### **Kelly says**

I thoroughly enjoyed the story of this book. It's like the Left Behind Series, only it came first and, in my opinion, is much better.

---

### **DiAnna Cronic says**

I read this book before the "Left Behind" series came about, and liked it more than that entire series.

---

### **Shirley says**

Much deeper than Left Behind Series. I really liked this and the 4th Millenium.

#### **A Quickie Review**

This was a weird one. I'm not sure I agree with how Mr. Meier presents the "end times," but the strangeness of it all was simply gripping. Readers beware, though: There's plenty of violence and scary content to go around, as is typical with apocalyptic novels.

**Score: 3.5/5**

### **Karen Phelps says**

I have read 2 of these and they are really good. Very thought provoking and gets you thinking of relevant issues today.

---

### **Verm says**

I thought this book was very interesting, especially the appendix - yeah, you'll have to read it for yourself and see why!! :-) I thought this was much better than the Left Behind series.

### **Bayneeta says**

Also read this for a Readers' Advisory group study of Christian/Religious Fiction; this was for the apocalyptic section. Actually thought I might like these. Again, not particularly well written. This tells the same story as the *Left Behind* series, but in one volume. In this book the Antichrist is the American president and an American family of non-practicing Jews have a guardian angel who helps them out and narrates some of the story.

### **Rebecca says**

This book is about the end times and sums up in one book what the whole *Left Behind* series is about. I really enjoyed reading this.

---

### **Amanda Nall says**

I read this when I was just a young teen and I really credit it for opening my eyes more and making the Rapture and the end times much more real to me. I read it knowing that not everything in it is 100% accurate obviously but reading it made me want to dig deeper into my faith and research things more on my own. I've read it several times over the years since then as well but somehow missed that it was part of a trilogy! I'll definitely be reading the other two soon.

### **Heather says**

I thought this one was really well done and then tried to get into the "Left Behind" series but couldn't do it, Meier's story was enough.

---

### **Nick Woodall says**

I liked this novel. Scary, yet gives you a picture of the chaos that will ensue at the end of time.

---

### **Angie says**

I want to read more by this author!

---

### **Matt Hartzell says**

Similar to the *Left Behind* series, these books take a more dramatic tone with a look at the End Times. I read

books like this less for "accurate" information and more for entertainment.

---

### **Becky says**

I really like this book. I've read the "Left Behind" series, but there is just something about this "short in comparison" book that I appreciated more.
