Review:

"Can't Stop Lovin' You" by Lynnette Austin was another sweet contemporary romance that seems like all this author is able to do in all her beautifully written 'Maverick Junction' series. In this series number three, the story was of Brawley and Maggie. Brawley had left town to attend college in Dallas and leaving his girlfriend so that she would go and achieve her career that she loved that involved designing her fashions. But was that the right move for Brawley to leave because after he leaves we find from the read that Maggie has discovered she is...well I don't want to spoil it for you so you will have to read to find this out. Now, Brawley has returned to his hometown of 'Maverick Junction' and he seems to want to pick up where he left off with Mag. However, it had been ten years and Maggie has moved on with her life now planning to move to a new life with her fashion career in New York. Brawley is back in town to 'take over old Doc Gibson's vet practice' since his retirement. What happens when the table is turned for Brawley now that Maggie leaves for New York? What will happen as these two go back and forth with many twist and turns that will leave you wondering will they be able to talk and come to the right decision on whether they will be able to forgive each other in the 'heart wrenching' story. In the end this author gives the reader a interesting story all the way to the end . "Can't Stop Lovin' You" is the third in this series and can be read as a stand alone but to really understand the whole story in this town of 'Maverick Junction' I would recommend that you read series 1 and 2 also. You will find all three a beautiful romantic read!

A great second chance at love story, this third installment in the Maverick Junction series doesn't disappoint. This one could stand alone well, but now that I have read books 2 and 3, I will go back for book 1 and watch for more. The lead and secondary characters were so carefully drawn, it was easy to see them, and I want to live in that quirky Texas town! This was the perfect book for my rainy day by the fireplace; a sweet, heart-warming love story.

Maverick Junction is the place everyone tries to walk away from, but just can't live without. Lynnette Austin

takes a sugary sentiment and makes it her own. Can't Stop Lovin' You runs away with an old fashioned adage we all know and love, but do everything we can to ignore. Through sentiment, valuable lessons and heartwarming characters, Ms. Austin proves that home is more than a place, it's the people that make this life worthwhile.

Brawley loved Maggie. He loved her for a long time. Ten years ago he thought he did the right thing by breaking off their relationship as a way to encourage her to follow her dream of becoming a big designer. Now Brawley came back to their small hometown hoping he could start again with the only woman he loved; but as he moves home and buys the vet practice he finds out Maggie is moving to NYC.

Brawley, the name just invokes handsome, strong cowboy to me. He is a loving son and a dedicated friend. He is someone I would like to be around. I found his career as a vet to be perfect to his personality. He could be tough and gentle. I found his undying love for Maggie romantic and I believe that he felt he did what was right ten years ago. Sometimes I couldn't believe how patient he was with her, even when she was beyond rude. The perfect example of his character could be summed up in his interaction with his dog Marvin.

I loved the fire of independence that made up Maggie. She always wanted to design clothes that women would want to wear. She created her own little niche in her small town and luck found her when she designed a dress for an influential friend. It was also her love of family and friends that spoke to my heart. She was devoted to her grandfather, parents and all her friends in town.

This book is third in the author's Maverick Junction series. I have not read the other two but I am intrigued and will put them on my TBR pile. I received this book from the publisher via NetGalley for my honest review.

Don't you HATE when you read the third book in a series and enjoy it SO MUCH, that you know that NOW, you have to add the first two to that LONG TBR list that you have...I know...I know. That's how I feel after reading CAN'T STOP LOVIN YOU by Lynnette Austin. I loved the writing, the characters, the plotline and build-up of drama. And Brawley...you just can't go wrong with Brawley Odell.

I also thought the heroine Maggie was awesome! Who doesn't love a fiery tempered Red-Head! Maggie and Brawley's chemistry was spot on from page one, and it burned hotter and hotter where you wanted to duck for all the sparks that were flyin around!

This is a closed-bedroom door love making, for my ladies who might be wondering, but it was pure fun all around! Emotional, heart-breaking, but plain ole' good!

Fans of Jane Graves and Lori Wilde will enjoy Lynnette Austin's Maverick Junction Series.

DEFINITELY IMPRESSED- SUPERB STORY, COMPELLING CHARACTERS, AND ANOTHER HIT FOR MAVERICK JUNCTION. I've read too many books to put up with anything short of excellence and that's why Can't Stop Loving You by Lynnette Austin was SUCH a delight! Austin's style hooks the reader immediately with the action "in medias res" at its best! The obstacle of Brawley moving back to Maverick Junction and Maggie about to move out looms large, and the plot flows smoothly into the further complications all romance plots seem to have. And yet, these characters' dilemma keep the reader off-balance to the point where this latest Maverick Junction novel seems to be no typical read--since no typical solution seems predictable for the pair. Clearly, Austin's most recent release-- is her best to date. The mingling of personal and professional issues in Maggie's life, mirrors one of the most pressing of contemporary issues facing women today; how to "have it all." It is a tribute to this author's craft that she has so successfully given us another lively pair of lovers, who continue to bring Maverick Junction alive for it's fans. I'm hoping there's going to be a 4th in the series, Ms. Austin...Your public awaits!

