Sacked in Seattle: Game On in Seattle Rookies Jami Davenport

*You've met Riley in *Crashing the Net* and Tiff in *Melting Ice*. Now they're all grown up and have their own story to tell.*

He's loved Tiff since high school--but tragedy has blockaded her heart.

Tyee University football player Riley Black has adored Tiff since high school, but she's never felt the same way. As Riley enters his senior year of college, he's finally moving on and enjoying the perks of being a star athlete. Until one glimpse of Tiff unearths all those old feelings of longing and desire, not to mention the trauma of their shared past.

Tiffani Vernon has been running from her demons for seven years. When she's forced to return to Seattle for financial reasons and attend the same college as Riley, she's confronted with the traumatic event which has shaped her future and scarred her memories of Riley. Tiff struggles to avoid her secret high school crush, but he's not having any of it. He's pursuing her with a relentless determination to prove once and for all, they were meant to be together.

Can love finally heal their wounds or will they succumb to the pain and forever wonder what could have been?

Tpagirl says

Sacked in Seattle was the first book in the Men of Tyee series by Jami Davenport. The series was a spin off of the Game On In Seattle series.

Riley Black was the nephew to Cooper Black in Crashing the Net. We met him previously when he was still a child. He had a tough childhood until he found his way to his uncle, a professional hockey player in Seattle. Unfortunately when he was in high school, he was involved in a school mass shooting by a former team mate where several of his friends and teammates lost their lives. Fast forward several years and he was now a senior at Tyee College, where he was playing football.

Tiffany Vernon just transferred to Tyee. She purposely left the area she grew up so she could leave the tragedy of high school behind. Her ex-boyfriend was one of the shooters and she never really healed. However family circumstances brought her back to Seattle for financial reasons.

I loved the premise of the story and had been waiting for Riley's story for a long time. Riley and Tiffany had history and both had crushed on each other; until Tiffany continued to struggle with the shooting. It was a sweet story with little to no angst. The real angst was in Crashing the Net but Davenport did portray the lasting affects of the tragedy and how it continued to impact their lives years after the event as well as addressing a few carryover items from their childhood. Unfortunately it was slow to get off the ground and remained that way throughout until the very end. I was craving a little more excitement.

In the end, it was a sweet start to a new series. Davenport gave us some teasers for the next book, Tackled in Seattle, between Gage and Alisa. I look forward to where Davenport takes us then.

Riley and Tiff have a past no one should ever have to go through. They love one another but since the tragic incident in high school they've spent their lives separated from each other. They meet again after years have past and Riley has hopes of restarting a relationship, Tiff is not so keen.

This is a deep story with a dramatic, tense story line and heart breaking consequences, but there's also laughs, exciting sports action and love.

Another great read from Jami Davenport, I'm looking forward to the next exciting story from the series.

Stacy Barr-sooter says

Riley and Tiff have a history that people there age shouldn't have. Since high school they have loved one another yet couldn't be together because of their tragic past. Riley didn't have the issue Tiff did! This book is full of laughs, drama and twists. This is a stand alone book and the starter for this series. However it is a spin

off of the series Game on in Seattle. Riley is the nephew to the character in the opening books of Game on in Seattle series. Keep your tissue handy you will need it. Jami knows how to put pen to paper with her thoughts. She pulls together events I didn't realize could be put together and I loved it. Life events happen and she writes about them. Haven't read a book from her yet I didn't like.

Sacked in Seattle is a book you want to have on your shelf!

Riley Black had problems as a teenager, his mother abandoned him, a tragedy occurred while in high school and the girl he loved running away. But he moved on, did some growing up and was now one of the stars of the local college football team. He had it all and was enjoying the perfect life...that was until one night when a ghost from his past appeared. While at a college party imagine his surprise when Riley saw Tiff there and realized that he had never stopped loving her. Now he just had to convince Tiff that it was not just a high school crush, but true love. Would he have the patience and understanding for her constantly pushing him away?

Tiffani Vernon had struggles in her teenage years, ones that you would not wish on your worst enemy. They all hit her so hard that she believed if she ran away from Seattle, then everything would stay there and she could move on. But nothing was as far from the truth, especially when she was forced to come back for financial reasons and finish her final college year at the same one as Riley. A boy she had not just secretly crushed on but loved and hidden it all away when the tragedy occurred. When he saw her, she ran again but Riley was persistent and would not let her run away from him again.

There was just one more problem at hand.... neither one of them realized that in order to truly move on in their future, heal properly, and have this relationship a success is that EVERYTHING that had happened in their past had to be out in the open. No more secrets for either of them...

This is a unique book as not only is it a stand alone but it is a continuation of one series while starting up of another. In true Jami Davenport's fashion it is an attention grabbing, full impact book that you do not want to put down until you are done with it. The characters, the location, the story, all come together perfectly. Definitely one you want to add to your collection.

This is a new sports series by Jami Davenport. I first fell in love with this writer with her hockey series. Hockey is my weakness, but I have to say I loved this book. There is so much beneath the surface with the two main characters. I clicked the first page and I was drawn in a web of lies as well as omissions. The plot was great and so were the people. This is a great second chance romance.

