**Pulse** Keith Taylor

**How will you survive when the lights go out?**

Jim Shepherd had always known the EMP was coming. For years his father had warned him that someone would eventually push the button and plunge the US into the darkness. He thought he was prepared for the chaos to come.

**He was wrong.**

Abi Ross had no idea when she boarded her train from D.C. to Charlotte that her July 4th was about to go off the rails. She had no clue that she'd soon find herself stranded in rural Virginia, injured and alone, awaiting a rescue that would never come.

**Could you survive with nothing but the contents of your pockets?**

When the lights flicker out for the last time Jim and Abi need to discover if they have what it takes to survive, stripped of the bubble wrap and cotton wool of modern society. How far will they go to keep breathing? Who will they save? Who will they leave behind?

**And what will they do when they learn that the attack has only just begun?**

**PULSE** is the opening novel of the Little Rocket Man series, a thrilling tale of survival against a very real enemy the United States is woefully ill-prepared to face.

### **Jeanette says**

#### **EMP...**

Probably the most accurate theory of an emp on American soil. Do we really know what's going on in our world? Could we survive? This is something we all need to think about.

I enjoyed the authors characters & the small town feel of willow springs. I'm sure the next will be as exciting...?

### **Elizabeth says**

I'll be looking for the next book in the series!

---

### **Pam Shelton-Anderson says**

The premise and plot were pretty good though there were writing issues that could have used an editor. I actually didn't like Shep much, though. He is a community leader but sneaks out of town thinking the rest are going to die anyway. What a jerk. He does end up going back but I sure would not trust him. I also don't really think enemy troops would pick a small, rural town to storm so soon after the event. They would surely try to get control of the major cities.

### **Peggy Pancherz says**

#### **Good book**

Read all of the books in order to really enjoy. Characters are realistic and get better and better. Storyline continues to grow and develop.

---

### **Sharon Snider says**

#### **Great book, looking forward to the next one.**

This is the only genre I read and it was good. Really enjoyed the story and writing, hope part 2 is out soon.

### **Achinoh says**

## **I hate cliffhangers!!!**

Insecure authors trying to ensure more sales and dividing a novel to appear cheaper but readers aren't dumb. I hate cliffhangers.

---

## **Steven Smith says**

### **Free is overpriced**

Don't waste your time or (no) money. Bad,bad,bad. Characters, plot, timing. All bad. Did I mention bad? I love end of the world as we know it. Not this one.

## **Cherye Elliott says**

### **Pulse**

As I read this I keep seeing President Trump's speech yesterday morning while he was in South Korea. The whole book seems so real. Even a seasoned prepper---how do they deal with this?

Keith Taylor. Great job bringing today's events to my fingertips and creating havoc in my mind. I am so ready for book 2.

## **Patiscynical says**

### **What the?!!**

I was enjoying the story, reaching what I thought would be about midpoint, when the book suddenly ended. Boom, over. I can't even call it a cliffhanger, it was so abrupt.

It started out well, the characters were well defined, but the sudden end and lack of any resolution whatsoever annoyed me so much that even if I received the next book for free I doubt that I would read it. Results: this piece of a book could have been worth reading, but it isn't.

## **Jim Vivinetto says**

### **Timely and mind blowing theme we all must read**

Every American should wake up and convince themselves that we are around the corner for an EMP event  
This story is an eye opener and I can't wait for the plot to continue  
Fast read

## **Sharon says**

### **Decent beginning of a book.**

Decent beginning of a book, I dislike how they seem to want to make one story into three books. Reminds me of the old b western serials.

---

## **Jeanne says**

### **False**

Altho it says book one it really is not a book. It is merely the first installment of a story. The end leaves you hanging.

---

## **Spanky says**

### **Pulse...A Good read**

Pulse had me right off the bat. The folks involved are all different but likable characters in their own ways. Good plot but ends where things are just getting exciting.

---

## **Barbara Stewart says**

### **Likeable characters**

Good apocalyptic fiction story. The characters are likeable. The story moves quickly and makes you want to keep reading to see what happens. My only complaint is that it's hard to believe many would turn into monsters the very first day.

## **MR N R MOORE says**

A pretty decent book in this genre which I have thoroughly enjoyed. The description of an EMP weapon effect is very accurate. I have the next book in my library and am looking forward to reading it very soon.
