The Taking of Trevor Ward G.M. Frazier

A 7-year-old boy in rural South Carolina...

An FBI counterterrorism task force...

A GITMO detainee...

What could they possibly have in common?

Jake Bond is not your ordinary private eye. A retired army colonel, Jake has a "gift" inherited from his father and honed throughout his years in Military Intelligence. High-powered attorneys from around the country have made Jake rich paying him to do the impossible--and he always delivers. Even the FBI and state law enforcement agencies call on Jake Bond for help when all else fails. But when a routine assignment from a divorce lawyer sends Jake to the foothills of the Smoky Mountains, he suddenly finds himself in the middle of nowhere and up to his neck in a child abduction. When an AMBER Alert goes out naming Jake as the kidnapper, the stakes get personal, and Jake is determined to get to the truth and find the real kidnappers and their motives before it's too late.

Love this story...it was good, never put my kindle down, had to finish in one sitting. Will read the other books. I like the gift.

Samantha says

This book was really good! There were places where I was surprised that Bond didn't pick up on something but then later it would allow everything to make more sense for him. This is a fast read and a well written book. There is some language in it but nothing that distracts from the book.

Misty says

This was a high intense story about a child abduction. The PI was prior military. It is wonderful story from the first to the last page.

Angel says

This book is nearly impossible to put down once you start reading it. The mother in me felt the fear of Alice Ward as I was reading it. I look forward to reading more books by G.M. Frazier

Margaret says

I loved this book and wish it would go on, and on. It was an easy read and truly had many twists and turns. The characters were well developed as was the plot.

Gayle says

Following on the heels of his best-selling DEATH ON THE WOLF, Gary Frazier brings us this novella as an Amazon single.

Released only as an e-book for Kindle, this is a fast paced story about Jake Bond, a private investigator who was born with an amazing gift. He can find clues that nobody else sees. He's often called in on cases that stymie law officials.

When he's called in on the disappearance of Trevor Ward, a child who was abducted from his school, things

run amuck when the Amber Alert lists Jake as the abductor.

Time is of the essence and Jake knows he has to find who really took Trevor and why. He has to do this while trying to keep from being arrested for the abduction.

The suspense kept building and I kept reading. One sitting is all you'll need.

Don't miss this tale, free with Amazon Prime, otherwise reasonably priced.

Roderick Baxter says

Fast Paced and Tense.

Lots of fast paced action in this story. I loved the few twists and turns in the story. I was kept guessing nearly all the way through.

Miriam Giles says

This was a great book with lots of twists and turns. Jake is a great PI with extra ordinary skills. He saw everything that others didn't. I read this book in one setting, couldn't wait to see what was going to happen. I give it five stars. This is the first time I've read this author.

Lindsay says

I was lucky enough to win a copy of this book through goodreads. It is a super fast and easy pleasure read about a PI and a missing child. The plot twists and turns just enough to keep you guessing and trying to predict how it will all unfold.
