From Reader Review Mystery Spring Fling for online ebook

Dawn says

I wanted to like this book based on the story but something about Gin just annoyed the hell out of me. The story seemed rushed and it was way too predictable. Not sure how I feel about reading sequels.

Debra Kelly says

Awesome!

Such an amazing assortment of books. I feel fortunate to have gotten my hands on this amazing collection. It took me so long to read them because after I read each book I had to read others by the same author- as a lot of these books are the first I

in a series. I loved them all and now have some incredible new series I'm addicted to :-)

Kris Hinderscheid says

Some cute summer reads.

Margaret V Gee says

Mostly good mysteries

this collection was an enjoyable read. most of the books I enjoyed thoroughly. I skipped one that I just couldn't get into.

Kflo says

Being a boxed set, some stories I have enjoyef more than others but ovetall a great set for summer reading.

Lisa Eirene says

I bought this because the reviews were pretty good and it was only 99 cents on amazon. I thought, what a good deal--10 books for a dollar! But the book is garbage. The first story was intolerable. I hated the characters, hated the writing, was bored out of my mind and book 2 wasn't much better.

Worst kindle purchase thus far.

Beth Perry says

the set was worth it for gemma halliday alone. I've read 3 of the other titles and they were enjoyable but flawed. I would try these authors again.

Sue says

too much swearing and many were too explicit.

Bethny Coates says

I enjoyed these books. I've read many books from these authors and I loved every minute of it. I did skip one or two stories I had already read. But it was worth the 99 cents.
