Great series cannot wait for book # 6....a must read!

This is the fifth book in a serial romance. You must read the others first to be able to understand what's going on in this one. You can see my reviews of the previous books: Throbbing Hearts, Reaching Hearts, Crushing Hearts, and Tempting Hearts.

I am still head over heels for this series. It has never stalled and only continues to impress as being suspenseful, erotic, and romantic. It's much like the classic soap operas of yesteryear but without the overacting.

The book picks up with Tommy and Rebecca's liaison. It's now known that he's a very bad man, but he continues to unleash new levels of evil. Rebecca is still a bit disturbing seeing what a scorn woman will do

Annie and Brendan seem to be going along swimmingly. They're enjoying each other. He's completely opening up to her and feeling things he didn't even have with his college girlfriend. For the first time in years and perhaps ever, he wants and can imagine a future with someone.

Christiano makes a small appearance in this book. I can't figure out where he still fits in. While in the peripheral to the main plot, his character still possesses the ability to turn things upside down. One last morsel, there is a return of a character from Throbbing Hearts who changes the game.

Just when I thought the elusive realization/confrontation between Annie and Brendon was going to happen, it didn't. Crisis adverted. But then, it did happen! Maybe I'm a glutton for punishment or perhaps more aptly I wanted it to transpire because we all know it will. Now it's like ripping the band aid off. Let the drama from her identity concealment occur, so they can move on. The unfortunate part is this one ends without a resolution to the scene. Perhaps even more unnerving to me is the sentence in the author's note where it states the next and sixth installment will be the final in this series. I can't even wrap my head around how everything can possible reconcile in just one more episode.

I am in love with Annie and Brendan, and i'm quite sad that I only have one book left in the series :(but I really love Sabrina Laceys style in how she writes, it is so different compared to other authors I have read :)

I received an ARC for a honest book review. I love this series and each book has left me wanting more....like all book readers I'm impatient but that also adds to the excitement when you've got the next instalment.

I felt this book wasn't as gripping as last three but I feel Sabrina is setting the foundation for the next book, this book really concentrated on Brendan and his unexpected emotions and feelings towards Annie which he was struggling how to handle.

Annie's secret is eating her up and you can feel the tension as you read she tries to tell him several times, but how will he react if I tell him? And self preservation keeps the secret.

I really don't like Rebecca and I expected more bitchiness from her in this book which makes me wonder what Sabrina has in store for her.

Christiano left me wanting to SHOUT if you love her fight, I'm not sure his passion for Annie is strong enough.

Tommy is just plain nasty again I was expecting more from him in this book, the ring Annie to notice it although I feel it could be the calm before the storm.

Could Corrine do any more damage....let's hope it can be repaired.

Excited and waiting with anticipation for more.

I received a copy of Tangled Hearts, book 5 of the Hearts Series, in exchange for my review.

Though it hasn't been long since the shooting at Annie's bar, Brendan's been falling for Annie harder than he ever anticipated and starts to think about things that he hasn't really considered with women in years; a relationship. But Annie's secret is now known by Rebecca, as well as by Tommy, and both of them want to hurt the couple in different ways, and it is only a matter of time before it is revealed. When he's just beginning to trust her, how will Annie's lie affect Brendan? And will it tear apart their new relationship?

This series just proves what little patience I have when it comes to reading books I love...I've had this book just over a day and already had to read it, and had to know what happened next with Brendan and Annie. I think that really shows how invested in the characters I have become, and how vividly Lacey paints her picture, with both the characters and the story line.

I felt really on edge in this book just waiting for Brendan to find out that he did know Annie before (from the events in book 1 Throbbing Hearts) and the fallout from it. I really didn't want it to happen because they were being so cute with each other...well cute in the new relationship way where there's lots of sex...and it was looking up for them. At the same time I knew that it had to come out and that it would hurt the characters. I think that this is a perfect example of the real life situations that this series has shown, especially because people aren't perfect, and relationships, love and all that other life stuff is messy and definitely not clean cut!

Rebecca surprised me in this book as well. I fully expected her to go through with her plan, and though I'm still not sure quite what to make of her, I'm glad she didn't. Tommy on the other hand...well I just plain don't like him (and not just for the obvious reason) and I certainly don't think that this is the last of him...though I am wondering what he's going to do next.

The other character that really has me wondering is Christiano...he only had one chapter in this book, but it was pretty obvious what his main goal was,, and I think that could lead to some drama. Again there's something about him that doesn't gel right with me...but maybe that's because I just don't think that he's the right fit for Annie. Though it could also be the way that he treated Sophia previously.

I am still loving this series, and really don't want it to end! All of the characters are richly depicted and built so that they seem like real people with real lives. Things aren't perfect in The Hearts Series, which for me is what makes it so good; the drama, the tension and the messiness of real life.

P.S. Sorry for the amount of gushing going on in this review...you'll know by now what I get like when I start talking about a book I love!

*I received an A.R.C. of this book in exchange for an honest review *

Sabrina Lacey has a beautiful way with words. The "Hearts" Series is on the whole a solid 5-star read. Her character development and trueness to her characters makes her one of my favorite authors. I don't want to disappoint with spoilers, but "Tangling Hearts" might clear up an issue or two....or not. Read it yourself and find out, but don't delay, as this is one fantastic, sexy, mysterious ride. Please read the whole series before reading this book! With one book to go it's anybody's guess what might happen, but you know your soul will be touched if Sabrina is involved with telling the story.

Why not a 5-star for Tangling Hearts? Probably my impatience with having to wait for Book Six after an awesome cliffhanger! If I could give 4.5, I would!

While you're waiting for book six, grab the boxed set of Sabrina's "I love My" series. It is awesome!

And take a look at her website, as the content is fantastic!
