## **Red Team Alpha** Jay Allan

A New Adventure Set in the Crimson Worlds Universe

(Over 800,000 Crimson Worlds Book Sold)

Red Team Alpha. An elite military unit. Twenty highly-trained veteran warriors, Mars' best. They are ready to face whatever dangers threaten the Confederation. They are capable, dedicated, armed with the best technology Mars has to offer. And they don't exist, at least not officially.

Now the team will be called upon to face its greatest test. On a planet in a newly-discovered system there is a mysterious wreck, the remains of an ancient ship. The discovery is a momentous one, first contact and proof that mankind is not alone in the universe.

It is a job for the Team, but even these crack soldiers will be tested to the limit of their abilities as they uncover the dark horror within, a technological nightmare that threatens the very future of humanity. The soldiers of Alpha will fight, ignoring the odds as usual, but this time they will be caught between two enemies.

For they are not the only ones who know about the ruins. Even now, the notorious Gavin Stark and his Alliance Intelligence forces are on the move, seeking to seize the ancient vessel and the priceless technology within for their own purposes. And they are ready to do whatever is necessary to gain the priceless ship...including wiping out Red Team Alpha completely.

# **From Reader Review Red Team Alpha for online ebook**

**Jeri says**

## **Provides Insight Into the Martian Confederation**

This book provides a look at the beginnings of the Confederation and how Roderick Vance got started as the head of the Martian intelligence organization. I really enjoy Jay Allan's books.

---

**Stephen Löh says**

## **Wonderful Military Sci-Fi**

I've had the Crimson Worlds books recommended to me on Kindle Unlimited several times, and finally picked this book up recently to give it a chance. I was really pleasantly surprised.

Military science fiction can be really hit or miss for me, but the characters and setting really pulled me in to this one.

I look forward to reading more of Jay Allan's books

---

**James W. Owen II says**

## **In the tradition of Mr. Allan.**

This is a well written story with well written Charles and a fast paced storyline. I would have loved to see more of the life of the main character.

---

**Ted says**

**Wow!**

I'm a big fan of military AS and Jay Allen is one of the best! Fast paced, intense and it kept me on the edge of my seat the short time it took me to read. I could not put this book down! Thank you Jay!

---

**Timothy Boyd says**

Very nice Sifi/military story. Well written with good defined characters and a nice plot. Excellent start to the main series. Looking forward to seeing how the writer develops his universe. Very recommended

---

## **Jack Keener says**

I really enjoyed this book. The characters came off the page and I felt like I understood each one. The tactical and battle descriptions were vivid and realistic. I felt invested in the world and wanted to know what would happen next. I've not read a lot of military sci-fi but after really this book, I might have to start.

---

## **David R says**

### **Gritty realistic reading**

Jay Allan's (and every other adventure Sci FI author) challenge is to entertain within parameters that allow temporary disbelief while dealing with shortcuts in logic and complexity. Maybe an AI still surviving after a few hundred years probably is a more complex thinker than portrayed to meet the book's action line but no one can easily match Jay's combat dynamism. Always a good lighter read one never regrets. Can and is addictive.

---

## **Alison says**

### **Solid read**

Battle excitement, hard men and women. Don't be expecting a happy ending. A foreboding prequel to later plot lines of battles to come.

---

## **Nancy Phy says**

### **Great story**

When I read stories like this one I can imagine what it would be like some time in the future. If you like epic battles you will enjoy this book.

---

## **Mark Goletto says**

### **Great book (Again)**

It didn't take but a few pages to realize I had read this book before, but as it usually happens, after you've read as many books as I have over the years, you have a tendency to forget the particulars of a story. This time I enjoyed the book as much as I did the first go around.

---

### **Marcus says**

Excellent written story centered around a group of highly trained operatives (except one) based out of Mars in Earth's distant future. If one needs to make a comparison, think of the Navy Seals. The action and suspense is there, characters well written, drama is constantly in your face, and the body count keeps stacking up. A very well written story/book.

---

### **Michael Wood says**

#### **Wonderful Military Space Opera**

Allan, who has so many good space opera novels, has done a wonderful job with "Red Team Alpha". The story is tight, that of a single fire team on a single mission, and ties in well with Allan's other space opera tales. The special operations fire team faces advanced alien tech, foreign human enemies and their own human limitations. The action is constant, wearing down the team (and keeping the reader's attention).

HIGHLY RECOMMENDED: AS MILITARY SPACE OPERA!

---

### **Robert Romberger says**

Very good military sf. Has a few editing errors but overall this is a really good story.

---

### **Fred Hughes says**

Another great adventure in the Crimson Worlds series.

Great characters, great battles and surprise endings all make a for a GREAT read.

Recommended book, series and author

---

### **Jimbo says**

Action and adventure space military store. This book gives insight into Roderick Vance head of Mars Intelligence service. He is sprinkled though out the Crimson Worlds Adventures.
