager and is sure to be explosive in what will eventually be revealed.

---

### **Char Davis says**

This is an exciting action packed suspense filled romance story. Geri is part of the Seals team that was badly injured when a road side bomb went off killing Mouse and injuring everyone else. Now the guys are getting closer to finding the answers they so badly need. When he goes to San Diego he's already been told he has a room at a bed and breakfast the owners name is Morning Blossom. At first he thinks it's a joke. Who names their kid Morning Blossom? When he arrives at the B&B the first thing he notices is the great smell. It smells like fresh bread. When he hears a sweet voice say she'll be right there but Geir follows the voice and smell. In the kitchen is a beautiful woman preparing something for some more baking she plans to do. He tells Morning that he's expecting a friend when the bell goes off and he goes out front to see Jager. They hug each other then pull back not wanting anyone to see them less than badass seals. After showing them to their rooms she tells them lunch will be ready shortly. After they shower they go back to the kitchen and eat some of the best tasting food they've had in a long time. As they start their search for Poppy to find out more about Mouse. Things start getting more dangerous by the minute. Morning rents a room to another man that looks like he's former military. His name is Ken He's gone most of the time. Morning looks out the window and sees a shadow thinking someone is snooping around the back but doesn't find anything so she won't tell the guys. When Geir and Jager come back she tells them dinner is almost ready. Geri and Hager love how Morning only sees good in everyone but they know about all the evil and try to get her to be more careful. Geri hopes the evil they are chasing doesn't touch Morning, she lights a bright light in the middle of an evil darkness. When someone goes after Morning it makes Geir realize she's come to mean a lot to him. Geri and Hager vow to keep Morning safe. Hager tells him if he's not interested in Morning he will try his luck. Geir tells Jager to back out and Jager smiles. The twists and turns to this story will keep you riveted until the very last page and have you begging for more. I love the way this amazing author brings the characters to life before your eyes. I can hardly wait to see what's next by this multi talented author.

---

### **Maria says**

Geir's story is an unusual one in Dale Mayer's Seals of Steel saga. The plot is not as fast paced as in the other books, as the author takes time to explore the personalities of the key characters. While at the beginning of the saga the stories tended to be more dark and dramatic, reflecting the pain and the suffering that the members of the team were still going through, in Geir the atmosphere lightens up. The Seals of Steel are starting to heal, rediscovering friendship and self-motivation while chasing after the entity that orchestrated the brutal attack that left them barely alive just two years prior. They are now moving on, their injuries healed and barely noticeable, thinking about the future with determination and hope. Geir and Jager, the male protagonists, are good examples of this state of mind. While relentless in completing their hunt, they take the time to explore their feelings and to make plans about the future.

Blossom, the heroine, is an artist, and, apparently a quite different persona from the exceptionally skilled women that have joined the team in the previous books. Over the course of the story, however, she reveals a strong and resilient personality. She also has a caring, sensitive soul and a passionate heart.

In preparation for the grand finale of the saga, this episode ends with plenty of cliffhangers. It is, however, an enjoyable part of the general plot that provides a new, more lighter and hopeful perspective to the story of the Seals of Steel team.

I voluntarily reviewed an advanced reader copy of this book. Opinions and comments are solely my own.

### **Linda Carlson says**

I love this story!

I am committed to this entire series. Each addition takes you deeper and deeper into the mystery surrounding this SEAL team and the horrific bombing that forever changed their lives. The deeper we go, the more tidbits that are revealed leading to a spectacular revelation, I'm sure!

Like Laszlo, Geir is one of the quiet ones. He moves with quiet intensity, is aware of his surroundings and all that are in it. I look forward to his interaction with Morning Blossom. She is as deep into this mission as much as the rest of the team, they all just don't know it yet or how it all fits.

This story is loaded with tiny twists and turns that detail the current events as well as the past events Geir and the team are looking for. They solve one little riddle only to uncover a larger one that has a larger clue or a bigger mystery. I love this! Integrated with the clues uncovered is Morning's underdeveloped passion for her art. She is a complex, deep, passionate woman and Geir is tuned right into her.

I remain hooked on this series with Geir and Jager quietly investigating some of the most heinous habits of one man but yet this one man is just a small part in this story. The clues uncovered are leading us on a merry chase that is all about finding the mastermind that has nearly destroyed each and every remaining member of this team. I couldn't put it down and read this story all in one sitting. Each member of the team seems like family and I have to know what happens!

Excellent job! I loved it!

---

### **CarolKat says**

While each of these books is a standalone, I recommend reading them in order to get the most out of them.

This book opens at Badger's home as the guys go over the information on Mouse they've uncovered so far. Geir is ready to head to San Diego but first he reaches out to Jaeger, the one member of the team who has stayed dark. He is pleased and surprised when Jaeger responds he'll meet him there.

