If you're the parent to a Dino-obsessed kid, this is a must read. My son is only 5, but we've exhausted all the basic dinosaur books. This book had stunning visuals and many in depth details.

Kniha je pekne prehľadne rozdelená podľa mezozoických období alebo teda periód. To je jasné, nebudú predsa začínať od konca éry. O každom dinosaurovi sú napísané doplňujúce informácie a takmer ku každému je aj fotka nálezu daného druhu resp. aspoň dáka časť kostry. Na konci knihy je ale veľmi pekné zhrnutie základných informácií ako napr. stavba tela, ako sa bránili rôzne druhy dinosaurov atď. Dokonca tu ani nechýba krásne vyobrazenie embrya dinosaura čo v každej knihe nebýva. V knihe nechýba ani slovník a tabuľka mierky a veľkosti ku každému druhu v porovnaní s ľlovekom. Na záver ešte chcem pochváliť naozaj pekný obal. I keď mi na tom až tak nezáleží musím uznať, že táto kniha nie je len dobrá obsahovo ale aj vzhľadovo.

Kniha bola prekonzultovaná s paleontológom Darrenom Naishom takže máte istotu, že v knihe nebudete čítať bludy.

I really wanted to give this one 4.5 stars. It's published by DK and the Smithsonian and is packed with information about dinosaurs and other prehistoric creatures. The illustrations of the dinosaurs are really cool, especially seeing the velociraptor with feathers. My only complaint is that there is a lot of technical information. Dinosaur aficionados will probably have no problem with it, but I was overwhelmed.
