# The Convoluted Universe - Book One

*Dolores Cannon*

## **The Convoluted Universe - Book One** Dolores Cannon

This is the sequel to 'The Custodians'. The book contains some of the more complicated concepts in Metaphysics that Dolores Cannon discovered through twenty years of using deep hypnosis to explore the subconscious mind. Some of the topics explored in this book: The origin, knowledge and destruction of Atlantis; The explanations of Earth mysteries, including -- the Pyramids, Easter Island, the Bermuda Triangle, the Ark of the Covenant, Loch Ness Monster, Nazca Lines; Characteristics of other Planets, Parallel Universes, Parallel Lifetimes and Realities; Other Dimensions and much more. This book is intended for those readers who want their minds expanded by the more complicated Metaphysical ideas that border on 'Quantum Physics'.

## **The Convoluted Universe - Book One Details**

Date : Published November 1st 2001 by Ozark Mountain Publishing (first published June 1st 2001)

ISBN : 9781886940826

Author : Dolores Cannon

Format : Paperback 560 pages

Genre : Philosophy, Metaphysics, Spirituality, New Age, Nonfiction

## **From Reader Review The Convoluted Universe - Book One for online ebook**

### **Marco says**

Absolutely amazing book! Through regressing her clients, Dolores Cannon fiddles with a number of 'hot' esoteric topics in a very comprehensible way, full of easy-to-understand allegories. Where 'The Law of One' series in my opinion failed as too hard to understand (both in the vocabulary used and in the information itself), 'The Convoluted Universe' really hit the spot for me!

I just couldn't put the book down and I've already ordered volume 2! This is the first book I read by this author and you can bet I'm craving for more!

---

### **Logan Streondj says**

A very interesting cross section of lost knowledge from the god source to atlantis and how we can be multi dimensional light beings. Includes one of the first past life regressions of someone that was a robot in a past life.

---

### **Mary Christine says**

I'm on book three now. Her books have helped me to realize why I've been the way I am since birth. Excellent for those who know we can't continue as we've been doing. We have to change! We are part of a much larger (understatement) reality. All connected and love, respect for ourselves and all else that exists is the key, the only way to get past these very hard times.

---

### **Panda1602 says**

Amazing dimensional layering experience. I can see why I was drawn to read this book now. My being is expanded enough to easily grasp the topics with relative ease. At times it was apparent that Dolores was presenting topics outside her current realm of understanding, however she did so with integrity and whilst sustaining the vein of "truth" that was coming through. Content bends on itself like a pretzel which may leave some wondering what is the "truth" and I cannot help feel that this is deliberate on the part of the beings giving out the knowledge. After all they are all part of the evolving Universe and are on a journey just like the rest of us. Look forward to reading the next instalments.

---

### **Lisa King says**

The information in this volume is thought-provoking and eyebrow raising. It forces you to open your mind to possibilities that may never have occurred to you before. That's why I give it four stars. Dolores Cannon

presented her work as a straight transcribe of conversations she has had with various people and the beings she's contacted through deep regressive hypnosis. It helps with validity. Unfortunately for me, it can put me to sleep very easily and that is why it takes me SO long to get through her books. I almost dropped the book with only three pages left to go and it was in the middle of the afternoon! Information is fascinating. There were moments where I had a higher-level of consciousness moment and the world felt SO big. The delivery is a bit dry. There were moments when I did drop the book and my head nodded because the Q & A took SO long to get to the point. Try not to let that deter you from reading Dolores Cannon's work! It's well worth it in the end.

---

### **My Pseudonym says**

This book touches on just about every conceivable mystery out there. This book explores: crop circles; the Great Pyramid; Bigfoot; Easter Island; the Bermuda Triangle; parallel Universes; simultaneous realities; other dimensions; alien abductions; Christ consciousness; ancient Egyptian mummies; the Nazca Lines; Atlantis; Centaurs; the Ark of The Covenant; the Loch Ness Monster; the Mayan calendar; the power of intention; time; life on other planets; the purpose of life; energy beings in higher dimensions, and much more.

All of which has been accumulated by Dolores after more than ten years of enquiry into the subconscious mind and presented right here. This book will contort your mind in ways you can't imagine. If hypnotherapy is real, then the information being presented in this book is real and relevant to each and every one of us. *You* decide.