Mason has made arrangements for the guys to stay at a B&B run by Morning Blossom (yes, that's her name) and Geir is very surprised at the lack of security there. While she has cameras there is nothing else. Jaeger shows up and they start with their investigating.

Morning owns the B&B with her father, but he is living overseas and the real reason she keeps it running is her art. Art is her true passion but she doesn't trust her instincts and now she may have a gallery showing but nothing she feels is worthy to show. Geir however sees her latest and compliments her which gives her more inspiration.

As Geir and Jaeger work the leads they have, they find a scary link between 'Poppy' and a local school. With the help of Morning's friend Nancy they get access to the school and start putting pieces together.

A break-in, a stuffed mouse, and a near miss ramp up the suspense as a romance develops between Geir and Morning.

Much happens in this book as they work toward solving the mystery that is Mouse and resolving the questions about the incident that caused their injuries

---

### **Jacqueline says**

#### **Getting closer.**

The suspense is killing me. Why did Geir's unit get attacked, his and his team's loved ones get attacked or murdered and who did it. They're getting closer to finding the answers but the person who could've told them didn't and dies before he could coerce him into answering.

Each of these Seals have been to hell and back and are trying to find their way in life and on the way find someone to share it with. Geir is another excellent book in the Seals of Steel series by Dale Mayer. I sincerely recommend this series to anyone interested in Military Romance/ Intrigue. The characters become alive as you read making you go through a plethora of emotions.

---

### **Mandy Parmenter says**

As the search for more information about Mouse goes on, former SEAL Geir Winthrop travels to San Diego to follow up on some clues around Mouse's life and drill down on some of the disturbing information the team has uncovered as part of investigating their so called accident a couple of years ago. He stays at a B&B co-owned by artist Morning Blossom and her father. Morning sees the B&B as her safe haven as she struggles with self doubt in her abilities as an artist. Having stayed away from relationships since a bad one she starts to believe that she could have something with Geir if only he wasn't going to go home at the end of his stay. Geir on the other hand is determined to protect her after realising just how naive she is about security in her place especially as his world of danger starts to spill into her home and business life. Can he find the answers, protect Morning and is there a chance of them having a long term relationship?

This was a delightful story which had all the necessary ingredients of a SEAL based romance - drama, danger, a strong need to protect a woman and the chance of a relationship in the future. It helps if you have read the previous books in the series to understand the events that triggered this search for information but it is also possible to read this as a stand alone story. I loved the way Morning's painting was progressing as the attraction between Geir and her was also developing. An enjoyable story with a few twists and turns too.

---

## **Connie says**

I received a complimentary copy of this book from Booksprout and I am voluntarily reviewing it.

This book, like the others in this series, have a great sub-plot going on. What happened 2 years ago to cause the explosion that killed Mouse and grievously injured the other SEALs? While the men recover from their injuries, family members of the remaining SEALs start dying. The chase to discover the person(s) responsible for all of this is slowly being exposed with each book. Along the way, each man finds their soul mate. Wow what a journey it has been. I will be re-reading these books again after the release of the last one.

I loved this book. Geir Pavla and Morning Blossom were great together. The intrigue of the sub-plot of what happened and why 2 years ago is getting closer to being solved. Finding Poppy and getting answers lead to even more questions. Geir and Jager go to San Diego where they meet Morning Blossom. She runs the B & B where they are staying. Staying there exposes Morning to their intrigue and danger. The interaction between Geir and Morning was so natural, you could see the "sparks" between these two. The scenes of the book played out like a movie in my mind, it was so well written. Once you starting reading, you will not be able to put the book down.

I highly recommend this book if you love former military men and suspense.

---

## **Lisa says**

I received a free copy of this book via Booksprout and am voluntarily leaving a review.

Dale Mayer's writes a lot of series about SEALs and the military. However, her "Seals of Steel" series is one of my favorites. The premise of this series is that a team of eight SEALs hit a landmine while on duty overseas. One man dies and the other men are all seriously injured. When the men are finally able to get on with their lives, they discover that their "accident" wasn't really an accident. Someone did this on purpose. They decide that they must find out what happened and why.

In this particular book, Geir continues the investigation into the "accident" that changed all of their lives. Jager, another injured SEAL, joins him in his quest. Both men travel to California to find information about Mouse, the one SEAL who died. They want to investigate the area where he spent his early life, interview friends he grew up with and the people who knew him.

One of their fellow SEALs recommends that Geir and Jager stay at a Bed and Breakfast they often frequented. It is owned and run by Morning Blossom, who eventually becomes Geir's love interest.

Geir and Jager spend most of their time in California investigating Mouse's life, his friends and the environment where he grew up. Unfortunately, their search triggers several disturbances in Morning's B&B which disrupts her business and her life.

When all is said and done, Geir and Jager learn a lot of information about Mouse and his life. Much of what they learn is shocking, heartbreaking and difficult to believe. In the end, however, this is not enough information to answer all of their questions.

