a bit of a struggle with the book. Quite dry.

Only four stars because I think one must be a student of A Course in Miracles for this book to be its most helpful. I liked it and will keep it and will order more books by Singh, but I have been a Course student for the past 17 years and so really appreciate the enlightened view of those who live and understand the Course as well as someone like Singh did.

Going through the Non-Fiction on my shelf, It was interesting enough to hold on to, but it's been so long I don't remember the details.
