A fun, quick read... he's a nerdy bird lover and she's an artist - together they find an easy friendship and turn it into more!

I read this novella and the follow on story Almost in Love. I thoroughly enjoyed both books but felt that they could have easily been combined into the one story. However, I didn't like how the main female character treated the main male character. She quickly friend zoned him and didn't give him a chance until he looked and acted like the stud that she wanted. I understand that some females do this in real life but it turned out to be a main theme throughout both novellas. Despite this, it was still an enjoyable read.

I give Almost Dating by Kylie Gilmore Five Stars. This is book .5 of the Clover Park Studs series. If you love romantic comedies that will have you laughing out loud at every turn you will love this book. This is a very quick read and is very well written. Kylie will have you hooked on the characters immediately and you will be rooting for them in the end.

Barry Furnukle is a computer genius who has decided to try his hands at having a frozen yogurt business. Barry is pleasantly surprised when he gets a look at his new neighbor Amber Lewis. It was lust at first sight for Barry and he immediately felt the need to get to know her on a personal level.

Amber Lewis is an artist with pink hair that has a thing for bad boys. When she meets her new geeky neighbor Barry she immediately thinks he is going to be a great friend to hang out with and nothing else. Barry however has other plans for them and he can be very persistent. Well Amber keep falling for the bad boy types that keep breaking her heart? Or will Barry be able to prove to her that geeky men like himself can be as exciting as the bad boy type.

An alright short story. I'm not sure the characters or storyline is developed enough for me to continue the story, overall a good taster if the series and had a couple of funny moments.

I am just not a fan of the male role having to look a certain way for the female lead to notice him. Would've been good if the geek was a geek who grew on the woman. Too much emphasis on his physique and not enough on his personality for my liking.

REVIEW: This little novella is the beginning to a new series by Kylie Gilmore. I found it to be a fun read. It's basically a Geek falls for the Artist neighbor story. I found it to be a great start to this series and I have already purchased the next installment.

This one falls under the 'Perfect Lunchtime Read' category for me. It's a fast, fun read!

ARC read in exchange for honest review.

By all means, unleash the stud!!! Kylie Gilmore's newest addition to the Clover Park gang may be the hottest yet. In this prequel and novel, we get reacquainted with Barry Furnukle, he of the dancing cow we met in the previous novel, *Bad Taste in Men*. Who knew what hotness was lurking just below his geeky surface? Certainly not Amber Lewis, his pink-haired, bad-boy lovin' next door neighbor. As far as Amber is concerned, Barry is "just friends" material: perfect for watching cheesy zombie movies with, but definitely not for dating. Barry, however, is nothing if not persistent. He pulls out all the stops to prove he's every bit as exciting as those biker types Amber seems drawn to. Hey, none of them became a pirate for her, did they?

Gilmore once again pulls the reader in with two wonderfully relatable lead characters, and then ramps up the sexual heat between them until it's just about necessary to fan yourself. Further, she surrounds them with a vibrant supporting cast chock full of hilarious antics as well as a few surprises. In fact, for me, the supporting casts Ms. Gilmore creates in her novels is as big a draw as her protagonists. There are no boring, cookie-cutter characters to be found in Clover Park.

And to think, Barry is just the first stud she's unleashing for us. I can't wait to meet the rest.

I thoroughly enjoyed this book. It was such an amazing beautiful romance.

When a single Frozen yogurt supplier, Barry Furnukle is happily surprised to meet his fellow artist, neighbour, Amber Lewis.

Sweet Barry thinks that Amber is gorgeous and deserves a much better man than she does now, maybe even himself. I enjoyed this book so much. Such a wonderful read!!