Unfortunately, even though Geir and Jager leave California with a substantial amount of information, they still do not have enough to find out who caused their “accident” and why.

---

## **D. Harley Jean says**

I was kindly provided this book as an ARC; in exchange for my honest review. This is book 6 in the SEALs Of Steel series.

The “SEALs of Steel” were an eight-man SEAL team unit that was misled/ambushed/given “bogus” orders that caused them to hit a landmine during transport. All the men were grievously injured and one man (“Mouse”) died. The remaining seven SEALs are investigating to find out what happened and why; and hopefully in the end to avenge Mouse’s death.

You certainly must read this series in order or you will be lost. This is definitely a series with layers of stories within a STORY.

This book centers around Geir & Morning (Blossom). The only other team member that is represented in this story is Jager. There is reference to Levi & also Mason. These characters are from two of Ms. Dale’s other related SEALs series. Also quite good.

Geir & Jager are in San Diego trying to investigate Mouse’s background as events to this point have led the team to believe their “accident” & the rash of tragic events the team members closest friends & family have suffered are somehow linked to their deceased team member, Mouse. Morning Blossom owns a large bed & breakfast & is an aspiring artist. The story starts well, gets slow & fairly convoluted (not typical of Ms. Dale’s works); and then picked up again only to really leave the reader hanging at the end. I certainly don’t have the authors incredible talent so I have no idea how it could have been improved, but this story while it filled in a very few blanks to the overall STORY; it didn’t reach the same caliber I’ve come to expect from Ms. Dale.

I did feel as if the story was cut a little short or was maybe rushed. This storyline is involved and probably won’t come to a conclusion or semi-conclusion for at least a few more books.

---

## **Judy says**

Geir by Dale Mayer

SEALs of Steel Series Book Six

Geir Pavla takes up the search for whoever betrayed his SEAL unit...killing their youngest member. His friend Jager comes out of the dark to join him in San Diego. It seems every time the team members have gone is search of answers, they get close, and then get turned down a new road. Geir is hoping to find their answers and get closure so they can all move forward.

Morning Blossom loves her life. She runs a B&B and has plenty of time for her main passion...painting. She's always been trusting, leaving her front door open for her guests to come on in. Only now, the two handsome hunks staying with her brought along more than luggage. They brought trouble to her

doorstep...and beyond.

After a land mine blows up the vehicle these men were in, they all have lost a lot. Body parts, organs, and two years of their lives. Back on their feet...somewhat, the seven surviving team members realize it was no accident. And neither is the losses of their family and friends. I can't wait for the next book...Jager's story and I assume the end of the mystery. Great series.

### **Kathie Savage says**

With the help of Mason (SEALs of HONOR), Geir is booked into a B&B in San Diego, where his presence would be less obvious to the killer he seeks than if he stayed with Levi's group at Legendary Security (SEALs for HIRE) in Coronado. B&B owner Morning Blossom is manager and co-owner of the huge Victorian house and dreams of a career as an artist. Lack of confidence keeps her from her best work, so the B&B pays the bills for now. Geir arrives to check in and finds her in the kitchen baking bread, followed a few minutes later by Jager. It's clear to Morning that these two men are close friends reuniting after a long time, that they are very special and are there on a very important and dangerous mission. Geir and Jager also each find Morning very attractive and try to shield her from involvement in their mission. But strange things begin happening at the B&B, and this dangerous mission has now also put Morning and the B&B at risk. When she realizes the target of their search is Poppy (If you read Laszlo you would already know this...), Morning recalls his reputation from her early school days. Her helpful information takes her deeper in danger, and Geir steps up to protect her while Jager provides them safety and space to pursue their relationship and Morning's creativity as an artist. So now, you have met all seven survivors of the explosion that devastated Badger's SEAL unit, but there is more excitement to come! Are you as addicted to this series as I am?

---

### **Lisa Gibbs says**

Geir travels to San Diego with Jager who we have only heard of til now. He comes out of hiding to assist Geir in tracking down the infamous Poppy. As they follow the trail the men unknowingly bring a target to Morning Blossom's doorstep.

Morning is an artist/B&B owner who sort of lives in her own bubble of happiness until the SEALs dark world shatters her bubble. She is drawn to Geir and he to her but the attraction heats up only a day before they are to leave as does the action.

The story is well written and I like the characters a great deal. We learn more about Jager. I also noticed that less is said about Geir's injuries and Blossom only discovers his missing leg, nothing is mentioned by her about his prosthetic arm. That part I found a little off.

More pieces fall into place and the ending is very interesting because Poppy may not be the only one who has the answers. He truly gets the last laugh which leads us to the next story. It all intertwines somehow and Morning has a connection that the SEALs don't see coming. It's a small one but another connection none the

less.

I can't wait to see how this all ends. The evil in this series is horrendous and well I know it exists out there so this story is realistic and believable.

---
