Maureen Sprankle , Jim Hubbard

## Problem Solving and Programming Concepts Maureen Sprankle , Jim Hubbard

*Problem Solving and Programming Concepts, 9/e*, is a core or supplementary text for one-semester, freshman/sophomore-level introductory courses taken by programming majors in Problem Solving for Programmers, Problem Solving for Applications, any Computer Language Course, or Introduction to Programming. Revised to reflect the most current issues in the programming industry, this widely adopted text emphasizes that problem solving is the same in *all* computer languages, regardless of syntax. Sprankle and Hubbard use a generic, non-language-specific approach to present the tools and concepts required when using any programming language to develop computer applications. Designed for students with little or no computer experience -- but useful to programmers at any level -- the text provides step-by-step progression and consistent in-depth coverage of topics, with detailed explanations and many illustrations.

## Problem Solving and Programming Concepts Details

Date : Published March 5th 2011 by Pearson (first published January 1st 1989)

ISBN : 9780132492645

Author : Maureen Sprankle , Jim Hubbard

Format : Paperback 528 pages

Genre : Computer Science, Programming, Reference, Business, Amazon, Science