Riley and Tiff meet in high school. Something awful happens and they form a sort of bond. He is there for her every step of the way. Just when Riley thinks he has his chance Tiff is gone the next morning. Fast-forward a few years later and they have both grown up and moved on or have they? There were times I

wanted to throttle Tiff and times I wanted to say talk to each other. You are being your worst enemy.

Both Riley and Tiff have some major demons. I don't blame them. What happened to them seven years prior was devastating. There is push and pull but mostly by Tiff. Riley knows what he wants and he does what he has to just to make Tiff see the light with the help of his friend Gage.

They see each other at a frat party. When their eyes meet all those feelings come rushing back. The Tiff does what she does best and runs. That doesn't stop Riley. He wants answers and he wants her.

There are such a plethora of emotions in this book. What a rollercoaster ride and I loved every second of it. The best friends and family are great, they say what is on their minds and don't sugar coat. Now some of the people some of the time I wanted to hit Coop. I understand a bit where he is coming from and he doesn't want to see his nephew hurt again. I loved reading these two grow. They became so much more once they let go and started to heal. I felt the book just ended kind of abruptly. Now though this is book one so maybe we will get to see more in the next book and I am hoping it is Gage.

Wow, I absolutely loved this book from start to finish, I was totally hooked from the first page and read it in one sitting. This is the start of a new series and I seriously cannot wait to read the rest of it! I have to say that this is the author's best book so far. This story is Riley and Tiff's, they had feelings for each other in high school but a tragedy ripped them apart. Tiff tried running away but now she is back and has to face the past to be able to move forward. What she wasn't expecting was Riley, he's always loved her, she ripped his heart out previously but he's not going to let her do it again. Can they both face demons from their past, move on and give love a go? You will have to read to find out!!

This book really does take you on a roller coaster of emotions, you follow Tiff and Riley through heartbreak, acceptance and love, their path isn't a smooth one but I was rooting for them from the start, keep tissues handy as you will need them.

Crystal's Book World ~ Crystal Cordova says

Oh I love to read Jami Davenport's Sport Romance Novels! I was so excited to start the Men of Tyee book with Sacked in Seattle. I squealed with joy when I found out the book was Riley and Tiff's story! They are all grown up now! Even though Riley never stopped loving Tiff, he didn't realize that they are still broken. Riley may feel that he has healed from a dreadful day from his past, but did not realize he was broken way before then.

Tiff is trying to live day by day. She tries to move forward but has not really let go of the past. When she comes back into Riley's life, I was shocked of the little support she got from his family. No one really wanted her to be around him. This story was so different on so many levels, but for a heroine to have to redeem herself was something different. It's always the male that is the a*hole, but this time around it was Tiff.

Slowly Riley made Tiff open up and we saw her for her true self. She was amazing.

Sacked in Seattle caught my eye with football, college days, and love that never dies. The drama that these characters go through was stomach twisting. I am predicting the next book of the series will be about Riley's best friend Gage. There was a story building up on the sidelines and I can hear Gage saying he will be back. This series can be addicting for me.

Misty (Reds Romance Reviews) says

Riley Black has been holding out hope for a long time that his friend and crush would see him as he sees her, and finally give them a shot at forever. He knows the sparks bouncing around between them mean something... if only he could find a way to get her to admit it too. They share a devastating past, and also a night of passion that he has never forgotten, and he wants nothing more than to recreate that night and keep it on repeat. And now that she is back in town, attending the same school, he knows it's now or never... he has to make his move and finally get his girl!

Returning to Seattle and signing-up to attend Tyee University has been an unnerving experience for Tiffani Vernon, mainly because the town holds so many memories, some very bad memories, but she is ready to put them behind her and move on once and for all. But in order to do that she must face the source of some of those memories too, her friend Riley. She has harbored a crush on him since high school, but it has never been the right time to explore all the feelings and sparks they share... then again maybe now is the perfect time!!

The moment my eyes hit the page, the words took over and I found myself hanging on to every one of them, it was quite evident this one was going to leave a serious mark... and boy did it ever!! These characters got to me early on, they had my emotions churning, and had me teetering on the edge of my seat in hopes they would find a way to deal with their devastating past and possibly find love along the way too. And without giving too much away, I will just say I thoroughly enjoyed what I found, it was a second chance romance that checked all my boxes and left me smiling! Highly recommend this one, the stunning story line will grip you from the first page and have you hanging onto every word long after the page is swiped!

I voluntarily read and reviewed an advanced copy of this title.

Rejane says

Can't deal with the (un)reasoning in this plot.

I understand people deal with stress and problems in different ways. But saying you didn't "end everything" (suicide) because your love for a horse (I am not saying animals are not important)? And not thinking about your family? People who cared about you? How selfish and ungrateful a person can be? And treat the hero as if he was the shooter at the school cafeteria? Like somehow it was his fault when he was her savior? That's bs. She acts as if she was the only one at the cafeteria. Like she was the only one affected by the circumstances. Just because the shooter was your boyfriend and you didn't see it, you didn't read on him before? Get over yourself. Don't treat people like disposable items because you can't deal with your problems.