---

### **Matthew Krajewski says**

This is the second book I've read by Dolores Cannon, the first being "The Three Waves of Volunteers and the New Earth." I read a great deal of history, forbidden archaeology, and spirituality books and the beauty of Cannon's work is how the past life regressions she reveals from her clients not only confirm a lot of fringe beliefs about the history of our planet, they weave together a more complete picture of the deep and hidden history of humanity. As a spirituality writer that focuses on the magic of our own biological energy fields, it is always gratifying to read Cannon's books and feel like I too am contributing to empowering spiritual seekers with new tools to understand themselves and the universe. Thus far the accounts of Atlantis have been particularly fascinating, and have revealed more than any other histories of Atlantis I've encountered thus far. If you want your mind opened to incredible possibilities, pick up a Dolores Cannon book!

---

### **Linda says**

Don't read unless you've chosen the red pill.

---

## **Iona Stewart says**

Dolores Cannon is the most exciting author I've encountered for a very long time, and since this is the first of her books I've read I've got a lot to look forward to,

She's a hypnotherapist and gets the information for her books, or at least this one, from regressions carried out on her clients. These regressions do not merely take the client back to run-of-the mill past lives - no, contact is made, for instance, with fascinating beings from other constellations who have access to all knowledge. In fact, much of the knowledge revealed is so advanced that it is quite difficult to understand, also because the persons involved lack words to describe these advanced concepts.

New information is forthcoming about the demise of Atlantis together with disclosures about genetic experiments carried out there to create mixtures of humans and animals who/which acted as servants.

There is a chapter on unexplained mysteries revealing, among other things, information about the Loch Ness monster (there are apparently not one but seven of them, and also a few in a lake in Africa and two in a lake off the Amazon river.)

This material is so concentrated, it is difficult to take it all in, and one would really need to read the book several times, which I haven't done, in order to digest its content at all.

Crop circles are explained as being formed by "energies within the earth" and constitute messages for us, which we ourselves must decipher.

For me, one of the most interesting chapters was the one on parallel universes. There are an infinite number of these and they're always intersecting. Amazingly, each one of us is constantly responsible for creating new parallel universes, each time we make a decision to do something, no matter how small. The example is given of choosing between rubbing your nose, scratching it or sneezing. You do one of these but "the energy of the other two possible outcomes has to go somewhere". So at that moment two other universes come into being.

Cannon also interviews a "mechanical person" who was created on another planet for use as a slave or servant. He contained a soul, or rather about 10% of a soul contributed by his creator by its being blown into him in some way. The creator thus lost this 10% of his soul. So both the creator of the mechanical person and the mechanical person himself had the same soul as the regressed woman. This regression back to a robot type of person was a first for Cannon.

Finally, a tale was told about a consciousness that had its home in the Sun. When there it felt one with the whole, it WAS one, but when leaving the Sun it individualized.

These titbits are just a very few of the more comprehensible subjects the book touches on. The author presents many more fascinating interviews about way-out matters.

If you're open to expanding your consciousness and views on what is possible in the many universes and dimensions that exist, read this book. (And I'm not really sure I understand what a dimension is, but perhaps when I've finished reading all Cannon's books, I might have a better clue.)

---

## Gregg says

From tales of Atlantis, to parallel universes, to the true origins of the human race, as a grand experiment to evolve a certain type of consciousness, this text shines as a definitive source of esoteric knowledge. As a proficient hypnotherapist, Dolores Cannon uses a person's subconscious/higher self as a portal to gain insight into a more truer understanding of the workings of the MetaVerse. I found this book hard to put down, and at time I cursed the Gods that I could not absorb the information faster. The details from the people that were regressed, added an air of authenticity that I found convincing. The section on parallel universes was particularly intellectually challenging. The postulate that there are a number of versions of yourself existing in alternative realities was liberating, as well as humbling. Being the competent interviewer, Dolores Cannon, prods and conjures her subjects into deeper levels of explanations, and this was evidence in her questioning to understanding parallel universes. I also liked how she gently brought the subjects back to the more pertinent topics, when they occasionally wandered off.

Throughout the book there is a common theme that there is a galactic hierarchy that is responsible for our beginning, and that throughout history these beings visit, and intercede in the various cultures in an observational and benign way. Various societies have witnessed these visits, and have transcribed these sightings/visits in the languages and customs of their mindset. We later come to call these transcriptions legends, myths, and folklore. Some groups have even formed religions around these "events". Other subjects that are explored are group souls, life on other planets, and of course life on this planet in the distant past. The mode of travel between the star systems is looked at, as well as the different types of "Time" systems that exist, depending on your consciousness, and the plane of nature you find yourself in. At some point events are sped up, and you experience all time simultaneously, infinite speed is identical to absolute stillness, because you are everywhere at once, and there is no need for movement, because you are already there.

