Half a world away in Spain and running from his past, a Los Angeles gangster unwittingly takes a train that's headed straight into a terrorist attack. He survives only to face an even deadlier threat.

On that same train: a virologist with clues to a deadly epidemic. Did his secrets die with him in the strike?

Raging in the aftermath, a foul-tempered police chief with a daughter caught in the attack thirsts for revenge. But against whom?

An orphan child without a name, disappears down a dark, illegal CIA mind-control programme. Now trained in the ways of death, he prepares to do his master's twisted bidding.

From its first pages, the relentless techno-thriller White Horse drops you with a thunderclap in the middle of these colliding worlds. This tale of global conspiracy that threatens humanity itself will keep you guessing whether anyone can survive.

## **Michele Strople says**

### **Action packed**

5 stars for the nonstop action and realistic characters. The plot is scary if you think about it too much. If it can be imagined, it can become reality

---

## **Lynn Hallbrooks says**

From what I understand, as a fan of the authors, this is the beginning of a series of eight books. I suspect they will become very popular.

This is a mixture of International Intrigue, Historical Fiction, and Medicine genres.

Hugo Reese, a former gang member, is in Spain visiting relatives. As he is traveling to his next destination his world is turned upside down. He is no longer a visitor but a wanted criminal and he has no clue how to clear his name. Elsewhere, a group of colorful doctors have plans that may or may not be for the good of the world.

I really liked how the authors have interspersed the backstory for the main characters. I have a feeling this will become important as the stories unfold.

Warning: There is Violence as well as Adult Language and Situations.

---

## **Nogueira says**

Hugo grew up on the streets of LA as gang member... After another bloodbath, tired of all the violence he goes to Spain to visit his family in search of a bit of tranquility and maybe to start a new peaceful and quiet life. In a train he meet a famous virologist on its way to a conference in Madrid to present a breakthrough study about one of the worst virus in history that killed millions of people 100 years ago (I've lost several members of my family in the pandemic Spanish Flu). Unfortunately for Hugo a well organized terrorist group wants to grab the doctor's work and is willing to kill and destroy everything on the way to getting it, starting with bombing that precise train... Hugo survives the explosion taking the doctor's iPad and soon he sees himself chased by the terrorists and also by the cops that believe he is one of the responsables for the attack, his only hope is trusting his life in a group of anti-establishment renegade he just met...

This book was a great surprise! The story is really good, with non stop action and thrills, very well written the society descriptions are awesome and super complete (it's set on a near future, with some political differences and a much more controlling governments - very plausible and probable by the way) and the thing I liked the most was the character construction, there's a lot of them but all are well presented and the

stories merge in a intelligent way. I specially liked all the background about Jamall and the terrorist group (really amazing and scary stuff) and I trully loved reading the secret diary of a US army medic that testified the outbreak of the Spanish Flu back in 1918.

Two days ago I've picked this one randomly on my Kindle (had downloaded it for free several months ago) just to kill some time on a sunny afternoon by the pool and I couldn't put it down and yesterday night I wasn't able to stop reading until I reach the end, and that's exactly the thing I expect on a thriller book! I'll definitely will read the next installment "Red Horse" and I hope the authors release all the four horses of the apocalypse with the same quality, I think I'll collect them all...
