The World Cowers

Boyd Craven

The World Cowers Boyd Craven

The government, long hidden inside of hidden military bunkers is now starting to come out of hiding to deal with threats, both foreign and domestic. The threat of misinformation and the remaining survivors general unease, force the President to come out of hiding and break his silence.

Weeks after Sandra's near abduction, Blake and Sandra are arrested, to be tried for treason. There's just one catch, somebody they thought had been removed from the playing field had in fact survived.

With the new information, the threat now coming overland from Mexico and into the Southern United States, the nation needs to pull together.

This is the last of the series that deals directly with Blake and Sandra at the Homestead. Subsequent books will be about the invasion, and how the nation as whole tries to pull itself back together.

Larry Powers says

True Heros Rise

True hero's rise from the ashes as others struggle. Blake and Sandra are arrested and face execution. Can they survive a trial and who will lead the Homestead? Great excitement.

Lisa Riviello says

Hopefully

I can't put these books down. !!! Can't wait to see how the rest of the series turns out. Don't stop till the last book.

Chad Boulanger says

One of my favorites

I have waited for a book series like this for a long time. Not too long and full of fluff, but not a 30 minute read. Just enough that each book feels like you're starting a new movie with an old cast. Thank you.

Frank Gough says

Good character development over the series

The series lays out, among other things, the fact that leaders are often developed by their followers, and even led by them into leadership positions. Well done, Boyd.

Sabrina says

A beautifully dramatic ending to a great series. This last book explained and summarized so much of what was actually going on in the world after a grid down event....and how Americans can unite and persevere. An incredible conclusion to the story of Blake Jackson and the people who became his family. If you haven't started with the first book, 'The World Burns', you need to get started today!

Uncle Dave Avis says

This author has written a very good story in a series of books that I highly recommend. The story revolves around an EMP from an unexpected attack on the U.S.

The characters are well developed and the main characters persist thru all of the books in this series. Other characters are featured for less time.

The pace of the book / series is rapid with no places that bog down.

There is only minimal cussing and nowhere is God cursed.

This book / series really held my attention, entertained me, and left me with a positive feeling. I highly recommend it.

chucklesthescot says

The evil government story continues with Blake and Sandra being arrested and to be tried for treason along with Silverman and the deserting troops. The outraged homesteaders are determined to do something to save them while the gloating governor revels in his victory.

Gah how much do I hate Boss Hogg and his best friend the President right now??? It's all about sticking up for your buddy and not giving a damn about what the homesteaders were subjected to. The homesteaders are just normal people defending their right to live quietly in their own community and provide for themselves which is what most preppers want to do. Now I get why preppers fear government interference so much and why they want to be so heavily armed. In a disaster situation, who knows what rules will be enforced and what will happen to groups like this?

I loved the whole trial section, which I had not really been looking forward to reading about as the whole thing was so unfair. But I found it entertaining and funny in places and I was pretty satisfied overall by the way things progressed and turned out.

This is the shortest book in the series I think, so I can't really go into much detail about what happens in it but I did enjoy the end of Blake and Sandra's story. According to the blurb, the rest of the series looks at other things going on during the disaster and I still plan to read them and see what happens.

Vicki says

Another good one, but should have been in about 2 or 3 books. Glad they are all out at least .

Willow Brooks says

Besides book four this series just gets better and better. This book (7) Is my favorite. I mean I actually got chills reading this one. I don't know why but I really really like this series. It has some kick butt tough girls that will take you out with a bullet faster than you can pass gas. Not only am I going to read the next and last book (8) but I have already downloaded book 1 of Boyd Craven's other series.

I can't help myself, I love apocalyptic stories and wish they would come out with an end of the world series that is really good. I know the new series, Containment is supposed to be an Apocalyptic show, but it's turning out to be Meh! I like the struggle and survival men, women, and children have to conquer in this story. I'm not too big on Zombie apocalypse but I'll watch it with my grown kids just because it's bonding fun to be shouting, getting scared and upset as a family.

On to book 8.

Oh. All these books needs to be combined. They are short, I hate having to keep downloading the next book so quick, but they are worth it so, download it is.

Connie Bassett says

Wow

It just keeps getting better! I don't want it to end, and because I see a book #11, maybe it won't

Amanda says

Couldn't stop reading

This series is definitely one of my favorites. I literally could not stop. Very well written and keeps your attention every step of the way. I feel like I know the characters personally lol. Thank you Mr Craven for an awesome series. I cant wait to read more of your books and stories!

Steven K. Stallings says

Good writing but short

I have been enjoying this series but wish it would have been packaged all together as one book. Basically, this is a series of short stories that if combined could honestly be labeled a novel. I bought these as opposed to reading for free despite that. "The World Cowers" is a fun read but is really a short story... very short. I read it in under 30 minutes.

Kelly Wade says

Love this series

Love to see Blake coming into his own and being the leader that he was born to be. Ready to read the next book.

Michelle McPherson says**The World Cowers: World Burns bk7**

I enjoyed this newest very much. I am not sure how this situation will work long term, where the war is going. I am as always anxious to find out.

Piglet5 says**Addicting**

Good books , great author!!! Wish the books were longer... (I guess the publisher needs more sales... Understandable)....Fast reading....addicting. I'll have to elevate him to favorite author status with James Lee Burke.....two different authors....two different subjects. How about a Hillbilly Survival Handbook?
