this is really good.

Kristie says

Like any Madison Finn, this book is an extremely easy read. but it's original and very seventh-grade too.

Danielle says

I used to read this series back when I was in seventh grade so when I found this one recently I felt nostalgic and decided to read it. It is a fast read the perfect reading length for a four hour car trip. I liked this one because Madison shows character growth and some questions are solved concerning her, Ivy, and Hart. Although, there are still some questions unanswered concerning Madison and Ivy's friendship ending. It has been a while since I have read any of these and I haven't read numbers 3 & 5, so it may have been revealed already. Anyway these are fun books and I will have to see if my sister will want to read them.

Mariel says

It opens up a virtual world for children, and it also shows us different everyday situations, not only the fun ones, yet also the sad and painful ones. Lost and Found was an ok book, but I really liked the net speak here, so yeah.
