Not every monster started as human.

In this anthology of eleven original tales, the undead are never quite expected. From sinister feline mummies to ravenous zombified cars and any and all things in-between, the living dead have returned from their graves, junkyards, and even the war torn skies to haunt the lands of the living. With stories horrific, funny, and weird, Strange Afterlives has a little something for everyone who has ever wondered what terrible secrets could be lurking in that rotting tree or broken toy.

Stories included in this anthology:

Mouse Trouble by A. Lee Martinez

After the Invasion by Russell C. Connor

Seated Woman with Child by Rosemary Clement-Moore

Roots by Brooke Fossey

The Late Mrs. Buttons by Sally Hamilton

An Undercover Haunting by Kristi Hutson

Gimme Shelter by David C. Whiteman

01001110 by Nik Holman

The Runner by John Bartell

Night Witch by Shawn Scarber

The Scavenger Hunt by John Sanders Jr.

Strange Afterlives will terrify and amuse. You may never look at a rusted automobile the same way again.

# From Reader Review Strange Afterlives for online ebook

## Tom Quinn says

Every October I read mildly spooky stories for the Halloween season. Nothing too scary, because I don't need nightmares. Just a little bit creepy will do. This collection fit the bill, but I was disappointed to realize it includes just one story by A. Lee Martinez and is not a book of stories all by him like I'd initially thought. Also, the Kindle edition has a LOT of typos throughout.

2.5 stars out of 5. No complaints about the stories found here, though nothing stands out as exceptionally memorable either. It's the standard short story collection: one or two are really good, one or two are really bad, and the rest are neatly in the middle of the road.

---

## Brian Tracey says

A fun, fast read from start to finish. Each story just as weird and ghoulish as the next but all with wonderful twists and surprises. The undead come to life in this wonderful anthology.

---

## Carole O'Brien says

I am really loving this book of short stories each one is good to be honest, but I do have a few favorites.  
Roots by Brooke Fossey.

The Late Mrs Buttons.

01001110 by Nik Holman it is a great story about robots with a fantastic twist at the end , tried to find more books by this author but could not find any.

This is a great book to be honest, each story is excellent on its own merits, each with twists and turns and unexpected endings.

---

## Marcus says

2-3 good stories, a couple of good ideas but over all not the standard of A. Lee Martinez

---

## Mary says

### This book was too short

I liked the variety of stories in this collection. Wish there were more. A couple of new authors that I haven't heard of before. Will be looking them up.

---

**Mike says**

**Only two stories worth reading**

The stories by Martinez and Conner were worth reading. The other stories were a waste of time. I've always liked reading Martinez and now I will check out Conner.
