## **Little Miss Chaos** Paula R. Hilton

Judging by Vivian and Jake's first encounter at the Dunkin' Donuts in Belmar, New Jersey, it should have been obvious that Jake was trouble from the start.

On one side of the counter stands a seventeen-year-old girl with Ivy League aspirations and a clear goal of ruling the world by twenty-two. On the other is a hazel-eyed thief with a surprisingly polite demeanor and a love of sugar-free Vanilla Bean Coolattas.

As he demands all of the money in her register and tip jar, it's clear that Vivian and Jake couldn't possibly have any less in common. So why does she feel a sudden surge of sympathy for the juvenile delinquent standing before her? And why would the robber find himself admiring the badass bravery of the coffee shop cashier?

As their worlds continue to collide, Vivian finds herself torn between her future plans and a longing in her heart that just won't go away. She was once voted "Little Miss Chaos," a title she's tried hard to live down, but when mayhem begins to creep into her life again, will she have what it takes to maintain control?

### Renie says

This book is good, it didn't really have as satisfying of an ending as I would've liked, but it didn't leave me in agony, so that's something too. Now this is a romance so if that's not your thing, this book is definitely not for you because romance is the main topic throughout the book. I say that because some romances can get away with a general audience, but this book isn't one of them. It's still good though.

Full detailed Review on my blog: *Word Wonders*

As I haven't even read half the book this review is going to be just for the amount I read. Obviously. The writing in this book is one of the two things that I didn't completely hate about Little Miss Chaos. Granted, it had some very eye-roll worthy sentences and cliché moments like this one ““Vivian, Wait!” she yelled as her friend climbed the steps and flashed her well-worn pass at the driver. “Vivian!” Other people filled into the bus, and Hailey watched helplessly from across Ocean Avenue as the driver closed the door and carried her dearest friend away.” Like, dude?! All you needed to do was run, RUN 10 METRES FOR GOD’S SAKE and you could’ve caught up with her, but no we needed that dramatic moment with melo background music. Aside from that, the writing was quite lovely and easy to read.

The book is written in multiple POVs and this is the perfect example of when a book doesn't need that many people speaking in it. One would've been good, two would've been fine too, but we got the main character, her love interest, their parents, her bestfriend. I mean, WHY? That just made the story very messy and hard to follow at times especially since it wasn't following any chronological order. Add to that the fact that we only got around 3 pages from each POV and that really disturbed the flow and frustrated me a great deal.

But here's the real reason for which I DNFed this book: The romance that's at the very center of things started with the guy robbing the girl at work, then he couldn't get her out of his mind so he kind of stalked her and went back to the work place where he asked her to go for a ride with him on his motorcycle and she went. SHE WENT!!! And the whole time she kept saying that he seemed harmless and she couldn't believe this whole robber act. Yeah, okay, legit! Where is the self-preservation? WHERE IS THE BRAIN? Aside from how it started, I didn't like the romance at all, it didn't make sense because it felt very rushed, one minute he's robbing her and the next kissing her. The reader doesn't get to see them growing closer before diving into this thing head first. It felt very insta-lovey to me.

The second and last thing I like about this book is Hailey who's Vivian's "best friend" and the reason for that being quoted is because Vivian is dreadful to her and completely shuts her out when she meets Jake just to come back when things start going bad for her. The reason I liked Hailey is because she told her friend things exactly the way they were. To me, she quite frankly seemed like the only sane person in that cast of characters.

I really hope that things get better as the story progresses because that would explain the three 5star ratings (out of 7 seven ratings) but I couldn't push through anymore than I already did because I'd rather spend time reading things I enjoy and coming from me that says Something because this is the 3rd book I DNF in my life as I usually give books dozens of chances to get things right.

### **E.a.pischke says**

As a New Castle resident, I was excited to discover this book was written by a native- that didn't influence my opinion though...

I enjoyed reading this from the views of the kids and their parents, it made it more well rounded I thought. I also appreciated all of their individual problems/conflicts and how they were resolved.

Can't wait to read Paula's next novel!
