## **Fire and Honor** M.S. Parker

When twenty-four-year-old Honor Daviot returns to the States after her latest tour overseas as an army medic, she's ready to settle down with her fiancé, and open her own pediatric practice. A nice, quiet life, away from violence and war.

But fate intervenes when she crashes her car...and wakes up to find a handsome stranger watching her. His name is Gracen Lightwood, and he is unlike any man she's ever met before. Hot and sexy and...too bad he's also delusional. Not only is he wearing clothes that look like something out of a museum, he insists that the year is 1775.

**You don't wanna miss *Fire and Honor (The Lightwood Affair)* – A steamy romance, unlike anything M. S. Parker has written before.**

Plot wasn't great. More irritated by the fact that this (plus the other two books in the series) could have just been 1 book, instead of a serial publication. "Here, get this book for free and then buy the other two".

Sorry, but the plot and the characters don't warrant paying to see how the story ends up, IMO.

Okay, I liked this book, or I should say I tried to like it. I don't know maybe it is because I am a huge fan of M.S. Parker but this book did not do anything for me. I should have known it was going to end on a cliffhanger too, but for some reason that surprised me. I mean It is M.S. Parker. But this book just didn't seem to need a cliffhanger. But okay I get it, let us have another book so we can see where all the secondary characters go and are in this book.

So I am still on the edge if I will read the second (or in some cases) the third book. I probably will because I hate not knowing what will happen. But that is only because I have KU and don't have to pay for the individual books.

This book! Ugh! It started off intriguingly enough, with a modern GI Jane character somehow getting thrust back in time during a car crash. It ends at about 40%, forcing you to buy the next installment if you care enough to do so, and gives you a reach-around BDSM book that I didn't bother to read.

**\*SPOILERS\***

So right away, after meeting the 1775 man, both engage in killing a few men. How romantic! Like in the last book I read by this author, h is engaged to a drip. The H is newly betrothed. h becomes a servant in H's household, with no details as to life in those times and just magically becoming a domestic after serving a few tours in Iraq.

H is somehow supposed to come off as brooding and noble, but to me he just seemed spineless. h, named Honor, is from a military family and starts out as fierce, but ends up somewhere long the lines of June Cleaver. Having not paid attention in history class, Honor remembers reading a book of her brother's about

the revolutionary war, and suddenly is all colonial and knowledgeable about the Battle of Bunker Hill. She uses her flag tattoo to prove to the H that she is from the future.

The dialogue, including the H saying "okay" at least twice, is not fitting, and the one servant comes across as sounding like someone from *Gone With the Wind*. It is told in the first person. It is just a silly, non-romantic book. It could have been a lot better with some research and character development.

You have a badass, independent female character, put her in a time-traveling plot, and then reduce her to a clueless, helpless woman who clings to the first man she finds?

I think the fuck not.

### **Ollie says**

At 21% I felt like I was reading a history book instead of a time-travel romance book. I kept waiting for some romance or sparks to happen and all I kept reading were Honor's thoughts going back and forth from the present (1775) to her past and it just interrupted the flow of the story. I did not see any connection between the two and felt no sparks between Gaecen and Honor, therefore I had to give up. I don't have the time to read something that is still not grabbing me at 21% into the book.

Did-not-finish

**Excellent**

I haven't read a book like this in a very long time. This is exactly how I love my romance ; a balance of everything and hooking lines. An absolute page turner.

#### **Original**

This book takes you out of the normal into an adventure! I can't wait for the next book in the series!!

### **Anne says**

This is well written but I didn't like that when the heroine went back in time the story kept going to her thoughts of her life in 2016 and this to me interrupted the story in the past. I also didn't like that this has been left on a cliffhanger which I am not keen on as it takes ages before you get the next book.

#### **Details, details**

This book stops at 50%. It abruptly ends and says hey hahaha you have to read the next one.

A medic in the Army is not a doctor. She couldn't leave the army and start a medical practice, she doesn't have a medical degree. The author makes you believe she can. She talks about crashing her car and that they would need a doctor and she would be the first on the scene.

The hero....don't get me started. What a jerk and a fop! I didn't like him from the start and then all the nasty things he said to Honor. She just forgives him and they are in love. He is so....I don't know how to explain..not heroy...I know not a word. He just isn't hero like he is hero lacking.

Not reading the next.

### **Kendra Needs says**

MS Parker you really surprised me with this book, it is so far out of the scope of books that she usually writes and for that matter is not really a genre of book that I usually read (historical romances) but I have to say the writing and story line of the book had me captivated from the first page till the last page.

This story starts out with Honor Davis heading home from her latest tour in the army, she is headed home to make a decision about whether to sign up for another tour or call it quits and open her own pediatric practice at home in the states, and to think about where she is headed wither finance, but fate intervenes when she has a car accident and wakes up with the handsome Gracen Lightwood pulling her to safety. But boy oh boy does this story take a turn when Honor realizes that she has woken up in a different time (that is all I will say as to write more would spoil the whole story and surprise of the book, you will just have to read it for yourself to see what an amazing book this really was).

Waiting not so patiently for book two, because the cliff hanger ending is just.....WOW

### **Twists and Turns**

I loved, loved this book and can't wait for the next one in this series to come out. This author is such a talented story teller. After just a few pages I was hooked until the end.

### **Seriously ?**

Ok, I kinda sorta liked it.....

The story if annoying was well written at times, but all the back and forth in her mind got me out the story and worked me last nerve...

Ok imagine a rather tense stressful moment , say she's just walked up outside a room and over hears a conversation that upsets her greatly,she's contemplating her next move ,or she fearful or frightened or what ever it is that's got her the slightest bit upset or stressed and suddenly in her head or dreams she's either reliving a moment in the past or having imaginary one to help teach her something and it's happens again and again and again ,honestly at 1st the confused me ,then they just started to annoy me then piss me off as I started to skim through them,for me they took me out of the story and hurt its flow .... Not that having such indecisive leads didn't help that at times..

I wanted to like Gracen,he didn't start off to bad even if neither MC's description fit what you see on the cover in the slightest , Gracen was supposed to Blonde and she's supposed to have black hair not what looks like Auburn as least to me and the woman in the cover doesn't look like a woman who could or would very easily be seen as a man no matter what she's wearing...

If a seemingly weak kinda wishy washy H ,unable to decide what he wants or stand up for it wasn't bad enough,the book ends at 49% soo you can read Dom X ?

WTF ?!?!?

Your gonna end a Historical Romance/Time Travel soo I can Read a book called Dom X ?

Why ?!?! Based in the theory that after part one of a Historical Time Travel story I'm in the mood for BDSM ?!?!?

Seriously ?!?

Shakes head , How the Hell do you figure that ?

Then there's another story after that ...

I don't know mi just don't know ... I'm at a loss...

Personally I'm insulted, cut this story short to offer me something I never asked for or wanted...  
Maybe that's not how it was meant but if it was gonna be done ?  
It should have been something that went with the theme they had already been committed to ...  
Not going from the historical time travel romance to bdsm ...  
Unless there had been bdsm in the story which I can assure you there was not ...  
No thanks
