A bolting bride!

Sylvie Thorne doesn't believe in happily-ever-after. Tormented by a tumultuous childhood, the struggling baker's certain she did the right thing running from her perfect-as-a-prince Boston blueblood fiancé, leaving not a glass slipper but a brief text behind. She just never expected him to follow her.

Dr. Andrew O'Shea wants closure. To get it, he'll implement a plan. Three weeks with Sylvie in his Jackson Hole rental. Lots of togetherness, a little dialogue—and no sex. Twenty-one days to prove they're from two different worlds. Instead, one kiss shows him what they have in common—blazing chemistry that never died. Now Andrew's in trouble. Instead of laying the past to rest, he's thinking of the future—with his former fiancée.

Sylvie had a terrible childhood. Abandoned by her father and then her mother, she did not believe in love or trust or security. She left a fiance in Boston and came to Jackson Hole and has created a new life for herself. She loved Andrew with all her heart, but Sylvie knew that they were two different people and things would never last.

Andrew has come to Jackson Hole to ask Sylvie why she left. One day she was gone and there was only a text. He needs closure. He loved her so much and he just wants to get the answer to why she could walk away and leave him and never look back.

This is a terrific story.

Sylvie has her baggage from her past and Andrew has his baggage as well. He is a doctor who loves his work. But, he is about to become the COO in the family business and give up medicine. Being a business executive is not his first choice but he feels it is something he must do.

Sylvie has a bakery business which has become a huge success in a short period of time. Her talent and passion has provided her with the opportunity to become a part of a community. She is unfamiliar with the concept but she is learning to give things a try.

The secondary characters add a great deal of texture to the story. The descriptions of Jackson Hole are so engaging the reader can almost smell the scent of pine. Ms Kirk has created a book which is a very satisfying read for anyone who loves romance.

This is a story of two people trying to find peace and serenity in their lives. It is also a story of trying to overcome heartbreak and continue to live. It is very well done.

I won this book in a contest. I am voluntarily writing this review. All opinions are my own.

Sylvie Thorne loves to bake. What she doesn't love is not having a family and thus explains--at least partially--why she runs when she overhears her fiance and his father arguing about her fitness to be his bride.

Andrew O'Shea is a doctor and heir to a Boston fortune. His parents expect him to head up the family business even though this means he'll have to stop doctoring, which is his passion.

First, however, he has to learn why Sylvie ran away. So he follows her to Jackson Hole and demands a three-week immersion, but no sex, so that he can go home satisfied that the woman he thought he loved he really doesn't. In the process, he also learns more about himself than he expected.
