Hulya Kara Yuksel says

Words will only fail me but still I'll try to express my feelings. ? This book, no actually this series are brilliant. I'm seriously in love Roarke & Eve. Their love is just so beautiful. ♥♥♥♥

I highly recommend this series to you! Trust me, you have to meet with Roarke. ?

He moved through the dark, quiet as a shadow. The bed shifted slightly as he sat beside her, found her hand. "Do you want the light?"

"No." Her voice felt rusty, but she didn't bother to clear it. "No, I don't want anything. You didn't have to stay here, in the dark."

"Did you think I'd let you wake alone?" He brought her hand to his lips. "You're not alone."

Jilly says

Aww, finally some answers as to why the delicious MY book-boyfriend, Roarke, loves Eve so much.

"Can I watch while you hit him? You know how it excites me to see you pound on someone."

....

He knew there was nothing, nothing more arousing than the surrender of a strong woman, that melted-bone yielding of a tough body.

....

"When we get home," he began as they walked down to street level, "you can... reprimand me."

"Keep your mind off sex."

"Why? It's so happy there."

Oh, yeah. He likes strong women. I totally support his taste.

We can produce another human inside of our bodies. That is one helluva superpower.

The crime in this book has to do with illegal organ harvesting. Someone is stealing diseased organs from the homeless and the hookers. They needed those things!

Unfortunately for Eve, the person or people responsible are willing to do anything to stop her investigation. She goes through the wringer with this one and it shows us another side to her and another side to her relationship with Roarke. And, although there were a little too many *feelings* in this book for me, I still really loved the new dimensions that they brought to the characters. It was definitely one of the best books of the

series, so far.

Alex says

This one kicked me right in the teeth. I am so invested in these characters, and this was the book that almost broke Eve, and the way that is written? Holy. Just holy mother of gut punchers. Every character comes to bat in this one for Eve and that alone had me squeezing the life out of the book. And then you have Roarke and you have his relationship with Eve and the combination of what he's thinking up against what he knows he has to do for her? This has to be one of the most interesting and developed love stories in modern romance right now. It's just...I'm never bored.

Do you get that? I have yet to be bored.

The mystery in this one is so intense. Here we have conspiracy and cover up. We've got possible dirty cops and dirty politicians and we've got cops retiring early and we've got doctors with miraculous hands doing bad things. And then there's a certain police officer gunning for Eve. The hysteria and the media over secrets and lies. This book never stopped. Things kept unraveling and happening plot-wise just as characters are breaking and changing and putting themselves on the line for each other.

Even Summerset cared.

Books like this coming up 8 books into a series makes me realize just how possible it is to continue to tell a story this well.

Lizzy says

Sorry fans of the *In Death* series. After more than a handful, the stories become somewhat repetitive and predictable. J.D. Robb's *Conspiracy in Death* is still an entertaining read. But I can't imagine myself reading 40-plus books with these same characters and revolving around its basic formula. 3 stars.

♥Sharon♥ says

I am so annoyed with myself that I cannot seem to find the time to write a proper review for a book that I LOVED. I'm so disorganized and feel as though all I am doing is chasing my tail. UGHHH

This series continues to be amazing. The characters grow and change in ways I hadn't expected which only makes the story telling that much better.

In this one it was things that happened to Eve that broke my heart. And as much as Roarke has that magic touch, those perfect words, it wasn't something that he could fix for her.

♥ Roarke

♥ Eve

♥ Peabody
♥ McNab
♥ Feeney
♥ Mira
♥ Galahad

Al *the serial series skipper* says

This is one of the best ones yet from this series. I was a mess reading this, I love Eve and to see her, not as the superwoman she always is but as a person was one of the finer points of reading this.

Roarke was mag, as always.

Mo says

My only complaint about these books is that we don't get enough Eve and Roarke time. I know, I know she is bogged down in the investigations. Saying that, when they do get together, things are pretty steamy.

The bodies are piling up. In her research Eve uncovers similar crimes in several cities that were dropped under mysterious circumstances, Dallas knows she's facing a killer cruel enough to prey on the weakest in society and powerful enough to conspire an extensive coverup. To complicate matters further, Dallas faces an equally troubling threat to her career when she's linked to the death of a fellow cop.

**"Lieutenant." Ireland whispered, silky and romantic, in his voice.
"An unexpected pleasure."**

Roarke. Not sure what to say. He seems perfect to me. His patience and love with Eve is wonderful and she is slowly thawing and realizing that she is worthy of his love and devotion.

**"Was he wearing a tux?"
Peabody had seen Roarke in a tux. The image of it was etched on her mind like acid on glass.
"Man" Peabody closed her eyes ... "Man." she repeated.**

"You know a lot of women would get pissed off at having their husband star in their aide's purient little fantasies."

"But you're bigger than that, Lieutenant. I like that about you."

I love Eve but I love Peabody too. Great partnership they have.

**"I never saw much snow as a boy.
Dublin's for rain."**

But someone is not happy with Eve's progress with the investigations and she needs to be stopped.

