Jerry says

It's late, so, I'll just say that this is more of the same as the previous volume...in both good and bad ways.

Nancy says

There's just something about a giant chicken that makes a manga very difficult to take seriously....

Lord says

Not exactly the most interesting volume with a long lasting flashback into the past of the japanese born giant chicken (uhhh) and prince Seeu but interesting enough to continue reading. I still expect better things to come from this series.

Holly Letson says

It's really unbelievable that everyone becomes infected after breathing the air for 15 minutes, and eventually dies. Take as a chicken was the only good part of this volume.

Lauren says

One of my favorite manga series.

Vicky says

Planet Ladder is a quirky manga series, it has some really interesting concepts, some great characters, and a good mix of humor and seriousness.

The ending, however, failed for me. It got... weird, for lack of a better word.

Lexie says

THE MAD PRINCE BECKONS...but he's super young and adorable if weird.

This is an information heavy volume, even beyond volume 2 with Bambi's stuff. Also GODS DAMMIT

BAMBI YOU ARE WHY WE CAN'T HAVE NICE THINGS.

UGH

Welcome to new cast member Waseda, a giant Robot Chicken from the late Taisho period. He gives us a long, sad tale about what happened to Asu - or at least the residents of the planet as well as a very good reason as to why Seeu really isn't great with goodbyes, people or communicating.

Horrifying disease that I very well remember giving me nightmares as a senior in high school. Hell they may give me nightmares now.

Kaguya finds confidence though and is off to face the wiz--er well Kuro, a dictator in Geo who is the bearer of Nox Light*. He's a former comrade (or sorts) of Seeu, Kagami, Ragunahaan* and Idou.

Also a grade A asshole.

SHOULD BE FUN GUYS.

(*So the translation here changes in three places from books 1&2 - Idou is now the bearer of Zenith Crystal not Zenith Crio, Lagunahaan is now Ragunahaan and Nukeslight is now Nox Light. It's slightly confusing since this is Gabi Blumberg's last volume translating so I'm wondering if because that's how the new translator for 4&5 Nan Rymer spelled them? I don't have the old SMILE magazines the chapters originally ran in to compare against to see if they changed it between chapter and collection, nor do I know which translation is truer. Two more translators for this series sign on with only one other change I see - Gavies Ebira becomes Gaviella somewhere between 4 and 5/6)
