## Zits Jerry Scott , Jim Borgman

Fitting in. Being different. Growing up. Staying a kid: *Zits* is a comic strip about the funniest, most painfully emotionally charged, physically demanding, mentally challenging, and colorful times of our lives--adolescence. Those who are living it can relate. And those who have been through it cannot remember the time without smiling, or at least wincing at the arrogance and ignorance we all mistook as maturity during those few eternal years.

*Zits: Sketchbook #1* is an inside look at life from the point of view of Jeremy, a private 15-year-old who is desperately hacking his way out of childhood and into maturity. He labors in the shadow of Chad, his perfect older brother who is away at college. Jeremy is a freshman in high school whose main pastimes are hanging out with his best friend, Hector Garcia, forming a garage band, and being amazed at his parents' spectacular ignorance about almost everything. Impatient, self-absorbed, emotional, and bored silly, Jeremy is the essence of adolescence. *Zits* resonates with its fans because the strip contains so much truth and insight, wrapped in an uproarious context that's all too familiar to everyone who's been 15 or has parented a teenager.

### **Catherine says**

It was fun to see the very first of the comic. Especially since it was set before cell phones, and even cordless phones, back when computers were huge and slow and used modems! Fun walk down memory lane!

### **Nighteye says**

Zits are as good and funny as always even if the drawing style of the newer strips are better made wasn't it as bad beginning as many of the other really early comic series.
