## **Fish and Chips** Erynn Mangum

Raina Miskin is sarcastic, witty and apparently, a fish-killer. When her goldfish dies after only living a couple of days, she returns it to the pet store only to meet the equally witty and sarcastic Chip, the son of the store owner. Sparks fly and fish accidentally die in this novella about life, God's love and the pursuit of the perfect mate.

## Karen says

Cute story - good escape but wish it could have been more developed. But it was a fun novella.

If Fish and Chips was a paperback book, my copy would be dog-eared and falling apart from all the times I've read it. Author Erynn Mangum has a dry, sarcastic, humorous way of writing that causes me to giggle my way through this book. Every single time. While I have read and enjoyed every book she has written, this remains my favorite.

This story could be subtitled "The case of the dying goldfish". Raina can't seem to keep her goldfish alive which leads to her meeting the manager of the pet store, Chip. Her openness and honesty and dry wit attract him.

There isn't a huge amount of drama in this story, it is a sweet, funny romantic tale that is just perfect and leaves me feeling satisfied. Every single time.

If you've read other books by Erynn Mangum, you know many feature friends who turn into more. This one was straightforward boy meets girl and sparks fly. This is one of those stories that Seinfeld might say is about "nothing." The characters simply go out a few times and realize they really like each other. So you have to like the characters to enjoy their story. Fortunately for me, I did. Their conversations were cute and entertaining.
