I won this book through Goodreads.

Alliterations, cute illustrations, and a punny punch line at the end.

It wasn't bad, just not that good.

Erik This Kid Reviews Books says

SUMMARY - Sara Sue loves soup, no matter what kind. She has it every day. There's just one tiny, little, slight problem – whenever she takes a sip, it turns into a humongous “SssLLuuuoooorrrrPPPP”! When her parents get annoyed by the slooping, they make her a deal. Over five days, Sara Sue must figure out how to stop her slooping, or her mom will never make soup again!

WHAT I THOUGHT - This was a cute book. The illustrations are really nice, and portray the characters' personalities well. Ms. Pfautz uses a nice amount of onomatopoeia to make kids laugh and enjoy reading the book. I think it would make a great read aloud. Sara Sue is a likeable character, and you understand how she feels. I like how the dog makes a comical appearance every once in a while. Ms. Pfautz has written a nice story about manners, and meeting your goals!

NOTE I got a free copy of this book in exchange for an honest review

Sara Sue loves soup, any kind of soup, but her slooping is getting on everyone's nerves. One day Sara Sue's mother and father told her it had to stop! Sara Sue's mother told her she had five days to learn to eat soup without slooping or her mother would never make soup for her again. How will she ever learn to eat her soup quietly!

Ali Pfautz knows how to keep a child's attention and uses this silly made-up word as she tells the story.

Sloop! Slooping! Just the sound of it will set off the giggles.

I highly recommend this five-star book.

This was an absolutely adorable book. My 16.5 month old daughter enjoyed most when I would follow the expressiveness of the slurps and sloops. I look forward to reading this again and again to her as she gets older. The writing was well done and quite expressive.

I am pleased to have received this book through Goodreads First Reads.

My five year old son and I loved reading this book. His older brothers (9 & 10) loved reading it to him several times more. The story is fun and the illustrations are colorful and bright. What kid (and parent for that matter) doesn't enjoy making silly sounds. This book has a ton of them. I always love to read picture books to my kids that have a sing songy flow. I'm sure this book will be a staple of our bedtime reading for a long time!

Michael Bond says

The clever and alliterative writing style engages children and they don't want to put the book down! This is one book your children will read over and over! Perfect for nighttime bed stories, road trips and those stormy afternoons spent reading together!