As she stood pale as death in the pale winter light, her eyes glazed, dark, and, he thought, impossibly young. The strength, the tough edge she wore as naturally as her weapon, was gone.

"What I have with you, darling Eve, I never thought to have with anyone. Never thought to want it or to need it."

Time to decide if I will continue with this series or take a wee break. Decisions, decisions.

Tina says

This is the 8th in the In Death series.

It is early winter right after the New Year 2059 and Eve is called to the murder scene of a sidewalk sleeper. Wondering why "homicide lite" simply doesn't handle the case, Eve quickly learns the reason why. The old homeless man who was murdered had his heart neatly, surgically removed.

At the crime scene Eve bumps heads with a troublemaker cop who has been jealous of Eve since the academy days when Eve, even then, was a star on the fast track.

In the course of the investigation Eve finds other indigents whose organs have been neatly harvested. Deciding that only an experienced surgeon could have the magic hands to do such work, Eve begins to shake

up the medical community.

In the meantime, the jealous cop starts spewing hate at Eve and files complaints managing to get Eve suspended. Working outside the system, Eve still manages to close the case.

This is one of my very favorite of the series strongly because of the middle part of the book when Eve gets suspended. In the previous 7 books, Robb has painstakingly drawn a portrait of Eve as a cop. It isn't just what she does, it is what she *is*. Her identity is so tangled up with her shield and her gun it begs the question what happens to Eve if she loses them?

The scenes/chapters following Eve's loss of her badge are quite heart wrenching. It is so sad to see such a kick ass character like Eve brought so low and made to feel so lost. She even *apologizes* to Summerset instead of engaging him in one of their normal nasty biting arguments. This course of events horrifies the butler so much he's beside himself.

Roarke is, as usual, swoon worthy. First as a concerned spouse and then as the person who kicks her in the ass and tells her to stop feeling sorry for herself. Also, he is so ready to go and beat up people on her behalf just because they made her cry, that I kinda wished Robb had put a scene in there where Roarke and his army of lawyers go and scare the beejeesus out of the brass of the NYPSD.

Other reasons why I love this installment:

- 1) Trueheart! We are introduced to another new recurring character, the sweet, innocent rookie Troy Trueheart. In later books he also becomes a member of Eve's inner circle.
- 2) Peabody and Charles the LC are dating. Charles has been in several previous books mainly as a witness, but now he is playing a more social role. I picture him looking like George Clooney.
- 3) We see more of Baxter, the womanizing, fun loving cop who is smarter than he seems. Too bad Baxter was the only one Roarke could take his frustrations out on. I picture baxter looking like Alec Baldwin.
- 4) Introduction of Webster, the IAB cop who has long had a thing for Eve. He shows up in later books as well.
- 5) Introduction of Louise Dimatto, she also shows up in several later books as well.

Val...Shameless.Skanky.B*tchy. says

Love, Love, Love...

This one is one of my favorite from the series so far, I think.

Eve really got put through the wringer in this one and it was cool to see Roarke and all her friends close ranks around her.

Jonetta says

I love the In Death series but this story is special. You see Eve Dallas as never before. It's gut wrenching, emotional and embodies everything that sets this series apart.

This is my #1 favorite of all the books.

Phrynne says

Every book in the In Death series is a five star read for me but this one is something special. So much raw emotion - Eve and I blubbered through a large part of it! Roarke comes through as the world's number one guy being everything Eve needs exactly when she needs it. And then there are all of Eve's friends and colleagues standing up for her when she is down.

This book brings together everything that is enjoyable in this series, a great story, effective police work, strong characters, a delightful romance, funny dialogue and many really emotional moments. Definitely one of my top favourites in one of my top favourite series!!!

Alex ? says

Suspense 5 stars / Romance 4.5 stars

Damn, it was intense! What could I add to my previous statement, that I love and admire Eve's mind?
This woman is Goddess!

Romance. For the 1st time since starting this series, I liked Roarke. I could feel his love and devotion and I was deeply touched how he cared for his wife.

Eve had one of the most painful experiences in her career.

God, I can't stop to admire this woman. She was strong even when she was broken.

Respect!

Irene Sim says

A very emotional installment to the series.

Eve tries to act all tough but her opponent this time is a cunning one and manages to almost bring her to her knees. It is amazing how after just one year with Roarke, she changed so much that depending upon him isn't such a burden for her any more. And depend she does. All her friends gather around her in a big hug to support her and keep her spirit up.

I love how this series's getting better and better with every new story. And maybe the mysteries aren't all great every time-even though this one was very complicated and had me guessing till the end-the characters and excellent writing make up for it.

Cyndi says

I shudder to think what kind of searches my computer would take if it worked with voice commands like Eve's does.

Reread June 2018 — In this book we meet my favorite doctor in literature, Louis DeMato. Someone is stealing organs from homeless people, and killing them while doing it. Eve deals with the rich and powerful while standing up for the poor and homeless.

Kristen says

Huge 5 Stars

My favorite in the series thus far. I loved this book.
