It works? Which is interesting because you wouldn't think it would. I've never been a huge fan of Jane Espenson, I either get into it or I don't. She takes risks with interesting stories, but sometimes they are too far out there and don't really seem relatable or valid within the world (I felt this way on her TV show episodes too and even more so during Season 8).

Spike is cute, I get it. He's quirky and that's why this works. It's a cute little side story and makes his entrance in Season 8 somewhat easier to understand. Is it amazing? No. Made me chuckle on the inside a few times.

This short, *short* Spike story has both good and bad. I am reading this story from the Buffy: Season 9 Library Edition book, after having read Buffy Season 8 in its entirety and Angel: After the Fall, as well as Spike: After the Fall and Spike Vol.1: Alone Together Now and its sequel. I think you really have to at least read Spike Vol.1 and 2 (Alone Together Now) to get these little short Spike tales from beyond the stratosphere (it is a must, if not you are missing out on a lot of context).

And while I was all caught up on everything that has happened until now, or so I think please correct me if I am wrong, I still did not get why Spike decided to go back into Space with his band of merry bugs. He had JUST gotten back to Earth! TO BUFFY, to be by her side and help her kick ass. So I was a little confused because when I saw he was in space I thought the story was about to explain what had been going on since the end of Spike Vol. 1 & 2 and the moment he returned to Earth at the end of Buffy season 8. So that was a bit disappointing.

So now that we know what we are actually getting to, just some side small adventure out of space were we see Spike assimilate amongst the bugs he is master of, we can continue to look at the story based on its merit.

So, all in all, this small 10 page story is actually pretty sweet. Spike is out with his bug crew, exploring the galaxy and what not, and they run across this huge monster that needs its ass kicked. After the weirdest battle to date, Spike decides he has had enough and he wants to get his marble ass back to Earth. The bugs proceed to tell him it will take one and a half thousand hours to get back to Earth. The rest of the story is Spike hanging out with the bugs, assimilating to their way of life, and pretty much counting down the days.

Overall it is pretty sweet, even if it doesn't add much to the overall story. It is a filler, plain and simple. It was fun seeing Spike take charge of the bugs and be their leader, not to mention we get a glimpse of Spike doing poetry for the bugs and you know how well that usually goes for him (the bugs seemed to love it though). Overall if you are a Spike lover you will be happy after reading this, on the other hand they have yet to tell us what happened after Spike left Earth in pursuit of Wolfram and Hart, huge downer, or even what made him come back to Buffy in her hour of need at the end of Season 8.

Finally you see Spike come back to Earth, and we see Buffy acting all tough (and kind of girlfriend possessive-ish) and asking him if he is home for good. Good lord, if these two don't get it on soon I might

just become an unbeliever. #Buffy+SpikeForever

A good side story into the world of Spike during season nine. It introduces us to the fact that yes, Spike is back and he's not going anywhere! After showing up again in Season Eight, I knew there was more to the Spike story, characters never come back to the Buffyverse just for one issue/episode. However, I did not think that the reader needed a whole issue to tell us what Spike had been up to and what his plans were next. We could have waited for Spike Season Nine Issue One. While I enjoyed the story and it was a nice fun read, I just thought it was not completely necessary.

Cute. I like Spike's quirky side. I like the inclusion of space and alien species in the Buffy universe. And I like a little non-Spuffy heartache fluff for our bleach blonde vampire.

Fran says

Odd, but likable.
