Affliction Adrienne Lecter

Something is rotten in the state of California...

The dawning civil war has ended in a truce. Scavengers and traders all over the country are settling down for the long, hard winter to come. With their new camp outside the maze of New Angeles at the coast growing every day, Bree, Nate, and the gang have their hands full—yet something is not quite right. Maybe one last run before the winter is all that's needed to cure that itch. What could possibly go wrong?

Civil war ended? Animosity still festering in the world between towns people, military and scavengers. But that's not the only thing festering.

This is one of the most brutal and amazing Zombie series I've ever read.

Bree is one badass nerdy chick. Green Fields never disappoints.

I'm so glad that I decided to continue with this series. It's definitely still as good as it started out to be and I'm ready for the next one!! I didn't like Bucky before and I certainly don't like him now after his mind control experiment!! I was feeling the pain right along with Bree during her surgery and I feel for her. Now she's walking again...minus some fingers and toes....and ready for the next challenge. What trouble will they find in Europe?? Guess I'm gonna have to read on to find out.

Exciting! Intriguing! Worth every page

I have been reading of the books and enjoyed every page, exciting, helpful and intriguing love the pot plot lines and look forward to the adventures of the main characters, so glad none of my favourites have been passed away, look forward to the next books and the exciting series

Really good can't wait for the next in the series..

A few things I didn't see coming in this book.
Loving the story and the writing.

Terra says

One of the best zombie series I've read!!

I enjoy this series very much, and I'm super happy Adrienne plans to keep writing more. The heroine is snarky and sarcastic (just like me!), all the action scenes are well written, and the science makes everything feel very real. This is one of the better zombie series out there and I think more people need to know about it.

Alexander Smith says

I must be a sick minded person....

Once again Adrienne wrote an amazing book. I honestly thought it was a little tame compared to some of her other books. I can't wait for the next book.

Stephen says

Once again Lecter provides readers with a wonderfully engrossing page turner. Following the exploits and failures of Bree Lewis gives those reading plenty of ups and downs and the occasional, "What?" Lecter seems to have picked up a seriously interesting habit of including Bree's expository thought processes and that may seem a bit off-putting to some readers. If you can push past those passages, you are gifted with great snark and sarcasm.

Candace Shreve says

Thank you one again Mrs. Lecter

Never one to disappoint, Adrienne Lecter is a GOD writing zombie apocalypse stories. Affliction definitely has a twist and turn that simply I didn't see coming. I have never been so in love with someone's style of writing in my life. I can't wait to see what Europe has in store. I must say I did miss Andrej and the ice queen but I'm glad we didn't lose Bree which is where I thought we were heading. Anyway thank you for another amazing book. Still waiting on news about my TV series!!

I wish there was more than 5 stars. And also wish there were real Nates and Brees in this world. Your story writing is beyond entertaining. I have been up until 2am for 3 nights because I could not stop reading until my eyes felt like Bree's. You are an awesome talented writer and I cannot wait until the next book is written and released.

Anjelica says

Great series, cant wait for the next book

I've read all the books in this series and cant seem to get enough. I love how real the characters feel, and the way she writes makes me feel like I'm part of the group struggling to survive apocalypse. Thank you for writing these books I will keep reading!!

Vilma says

I feel like every time I review one of the books from this series I am just repeating myself because all I can say is how good the books are. This series has taken me and made me a total addict. I cannot wait for the next book to come out! This one was surprisingly gory specially for Bree. I wasn't expecting it but that is what makes them great - expect the unexpected!

The author has a way of communicating what Bree is feeling that puts you on high alert. I swear it's like watching a movie. Seriously great!

LAURA MAGUIRE says

A good book, cliffhangers, Nate is a nobody now

Book 7 in the series.... I love the series!!! As the books progress you seem to lose touch with Nate and Bree, the equally strong and independent leads are mere shadows. Bree is always in need of her knight in shining armour, and Nate's role is a little more than a background figure. What I always loved about the characters was the family feel, that Nate and Bree were equals and relied on each other. Now it's all about Bree and her struggles, her inner monologue, her leadership, her better than everyone and her lack of feelings and love for Nate. He has been reduced to a background character :(

Connie Nealy says

Book 7

I did not believe this series could get any better but it does. The ongoing saga of Bree and Nate. Bree is slowly dying and has to turn to the last people she wants to for help. Of course Nate will do whatever it takes to save her. This last book is even more thought provoking than the last. Must read!!

Jennifer Murphy says

Awesome Zombie Apocalypse Series!

I can't tell you how happy I am that Adrienne Lester decided not to stop the series after book 6. Seeing book 7 come out was almost as great as finding out that the Green Fields series will now contain 10 books. Now I just have to sit here and wait anxiously for the next installment! I hope it comes out soon.

Nikki says

I love Bree and Nate they are two of my favorite people. I love reading them but it always makes me sad when I finish them
