### **Dee Cherry says**

This series is one that regardless of the reading time elapsed between books, I can always remember the previous & pick up where I left off--due to the memorable characters & great storyline... The girls have each found loves that's proving to be detrimental to their well being...Star, Vic & Tricey are dealing with circumstances that seems to have gone beyond their control. Not much mention of Lyric--which was fine because she's my least favorite character...Overall this series continues to remain one of my favs as I look forward to reading the next part--Bang

In book seven of the Femistry series, Love Drug by Jessica N. Watkins, roles have changed and consequences have been put into place. Tricey is a mother who always has her daughter's best interest at heart. Tricey's problem is that she has become comfortable with being taken care of, but don't get me wrong, she is loyal to a point to her man. When Tricey's past enters the picture and starts making demands, Tricey is forced to make a decision.

Victoria is caught off guard when Vince breaks up with her and she is determined to move on. Victoria's heart is aching but she will not let anything stand in her way of happiness. Victoria soon finds a new hobby that helps her take her mind off of her break up and old habits.

Star is holding her own while serving a 15 year sentence in a women's prison. Star is a survivor and uses her art of seduction to stay ahead. Star soon realizes that life on the inside is not all that different than life on the outside. When Star finds herself in a new predicament, she will have to think fast to make sure her secret is kept.

Love Drug, like the others in this series, was entertaining, suspenseful and drama filled. These characters seem to be drawn to nothing but trouble and it is a thrill to read. The author has done a wonderful job helping readers connect with the characters. This book did have some minor grammatical errors, but this did not take away from the story. I look forward to the next book.
