For several years, werepanther Bianca Jacobs has sought out a way to regain her position within her pack. Her mission: Infiltrate the ranks of the vampire queen and place herself directly in the line of fire. Ending the queen's reign of terror is within her grasp...if a certain hybrid doesn't kill her first.

Betrayed by those he once trusted, Ryder O'Laughlin will stop at nothing to end the nightmare that has plagued his kind. Trapped between duty and consuming desire, Ryder must partner with Brody Sullivan, a werepanther with a secret of his own.

Can the three of them put aside their emotional conflicts and find a way to destroy a nefarious vampire queen and end the mutating were-virus once and for all?

### **Marie Brown (Marie's Tempting Reads) says**

Outstanding fits this book to perfection! I LOVED it! The characters are struggling with so many emotions and baggage from past and present events that just add so much to the whole story. I really like Bianca and thought she was such a great combination of sweet and strong while Brody and Ryder were both dominant and edgy. I also loved the fact that there was constant action. Whether it was a very spicy sex scene or bad guys after them or even the good guys, there was always something going on to make sure I was kept captivated. I can't say enough how much I enjoy Morgan Fox's Moonlight Shifter Series. I think this is one of the BEST series I have had the pleasure of reading.
