In a case that spans 20 years, Harry Bosch links the bullet from a recent crime to a file from 1992, the killing of a young female photographer during the L.A. riots. Harry originally investigated the murder, but it was then handed off to the Riot Crimes Task Force and never solved.

Now Bosch's ballistics match indicates that her death was not random violence, but something more personal, and connected to a deeper intrigue. Like an investigator combing through the wreckage after a plane crash, Bosch searches for the "black box," the one piece of evidence that will pull the case together.

Riveting and relentlessly paced, THE BLACK BOX leads Harry Bosch, "one of the greats of crime fiction" (*New York Daily News*), into one of his most fraught and perilous cases.

Honestly felt it wasn't up to Connelly's usual. A lot of procedural detail, but far less emotion than he usually puts into his books. Love Harry Bosch but this isn't the best one.

#### **The Black Box...good intro to get you hooked**

Of course I enjoy Michael Connelly and the Harry Bosch series...so I downloaded this preview. It didn't disappoint. Bosch tracks a murder from back during the 1992 LA Riots. Good read! I downloaded the entire book and was pleased to the end.

I liked this latest mystery a lot! So glad to have detective Harry Bosch back again. There's lots of action in this one. I particularly enjoy reading about Harry's relationship with his teenage daughter Maddy who gives him an Art Pepper boxed set of CD's for his birthday. He plays them throughout the novel and is particularly excited about Pepper's rendition of "Somewhere Over the Rainbow." So I looked it up on You Tube. Sure enough, they had it, and it's gorgeous. Now I've ordered library CD's of some of Pepper's work. Many consider his music and skill on the saxophone 2nd only to Charlie Parker. It is rare to be introduced to something by a book character (and author) who is passionate about something. A good read!