Other ideals explored are alien abduction, and the details of their experiences. How past lives affect your present personality. The coming changes to this planet, and the increase in its vibratory rate that will transform the earth into the next phase of its evolution. Another notable section worth mentioning is the chapter on the God source. This most important subject is looked at from the point of view of an alien intelligence, that is in the full throes of the experience of being one with the God source, or at least as much as it could understand.

I have been a fan of Ms Cannon for awhile, she makes the profound seem colloquial, and the mysterious seem common, and this book only adds to my affection. I have just received volume two of her book, The Convolutional Universe, and I anticipate spreading her pages, and diving in.

---

## Stacey M says

Not sure what I think of this one... I am completely open to life on other planets, but the whole alien abduction thing is just a bit strange to me. I am always very interested in what people say when answering while in deep hypnosis, but I still believe one has an "ego" while in this state; therefore, the information they give is given from an ego-state. Also, Alien would mean anything not of this world, so even "angels" or "souls" would be alien by that definition.

I may have to do some more pondering on this one.

---

## Julie Farzana says

## Andrew says

Speculations put forth under the lie of 'truth'. Defenders of her logic claim that "I'm not open minded", as though open mindedness were synonymous with gullible. Her work has logical inconsistencies (the law of consistency being one of the only metaphysical premises that is hard to doubt).

The author seems to dress up speculation as fact to deceive her readers in the pursuit of cash.

It seems like the people that believe in this type of stuff don't believe in the scientific method but that doesn't stop them from spewing "facts". But if a fact can't be observed, measured, or tested in any kind of way, how can you criticize me for not believing?

They say crazy stuff like the vibration densities of the earth, which have no operational definition. They seem oblivious to the idea that modern science is pretty crazy too (at least I think the concepts like dark matter and quarks and all the modern physics are pretty amazing).

It seems to me that there doesn't need to be a separation between these ideas and science. Their fear is that science will reveal that most of these "truths" are theories at best. Science doesn't allow lying because it's all about collecting new knowledge and correcting knowledge – two things that are incompatible with dogmatic faith.

I really wouldn't be concerned about any of this. I think it's completely fine if someone wants to live in blind faith – it's their business. It's when people comment like the woman above that I hate this stuff...

"Robby, I am also the mother of a son like you. He is going through a similar event and is facing severe depression. I myself have experienced a Past Life Regression followed by a Life Between Lives Regression where I was told he is of the highest spiritual beings."

It's completely unfair to claim that this stuff is "truth" when someone's well-being is on the line. I was a very depressed teenager and the last thing, the very last thing I needed was someone spewing crazy bullshit at me and telling me I am depressed because I'm "of the highest spiritual beings" and tell me about my past lives. I needed rational thought and true caring. Not lies.

You can't hide behind the blanket statement "it can't be tested by scientific methods".

You can't have an experience and then state that it's a truth. The only truth is that you had that experience. To go beyond that conclusion and make statements about the nature of reality is faulty at best. I can have a dream – it could simply be my mind creating images and sounds or it could be a trip into a past life. To say conclusively either one is true is faulty.

There are no absolutes in science – all science can be changed and altered based on new data – so don't say that it is narrow-minded. It's not because it changes. It makes assumptions in order to progress. The internet wouldn't have been created if we didn't make assumptions about the nature of electricity, for example.

---

### **Zeb says**

As fascinating as the material is, and as non-skeptical to anyone's perceived truth I am generally... I have grave doubts about this particular method of exploration. Stuff revealed while regressing under hypnosis. As we have very little other avenues to draw on to give us some idea as to what or who is making the crop patterns, for instance, I find it interesting what Dolores Cannon found to this particular topic. I am 100 % convinced that much of this crop phenomena is NOT students with boards and strings having fun with all blue eyed believers in the otherworldly, though some certainly did attempt to take the credit. (Not once have they been able to show how to make one of the more complex patterns!) We have no clue, really. So anyway, I'm open to other avenues of finding things out. I give Dolores Cannon credit for probably being genuine in her own integrity, but just think too much of what is related to her seems too far fetched for me. Nonsense is another word. Still continued to read her book. Overall it left me feeling ill at ease, however. I guess I prefer to say "I don't know" rather than adopt answers from avenues too much like glass-pushing-around-table scenario. Not meaning to offend folks who love this and other books by her.

---

### **Inger says**

This is a clear explanation of what the Author does in her work with past life regressions, the people she meets while they are under the deepest state of hypnosis, the "somnambulistic state" and what the souls tell her about the universe, Extra Terrestrials, and Life on other planets. Fascinating read!
