## **Erin says**

The aliens are at it again! This time they're stealing underpants to help save Earth. Why? Because if Earth was gone, their supply of underpants would be gone as well! Hilarity.

Good for preschool and older kid storytimes.

---

## **Alastair Jamieson says**

'Aliens in Underpants Save the World' is primarily a picture book with a four line rhyme on each double page that narrates the story of a group of friendly aliens who save the world.

The first few pages introduce the aliens and their love of human underpants with wonderfully bright and expressive illustrations, as the aliens aim for earth on a 'pants-pinching mission'. However, their mission is interrupted as they see a huge meteorite heading towards earth. Fearful for their future supply of underpants, the aliens race to earth to collect and stitch together as many underpants as possible, in order to repel the meteorite back to space. Meanwhile, on earth, the fire engines, helicopters, police and other emergency services are helpless to prevent the disaster.

The story ends in success for the aliens and humans alike as the huge underpant-constructed shield saves the day and sends the meteorite hurtling back into space.

It is a brilliantly silly and humorous story that engages children, primarily due to it's size, as the book is quite large and the illustrations are drawn to cover each double page to the maximum. The rhyming dialogue also helps the story to flow and provokes excitement amongst the readers. There is also vocabulary relating to space with could be used in a lesson, for example universe, meteorite, spaceship, satellite and so on.

In summary 'Aliens in Underpants Save the World' is a fantastic book for children of a variety of ages, principally because of it's light-hearted story, illustrations and rhymes.

## **Holly Iman says**

The book, Aliens in Underpants Save the World, is in the science fiction genre and is intended for readers ages 5-8. The reading of the book was in E-book format. Aliens in Underpants Save the World is about aliens and how their underpants save the world. I gave the book a four star rating because the illustrations were drawn very creatively and colorful. The characters in the book are aliens and humans, which show different POV's. The use of language involves a rhyme scheme which makes the book fun to read. The book has a bit of silliness to it, which will make the young readers laugh. I believe the sense of humor in the book is a big factor in being appealing to children. Imaginary creature also seem to be amusing to young readers, so they will enjoy them being in the book. The theme is that hard work pays off, since the aliens worked hard to save the world. Aliens in Underpants Save the World would be a good book to read to a first grade class, and then using questions to ask at the end to evaluate the students' understanding of the story. The questions could be such as, "How did the aliens's underpants save the world?", or, "Have you ever worked very hard for something and it paid off?".

## **Kimberly says**

I give this book a 3 star rating.

This book is about how the aliens come and take all the undies on planet earth. This book is a spin off on Monster love underpants. This book tells the story of how the people on earth react too while the aliens come down.

Ways to use this in a classroom

- 1) Have students write what they would do if they had some something in the sky like a UFO
  - 2) Talk to students about Aliens
  - 3) Have a spinoff writing about Aliens coming for something else on Earth
  - 4) Have students write about how they would react if someone stole their underpants
- 

## **Hailey Mummert says**

Aliens in Underpants Save the World is a fun, engaging book for young kids to read to spark their imagination and interest in space. The book uses the silliness of aliens in underpants to draw the children in to engage them in the reading. The illustrations are vibrant and appealing to young children also, which adds to the engagement part. I liked how the book was really silly and showed aliens in a friendly manner of helping the world in surviving a meteorite. Even though this book is silly and completely fiction, it would be a fun book to introduce a space unit with, since it includes some space terminology which would help students connect the terminology to its meaning. I also really enjoy how the book rhymes and makes it flow easily together to make it a fun, silly read aloud book that could be used in any classroom.

## **Sophia Triad says**

I really did not like the moral of this story, since it is not nice to steal other people's underpants - even if you only do it in order to save them.

I am sure if the aliens asked nicely, everyone would offer them their elastic underwear without any fuss hahaha

Anyway the illustrations are cute and my six years old son does not seem to share my concerns LOL

## **Mehsi says**

I have read a few other books in this series, and when I needed a sci-fi book for a challenge I knew I had to go for a book from this series.

In this one the world is threatened by meteorite! Oh noes! The world goes in panic, but thankfully there are aliens.. though there reasons for saving the world are less than pure (they don't want their supply of

underwear to run out). :P

I quite loved the idea that the aliens had. Plus it was hilarious (boing boing). They sacrificed quite a few of their underwear to save the world, that doesn't only take creativity, but also some of their precious wares.

The ending was also nice, indeed, we should be very thankful of the aliens. They did all that for us! They can steal a few of our underpants.

I did like the beginning/end pages before the story starts. They are filled with all sorts of underpants. From zebra to dots, from red to yellow.

The illustrations are pretty great, they are fun and fit the story to a t. But then again, I already knew that, that is one of the reasons why I keep reading the books in this series. :)

All in all, recommended if you want some silly, hilarious, alien adventures!

### **Glen says**

A meteor is going to hit the Earth, and only aliens can save us. They do it to keep their underpants supply functioning.

Kids might like it if they are the right age.

---

### **Erin says**

Very cute book! I read it to my son & loved the way it flowed to keep him interested. I loved the artwork the best... Especially the alien in the bloomers.

Even years later we are still reading this one. I believe we've read it half a dozen times in the last month.

### **Sarah Walsh says**

This is a zany, rhyming, adventure story of how aliens from outer space help us save our world, all in the name of underpants. The story begins to unfold in space. As the aliens are on route to Earth to steal some underpants, they see a meteorite heading for the planet and in fear of not getting any underpants forever more they muster a plan to save the earth using giant underpants.

This book is a hilarious read for any key stage one class. It's really helpful for counting as there are loads of underpants on each page which we can count. It's also quite useful in reception for identifying shapes and colours. It's a good entry point for introducing children to the idea of space. The book has some difficult words which children would otherwise not attempt, meteorite, satellite, or scientists for example and as this book is packed with fun children attempt to read these.

The rhyming pattern in the story makes it a great read aloud book but can also lend itself to drama. Our year

one class made their own aliens with underpants in art class and we used these aliens to re-enact the story. Children's imaginations are stimulated by this story and the fantastic real life illustrations offer excellent opportunities for speaking and listening activities. Overall a cheeky, hilarious story complemented by lively, exciting illustrations.

### **Susan says**

Top notch underwear book!

---

### **Nicola says**

Miss 4 loves this series! We are working our way through them. She also remembers now that the books normally end with a little alien hiding and staying behind on Earth.

Miss 4 and I like to explore different books and authors at the library, sometimes around particular topics or themes. We try to get different ones out every week or so; it's fun for both of us to have the variety and to look at a mix of new & favourite authors.

---

### **Kelly says**

Very, very colorful, and very silly! I loved the way this book moved right along. It's very fun.

---

### **Azra Hodzic says**

What kids don't get a kick out of talking about underpants? I read this to a group of preschoolers, and it is now their absolute favorite book. Soon as you open the book on the inside cover there is two pages of nothing but different types of underwear. The kids all like to point at which one will be their pair of underpants. We are usually stuck there for a few minutes, so everyone can pick the ones that they like and then we can finally move on and read the story. A hilarious story about aliens that love to wear underwear. They save Earth from a meteor by sewing together all the underpants that they found on earth and bouncing it back into outer space. It is a really silly story that can be read anytime. It can also be used to talk about space (meteor) and I even used it to talk about hygiene (we all have to wear underwear).

---

### **Vicki says**

Another of the cutest books ever!