The author took me to Maverick Junction, Texas...I peeked into the lives of Brawley and Maggie if only for a moment in time. I saw their love and I felt their heartache...I was part of their family as well. Loved the book and its story. Looking forward to returning to Maverick Junction again, can't wait to see what happens next...

I love me some cowboys and I especially loved Brawley he was just a passionate person, "come upstairs with me. Stay the night." He trailed kisses along her neck, her collarbone. She shivered, and he knew she was close." He's a smarta\*\*, "lot of weight behind him. Left a bruise. No big deal." He waggled his brows. "On the other hand, maybe it does hurt some. Want to kiss it? Make it all better?" He gives the best compliments, "wouldn't think of it." He patted her bare bottom and rested his chin on the top of her head. "God, you smell good." Brawley has a way of making Maggie forget her thoughts, "the truth?" Pants on and zipped, button still undone, he faced her squarely. Staring at those rock-hard abs, that amazing six-pack, she almost forgot the question."

Brawley Odell thought he was giving her the world but all he was giving her was a lifetime of hurt, by cutting her loose her senior. You see Maggie Sullivan and he were boyfriend and girlfriend since Jr. High. He, Cash and Maggie were also grade school friends so she was always there and he thought she always would be. But he thought wrong.

Then came time for him to leave for college and she was a senior in high school. They knew they could make it work him coming home on weekends. He came home to her one weekend and holidays for as long as he could until this one weekend when he called and said he would come on a Friday night instead. She prepared and when he got there he didn't even come in. At the door he broke up with her, telling her that it was for the best and that his mind was made up. No amount of talking was going to change his mind and no questions asked his way and no other way about. Done and over.

Maggie was a basket case. Her parents were gone for three days thank goodness so she was able to just cry her eyes out that day. Cash came over to help her cry it out and get her to eat. Brawley of all people called her. She was devastated to say the least. She cried her tears, hardened her heart, and opened her clothing & design store. She never went on to design school but she never gave up her dreams of going to New York City. Brawley on the other hand went on to Dallas after college worked as a Vet for the rich and pampered. Then comes home once Doc retires and a Vet is need back home. He didn't want to push his mentor out. Plus he really wanted to try and win Maggie back he missed her.

At this point my thought was really dude? You dump this chick, you don't give her a reason, and you don't come back after college not even after a reasonable amount of time for her to have finished college. She sees and knows you dated a Dallas cheerleader and such. You think you can just swoop in? I don't think so, I was partly right, Maggie was no push over. When Cash's wife Annie wears one of her beautiful dresses she created she was able to begin her dreams of going to New York just a month after Brawley got home. I really enjoyed this book and highly recommend it. The sexual tension, the bantering, friendships, the family saga and country spirit make so worth the read. But the emotional conflict between Maggie and Brawley and the secret that is between them and once they have to face it on top of the death of a good friend is just heart wrenching. My only regret is that there was not prologue that was there with all the characters telling you

who was who so that people like me who was new to the series knew what was happening with references were made at certain points.

5 stars for sure. Provided by netgalley.

This story was sooo sweet. Something I really like in the books/movies/shows I take in is when I can't figure out how things will resolve. Oh I knew they'd get together in the end, which is okay - that's a given, but I didn't want either of them to give up what they'd worked so hard to achieve.

Yeah, I was mad at Brawley. He thought he was doing the right thing, and he probably was - but at 18 who really makes the right moves? And he didn't have all the info he should've. That's all on Mags. Again, she didn't know how to disseminate, and how could she? it was just a big ol' mess.

So when Brawley comes back to settle in their home town, it's not a shock that Maggie isn't sitting around waiting to get back together with him. She's about ready to embark on a new life in New York - and that means she'll be thousands of miles away from him.

The irony is that he left her for the big city all those years ago, and now the tables are turned. He's never stopped loving her though, and even though she totally deserves the derision she sends his way, he figures there's some love left for him as well.

But he has to let her live her dream. It's the fair thing to do. And he feels compelled to support her and let her know how much he cares. Even if she keeps throwing it back in his face. Maybe they can even be friends.

Y'know, for about half of this book I just wanted to kick Brawley in the nuts - but then I wanted to maybe hand him an ice pack to fix it. Such mixed emotions for the guy, so I totally got how Maggie felt about him.

And I felt pride when Maggie went off to New York and lived out her dream. Some worrisome things happen there, but nothing to get worked up about (at least for the reader - Brawley's a different matter).

