From Hugo Award finalist David VanDyke and million-selling science-fiction legend B.V. Larson comes book two in the epic military space opera adventure saga!

Commodore Straker's rebellion grows in strength--but his enemies are growing even faster. Faced with a dozen rebel planets in their territory, the Mutuality finally takes notice of the upstart known as the Liberator, and they gather a vast fleet to crush him.

Preparing for a titanic interstellar battle, it's clear Straker has no chance. His tiny enclave of free planets can't survive the weight of a thousand worlds. His own officers realize this, and some of them begin to turn against him...

In a desperate attempt to halt their inevitable destruction, Straker and his team set out to capture the largest ship ever built. The monstrous vessel is well-defended and contains secrets no one suspects. Unleashing its power might turn the tide of the war--but it may also doom humanity.

A very good read. A good follow up to the first book in the series. The book will keeps your attention, and the story line is easy to follow. I'm looking forward to the next book in the series and hope the series continues for a longtime.

WOW!

Wow!! I'll say it again, Wow! This was most definitely one of the top three stories I've read it the past five or more years... It's just that good. Don't walk, just run and hit the buy button because story was so well crafted and so smooth that it was pure enjoyment reading it.

Craig Dean says

Book 2 ramps up the action and tension as the scale grows exponentially. Although enjoyable it can feel a little rushed and the "Black Swan" has the disadvantage of being just a bit too convenient. Notwithstanding, the pace keeps the story moving along and keeps the reader engaged. There's a sense the series is hitting its stride, and it's doing so at breakneck speed. Arguably Fantasy is at its best when it lets the reader fill in the vast canvas and this series does that well. It might be nice to occasionally stop and admire the view though.

Exceptional reading!

I enjoyed the second in the series as much as the first the writing is excellent and reflects an excellent working relationship between the two authors. It is a good long book reading at TopSpeed it took at least three or four days to finish, Which I appreciate as I love quality reading. I am highly recommend these books. I cannot wait for the next installment.!

This story is developing very well, the AI plot-line was one of the most interesting to me while reading. Interested in seeing how Book 3 in the series will continue it all!

Burt Md says

Indomitable was fantastic read. I enjoyed it thoroughly. The strategy and mechanics of space battle are explored making this a very interesting book. The characters, both human and alien, are well developed and flesh out the story. Thoughts about sentience are added appropriately. Great read. I hope the story continues.

Mark says

Typical BV Larson, just not written my BV Larson, apparently. Fun at times, story rambling at others.

Straker's breakers continue to gain numbers and ships as they build their liberator reputation within the Mutuality. Soon they realize that they need a game-changing event to occur if they are going to ultimately have a successful overthrow of the Mutuality government - enter Battleship Indomitable.

Don Taylor says

A Great Book

What a well-written, gripping, plausible tour-de-[military-science]-fiction!

Great development of the Ruxin species, the mysterious Opters, the communist Mutualist human faction, and the increasingly evil-seeming Hundred Worlds humans.

Looking forward to the next installment.

Thanks!

Thoroughly enjoyed reading these...

Thoroughly enjoyed reading these books. Lately more and more books are forcing social science/justice themes into them. Authors have opinions and they show in all books but they do not need to blatantly shove those opinions down the readers throat. Refreshingly, these authors do not seem to feel they need to use their stories to soapbox and preach to the reader. Nothing is forced and the story is allowed to just flow and that is a good thing. In my opinion, many new books are ruined with themes that are not needed or applicable to the story itself shoved within. That does not happen in this series and that is a good thing. Opinions yes, preaching that jars the story line, no.

Mech Suit liberator

Second in a series, follows Derek Straker on his quest to liberate a portion of the galaxy. Solid action and

some thought provoking dialog provides a good read for fans of military SF

Lars Vanderbur says

Enjoyable light read

I did enjoy reading this book but it did not make me hurry home to finish it. It simply felt disjointed at times and not smooth in its flow.

That being said, I enjoy BVs works as a whole, and will still buy and enjoy (I'm sure) the next installment in this series.

Eric Greenman says

Freedom

I enjoyed the book. Interesting character discussions and viewpoints concerning individuality, humanity, leadership, freedom, love, and general social psychology. I also enjoyed the description of the battle scenes and the characters thoughts concerning command decisions.

John Yanders says

The Liberator does not stop!

Liberator Straker is back in this second book in the Galactic Liberation series and he is taking back planets and building an empire or is it a republic, who can tell? I was really engrossed in the space battles and the detailed way the characters are maturing and being fleshed out in this series. There are strong morals and ideals at work here.

R. Frank Johnston says

Rip-roaring Space Opera!

Classic battles between humans, humanoid aliens, genetically modified humanoids, octopoid aliens, and hive-insectoid aliens. It's got it all, fantastic weapons, FTL travel, and a little romance mixed in.
