I am crap at chess. I spent a lot of money on books that I thought would at least make me competitive. Nothing worked. I think these chess books will all sit in a box gathering dust and one day I might get the urge to rejoin the local club and get butchered by 12 year olds so then may have a further look. (Generic review for all half finished chess books I will never finish)

IIRC this had some useful stuff for the idiot player such as myself.

## Zardo says

Interesting chess puzzles. The best part is you don't know what your looking for. Is it a mate in three or a tactical combination? Every piece has to be checked to see what the key to the problem is.
