Yeah, just okay. I worry about how durable some of these items are (Fabric Nesting Bowls, No-Sew Fabric Belt). Making them yourself, and if you're giving them as gifts, you want them to last a little bit. Somethings seem nonsensical - why, for instance, would I want to make/give/receive a cupcake pincushion that looks homemade (not handmade)? This book did inspire me to look up DIY Shrinky Dinks, so there's that...

Lots projects that require freezer paper. Not a fan of this book, the only pattern I'll be making note of is the fabric cans.

---

### **Dianna says**

This is a good book for someone that needs some creative inspiration. There are very few things in it that I would make as a gift for someone, but I'd make several for myself.

---

### **Carolien says**

Fun things to make, but uses a lot of high tech things. You can't use much from your stash.

3.5

Nice projects, nothing spectacular or different except squeezable pillows that look like food cans (why?) and a photo baseball . Good instructions with a key that includes skills required and level of difficulty.

### **Tracey says**

Adult nonfiction; crafts/low-sew. Cute ideas, but most of them rely on freezer paper- or other fancy printing/transferring techniques. As such, this craft book isn't going to be as accessible to readers who can't or don't want to "go there."

### **Emily says**

I thought this was a rather average craft books. Good ideas, but mostly things I had seen before. Lots of making "fabric" out of other things, which is getting to be trendy. Nothing really jumped out at me and said, "Wow! I want to make that!" but I did like the dishtowel slippers on page 37.

There are a few projects I might try... I guess the lesson I learned is that I just need to learn how to sew. Sometimes stuff looks cuter when you work harder for it.

I was really looking forward to checking out the projects in this book due to the cover. Yes, I do buy books based on the cover, don't you? However, I was just ok with this book. There were not any real projects in there that I have not seen before or even liked the way that they were presented.

I would have given this two stars but I do think the directions are very easy to follow especially because of the visuals.

More like Simply Sublime Waste of Paper.

Most of the projects are beyond basic and completely unoriginal - especially when you consider how many of these types of things you can find for free online these days anyway.

What's worse, though, is that some of the "ideas" aren't even safe IMO - like ironing plastic bags? Am I really the only one who thinks that might not be a good idea for so, so many reasons?

I borrowed this from the library - thankfully - and returned it pronto. NOPE!

Cute items, just need some time to try them! I'm still not sure about the ribbon belts with duct tape backing. It sounded reasonable when I saw it in the book but then when I went to the store to get the materials, it didn't seem right; the duct tape would be too wide and take too much cutting. Can't seem to find shrinky dink plastic anymore either. Oh well, I have lots of other projects to complete. Might try the potholder out of felted wool. That was cute and simple looking.

**AJ Conroy says**

Included three ideas I plan to try, and one neat idea - Iron-on vinyl

**Millie Bentley says**

I am always looking for new projects. I have the slippers cut out...need the foam to finish. Interesting ideas.

---

**Kiery says**

It was okay... For the most part I was not impressed. I was so excited to read this book and get some new ideas about sewing. It really was just blah. Nothing exciting other than obsession over iron-ons...

---

**Susan says**

Lots of printing into transfer paper. Cute ideas.
