## Crystal Seeker Sophia Sharp

High school junior Tracy Bachman is looking forward to beginning her new life at Oliver Academy. A private, prestigious boarding school located on a beautiful, pristine island, it's everything she's ever dreamed of. If she could only stumble upon the right guy there, everything would be perfect.

Following a rocky start, Tracy settles in and comes to love the island. Everyone is fascinated by the new girl, and Tracy is quick to make friends and meet not just one, but two different guys.

However, it doesn't take long for her friends to help her discover a latent ability deep within herself... an ability that is unlike anything she's ever experienced.

And her ability is coveted. There are others who would take advantage of her, to make use of her powers for their own gain. Suddenly, Tracy starts to realize that underneath her perfect little getaway might lurk a threat. A danger. And as she gets deeper and deeper involved, finds herself lost in a world of love, lies, and supernatural magic.

I loved this book. I really liked the way the characters really came to life for me and the way the story unfolded. I can't wait for the next book. My daughter and I really love Sophia's books!!

### **Pamela says**

Great story line. I loved the characters and their quest for the power of the crystal! But danger is everywhere! Loved it!

I wanted to like this book. I really did.

But, alas, it was not meant to be. I struggled with it for weeks, and finished reading it out of obligation. Don't get me wrong. The characters were well made, with human flaws and strengths, especially Liz. I love me some "Filthy Rich Academy" stories. And the conflict was strong and palpable.

But...

- a) The romance with Rob was just contrived.
- b) The villains were ridiculous and went from manipulative\dangerous to cackling maniacs. I couldn't take them seriously.
- c) The crystal things (and a school where parents can't go until their daughter nearly dies), in short, the

setting in general just made me roll my eyes.

d) Did I mention how ridiculous the villains were?

And someone turns into Quasimodo because they break their collarbone. What?

Also, my biggest pet peeve in the world - shift between 3rd person and 1st person narrator without nary a warning. I only allow 1 book to do that, and that is the Laundry Files. This one doesn't get the free pass.

All in all, unfortunately, pretty forgettable.

This book was interesting and well different. I was not expecting the story to go this way. Unlike her dream realms series the pacing is a little slow. You knew who the bad guy was to early. I wish she would have left it a mystery and the we would have discovered who it was with Tracy. Don't get me wrong I liked the story and will read the next ones to see what happens to Tracy. Anyone who has read her will love the series just keep in mind no vamps.

I think that this author has a lot of potential. There is definite need for a spell/grammar check, or the assistance of a copywriter/proofreader. The reason I say she has potential is that the story was interesting and unique, and she seems to have that rare ability of being able to suck the reader in. Many authors lack that talent. I think if she keeps working and refines her proofing and grammar usage she could go far.
