### **Todd Oliver says**

Another great book in this series! I hope book 4 is coming soon. This story keeps getting better and better! The authors did an awesome job with the story and Sean Runnette is doing a superb job with the narration.

#### **Awesome**

I like this series, the story flows well and is easy to follow. I just finished book 3 and starting book 4 now. I highly recommend

#### **Loved It!!**

Really great series by Bobby Adair that you just can't put down.

Ella and William are reunited with a lost family member. Blackthorns is gathering his mighty army to defeat the demons at the ancient city. Will everything come to pass?? Can't wait to read book 4 and find out!

I had to set this one aside...just couldn't continue to stomach the slow plot and poor characterization.

### **Gayle Wilson says**

#### **Engaging characters**

I enjoy how personally involved we as readers become with the characters in the story. Great characters and an interesting setting are a winning combination for these books.

### **Heather Breen says**

#### **Good read**

I like this series, it was a little hard to get into at first and can be slow at times but the characters are well written and engaging.

#### **Can't get enough! I love these guys!**

I'm still loving this series! I found not one, but two great authors, and a load of great books! This work really gets to the nitty gritty of how leaders must show the ugly side to govern the people. Loathsome and scary, but sometimes necessary. I can't wait to see how Franklin can rule more humanely during his reign. I have high hopes for a better world for these poor people.

Please buy the cabbage patch doll! I loved every one of mine! The prosthetic feet too! Lol  
Thank you both for the hours upon hours of true entertainment!

#### **Awesome**

It's rough. It's brutal. It's post apocalyptic. The different escapees each grow and begin to internalize the reality of the extreme ignorance that is strangling their culture.

The rulers using the beginning of economic analysis are making huge commitments based on them. Yet none of them understands or wants to understand the methods which might actually give them more options. It's a political trainwreck.

The writing and editing are great as usual. This series is addictive. You will enjoy.

#### **And the great stories continue**

The different stories keep growing and developing, u can not read quickly enough. Great premise still very satisfying as it progresses. Good writing/editing.  
Highly recommended.

This 3rd book is pretty good . The plot started really coming together and this story is fluid and keeps the reader turning pages. I almost feel though that the authors are slowing it down to keep the story going. The action is slowing but the deception is growing and that is where the book gets good. The 1st book had plenty of action and with each book it seems to slow down. Lot of politics being played in this one. I have purchased the 4th book and pre-ordered the 5th so please do not take my remarks as bad. You will not regret going this deep in the series, these 2 authors can certainly tell a very good tale.

Only one thing confused me ,(Ivory never says the word "Bear-Man" to Jingo, yet this is what Jingo refers to him as).

Quite an interesting read as the story has minor characters, mostly protagonists, that develop into major characters as the series moves along. The major characters at the beginning of the book are mostly antagonists that cause the minor characters much pain and heart ache as well as physical cruelties. Instead of these minor characters becoming weaker, they overcome their antagonists in very different ways unique to each of their personalities.

The series moves along quite well and with each passing book the challenges, depth of characters and realisations grows.

A series with many twists and turns, as well as some very cruel and wicked antagonists that the reader will love to hate with each passing misery inflicted upon a population of 'plain folk'. While hard choices had to be made in the early history and survival of the town of Brighton the Elders have come to enjoy the power of their positions and routinely remind themselves of how powerful they are by the 'punishments' and cruelties they inflict upon thousands of residents in Brighton.

A close look at some of these characters will parallel human nature in quests for absolute power. Absolute power corrupts absolutely.

Franklin is a gutless weasel. If Adair and Piperbrook don't kill him off soon, I'll be "most seriously displeased."