I have zero sympathy for this heroine. I think her struggling and heartache are fabricated. The plot is not

convincing. This thing of “I am a broken soul and I will bring him down with me, I am going to shatter him with my sober pathetic existence “ is so lame.

The guy was there with you. He knows exactly how traumatic the event was.

I’d better stop reading this when I think the fmc should have taken that bullet.

And I am not sorry for being a cold, hard soul bitch. I will not read a book that is using this sad, horrible, devastating thing that’s happening so often in the real world destroying families and lives just to create drama and pull on our heart strings. It only makes me annoyed.

Sacked in Seattle we find ourselves meeting Riley Black & Tiffani Vernon once again. Seven years have passed but the past is still at the forefront of their lives.

Riley is now a college football player, but he always felt something was missing when Tiffani just up and left one day.

Tiffani has come home not by choice but by circumstance. When she finally sees Riley again all her emotions come racing back but can time heal everything she is hoping that you can leave the past where it belongs and she can move forward with the one person she knows can get her be the person she once was. When we first met Riley & Tiffani they were secondary characters in Coop's story but as they move to the front of their own story you find out just how amazing the two of them really are. We also see how two people can overcome so many different kinds of emotions when you have the other to lean on.

Isha Coleman says

Sacked in Seattle is the kind of story that draws you in from the first. Riley and Tiffani live a journey that is built on emotion. From heartache to guilt these characters are haunted by a history that is as tragic as their ever burning love. Tissues required. Once the trip begins, it's hard to walk away until the end.

Laurinda says

I honestly thought this was just going to be a typical sports romance when I sat down to read this book. Which would've been fine because I really enjoy those.

Wow was I wrong! It was so much more. I was pleasantly surprised.

It isn't even a typical second chance romance. I don't think this book could be called typical at all.

It was heartbreak, emotional, and beautiful all at the same time.

I couldn't put it down, and had no choice but to read it in one sitting. I NEEDED to know if Riley and Tiff got their HEA!!

I don't want to give out details of the story, as I feel it would be better for readers to go in without knowing. Needless to say, this book is a must read!!!

I've never read anything from Jami Davenport before and so it was easy to go into this with absolutely no expectations. I didn't check out any of the advance reviews and went in thinking this would be a light, fluffy, sexy and easy romance read. Boy, was I ever wrong. Not that this wasn't sexy and romantic, but it definitely wasn't light or fluffy and the characters most definitely didn't have things easy.

After a traumatic experience that they both shared, Riley and Tiff bonded and secretly fell in love. And when I say secretly, I mean she knew that he loved her, but he didn't know that she also loved him. Get it? The night of high school grad, they finally came together physically and it was an existential experience, at least from Riley's POV. That is until the next morning when Tiff is nowhere to be found. See, she hightailed it to California, never to be heard or seen from again. Until three years later when she shows up enrolled at the same college as Riley. Now that she's back, he has no intention of letting her go. But can he get past her concrete walls and show her that they can be each other's forever?

I didn't like Tiff. There, I said it. My opinion of her did improve by the end, but not in any dramatic way. I went from "***I hate this chick SO MUCH***" to "***Well, she ain't half bad***". I guess my affection for her all depended on how she treated Riley because ***RILEY WAS PHENOMENAL!!*** I get why Tiff had her walls and fears and hangups, but if anyone had a reason or right or privilege to have those, it would be Riley. This young man had it hard and I was so happy that his life was just steadily improving day by day. This author created a sweetheart of a character when it came to Riley and he was beyond easy to fall in love with. So when, at every instance, he was throwing himself and opening his heart to this ungrateful wretch, who kept turning him aside and hurting him at every turn, my heart went out to him and my fists clenched to hit her.

So now that I've read this story, you better believe I'll be staying tuned for what's next in this series. I have to know how Gabe fares and I hope there's a book for him in the future. And I hope to see Riley again too.

Tiff and Riley are both Sacked in Seattle by love!

This is another excellent steamy sports romance by an excellent sports romance author! Tiff had a rough high school career running away right after graduation but now she is back and not prepared to face love. Riley had a rough life before he came to live with his aunt and uncle but has loved Tiff for years. I received a gifted copy. I am voluntarily leaving an honest review. I honestly love this story and this series!

Sheena says

Great new series...

First in a great new series by this prolific sports romance writer.... this is a second chance, young adult love story with two individuals who both have issues to conquer from their pasts including a shared traumatic experience....

This author is expert at creating imagined worlds and populating them with intriguing and believable characters; even more skillful is the way all her worlds dovetail into each other so characters step seamlessly from one world into the next.....

In this book Riley and Tiff take centre stage.... their star-crossed relationship is full of emotion and sexual tension they are such a well matched couple I could not help rooting for them even though at times Tiff is frustrating as she agonizes over her feelings for Riley..... the supporting cast are also fascinating Riley's best friend and teammate Gage and Tiff's friend Alisa, in particular, are both complex characters I would like to read more about..

This is an engaging story full of interesting characters.... a new series that I am really looking forward to reading more of over the coming months... This book was reviewed for Summer's Eve Reads...
