The Vangel Mantissa Creed

Frozen in my arms, her lips turned blue black, her eyelids, her skin colder than cold. One more beat from her heart, and silence took over.

After the secrets, needs, desires, pride, hope and love, who's to say what's right or wrong? What's right can be wrong and vice-versa – wrong can be right. Circumstances surrounding the subject may define rightness. Perhaps time also plays a big part, what we could think wrong now could be right in the next minute, the next hour, day, month or year, century maybe. The same applies to that which we might think right and could be wrong. If that's the case then there is no right or wrong, but there is conscience, there is duty, promises, and of course there's love. These things define who we are and how we measure right or wrong, right? Or am I wrong? I could be wrong ... maybe just for now ... just at this moment.

Life for Alexandra keeps getting more complicated. Her heart is trying to point her in one direction but her head is pulling in another. She knows she must choose between the three of them, but she doesn't want anyone to get hurt. She also knows that there is a very real possibility that one of them is the Vangel. Thankfully Emily accepted her apology, so at least she has her best friend by her side. Lexie wishes she could tell her everything, and she still doesn't fully agree with the wedding, but right now having Emily back is what she needs...especially since her time may be running out.

Lexie knows she might be dead in less than a year if she can't find the Vangel before he finds her, but she still isn't sure where to start.

Mantissa Creed brings us back to the world of Cursed with The Vangel, the second book in this amazing series. The people, places, and things we all fell in love with in The Ring are back and better than ever, and the new things we are introduced to are just as good.

Creed is insanely talented. As good as the first book was, she has raised the bar with this one. Her incredible writing is here again, but there is a slightly darker tone to it now. Lexie's deadline is approaching, and Creed knows exactly how to increase our nerves wanting to know what will happen.

As soon as you start reading you know you are in for one heck of a ride, and you will not want to put the book down. You feel like you are part of the story instead of just reading it; you see, feel, and experience everything the characters do. Creed brings her world to life perfectly, and you will love every minute you spend there!