Some heartwrenching stuff happens to turn things around, and decisions get rethought - I wasn't shocked at how things turned out, but it wasn't totally predictable either.

I hadn't read the first two books, but this one was fabulous enough that I'm going to go back and find them.

## **books are love says**

Love Brawley. I know many at first will find him to be arrogant and not deserving of a second chance. But I don't. We see that him and Maggie have a past in previous books. We know her side but not his. Here we get to see his side. We see that it was more complicated than it appeared. Brawley made a error. He was 19 and took life by the horns thinking that he knew what was right and what would work. Little did he know life

would get in the way. Now he is back and still in love with Maggie. He is a good man and is trying to get her to see that he made a mistake.

Maggie though is carrying some serious anger. I know he hurt her but it was over 10 years ago. Not only that what she is most angry about she can't blame him because he was in the dark on so much. She left him in the dark. Is she a good character and person? Yes. She is also feisty and strong willed. She is about to embark on her dream. A dream that will change her life forever. Maggie you can tell still loves Brawley but is angry. So very angry and liking him makes her angrier. She is carry a grudge and letting it take over. she doesn't see who Brawley has become or that he is a good guy. She doesn't see that he is always there for her. He is there for his friends as well. That he has a big kind heart. That he makes mistakes. She is willing to give others second chances and even encourages others to do the same but when it comes to Brawley she won't do that. To me that is unfair.

Brawley tries so hard to show her who he is but she does shut him down. And now with her dream coming reality it makes it harder. They have some serious attraction and you can tell they love one another. Brawley is trying to show her his feelings and be there for her but she does shut him down. When she doesn't and gives in wowza. but they are fleeting because than she turns cold and hurts him and she in a way hurts herself.

When Maggie goes after her dream she does seem to change a little. Her treatment to Brawley after he did all he could to be there for her was just horrible. He was disposable to her. She felt bad afterwards as she did the other times she went hot and cold but this was different. Throughout before this she said some hurtful and mean things before this but this time took the cake. Even after she told him all she lashes out thinking he was judging when he wasn't. She really hurts him this time in a way not expected.

so when he goes back he buries himself in work. He feels saddened. We also see him begin to move on in a way. But he doesn't give up. He knew she needed to spread her wings and knew it was a hard road to get her to see him differently and doesn't give up. But he does as does everyone else have loss occur. It hits him so deeply and profoundly. Here your heart will break.

Maggie is having her dream come true but to me isn't happy with her life. She is confused over her feelings and where she belongs. She is also confused over Brawley. she gains perspective as well. I love how she does see where she is meant to be and sees Brawley in the end. It takes her awhile but she does realize it.

The story is heartwarming and heartbreaking. We see Brawley go through alot and see that he has changed from who he once was. He is so kind and sweet. Everyone roots for him and you do to. Maggie is needing to discover where she belongs as well and spread her wings like Brawley did. He understands this and encourages and supports her even if it saddens him. He is always there for her. We see him support and respect her no matter what. They love one another but Maggie does fight it to the end. Maggie learns to grow and see what she wants in her heart. They are a beautiful second chance love story that has you smile and sad due to some loss and all that happened in the past to get them where they were at the beginning of the book. A great love story on love and second chance. On forgiveness and family and friends. A wonderful read..

Received an ARC for my fair review for netgalley. This book is part of a series, this is the third book, and it continues with another syrupy love story from Maverick Junction. It was a second chance story, this time it's

about Maggie and Brawley, who were high school sweethearts. Brawley left town, and broke Maggie's heart, and now she is about to embark on the time of her life, where her business will take off, and then who shows back up. Brawley, and he is determined to make up with her, so what happens? Do they reunite? Well they do get their HEA, but it is a journey, so read it, and go thru it with them.

A determined second chance...

Maggie and Brawley's story has been percolating through this series and finally, finally, it was their turn! If you've read Ty and Sophie and Cash and Annie's stories than you are joyfully familiar with the towns of Maverick Junction and Lone Tree. They are filled with characters that warm the soul in true Texan fashion.

Maggie and Brawley had a falling out years earlier and living in different towns/cities allowed that distance to exist... until now. Brawley is back and he is determined and relentless in trying to breach the canyon-size gap between them. Maggie is having none of it! Let the games begin!

***“She’d convinced herself she hated him. But despite that, she wanted him, and that really pissed her off.”***

Their story was full of all the things I have come to expect from this series, this author. The banter is at times snarky, sometimes sweet but always with a wealth of emotion behind it. And they are not alone. There is family and friends that make their story richer, funnier and all the better for the love and support – and kick in the pants – they provide at just the right time.

While the storyline was not new, I couldn't help but fall in love with the towns, and the characters, all over again. They are a slice of everyone's life – or what we would like it to be... I hope there is more to come in this series as I'm not ready to leave this corner of Texas!
