### **Evelyn says**

Company 8 has a new member: the scientist assigned to them by Haijima. He's very suspicious and seems to know more than he lets on. Now we need one more person to make a complete team: the engineer. Captain Obi has his sights set on one in particular but Vulcan doesn't want anything to do with the Fire Force.

Not to mention, the white robes are back with a Fire Force team in tow. You also get a little surprise at the end to keep you in suspense.
