## **Lost Alpha: Part 1** Jessica Ryan

Between her cheating boyfriend and her obnoxious brother, Paige Strong is in dire need of an escape from her miserable life in Oklahoma. During a routine drive, Paige gets more than she bargains for when she hits a very naked, very sexy stranger.

Travis Bowshot is a lone alpha seeking vengeance against the vampire that destroyed his pack. He doesn't have time for a human female, no matter how much her curves tempt him.

But after Paige's mundane life crashes into his, Travis can't deny the attraction between them, and it's only a matter of time before he can no longer control his instincts to mate.

Lost Alpha: Part 1 is a 16,500 words werewolf/BBW romance with a little bit of action and mystery sprinkled in. It is the first entry in the Lost Alpha series. This serial contains strong sexual themes and violence. It is not intended for readers under the age of 18.

# From Reader Review Lost Alpha: Part 1 for online ebook

## Ms Lady Jones says

this book has almost no sex. but that doesn't mean its not good. I like the storyline right now and as long as the next book is a full book im in for the ride.

## Mike says

An interesting start to a brief series, while the writing and general situation wasn't overly compelling, the attraction and set-up was enticing enough to want me to continue on to part II.

## Connie says

Loved it! Storyline is fast paced,entertaining and hot. At times, I had laugh at loud moments while reading this book. Loved Travis and Paige's interaction and build up of their relationship. Definitely can't wait to read part two to see what else happens.

## Tia says

The author make the werewolf dude seem downright stupid. It's really odd to read but I am curious how it goes.

## Deborah says

Paranormal romance.

I liked the start of this book Travis Bowshot is the beta of his pack and he's out hunting when he hears his packs cries and screams, running as fast as he can he reaches his village to find his pack destroyed, he becomes the alpha and seeks revenge for his lost pack on the vampire who took them from him. While searching for the vampire he meets Paige a curvy human who's 'having a bad day' this was the part I wasn't so sure about at first, without giving anything away I'll just say that Travis's initial reaction to Paige isn't what I expected and Travis has obviously lived with nature more than the alphas I'm used to, well I suppose really he's an alpha in training but it takes a little while to get used to his ways and appreciate how little contact he's actually had with humans.

I didn't gel with this book as quickly as I do most shifter books but then like I said it's slightly different in that he's not spend much time with humans so he has an adjustment period.

All in all I've decided I quite like this book but I've just checked, the next the next one is 77p for 60 pages which isn't too bad but the third one is £1.79 for only 55 pages which in my opinion is far too much and I hate it when authors do this, yes I understand giving the first one free and charging for the rest but why

charge so much surely 77p for 50-60 pages is enough. So this has made up my mind I won't be reading this series, if they'd all been 77p then I would have considered it but not at £1.79 it's too much for too little.

### **Kathy Harrington says**

Thick, that's what Paige is. Aside from that it wasn't too bad of a start. I am interested to see where his goes.
