Kim M-M says

This book, as usual to their style, contained a lot of information on the recipes that they choose. My criticism is that I don't think their choice of recipes for each region was the best, my expertise being in Caribbean cooking. There wasn't even a recipe for borscht in the Russian region!

Still a good starter, but not the authority in regional cooking.

Margaret says

Oh, I love this book. Everything I wanted to know, from perfect fish & chips to real falafel, tzatziki, and so much more. Tested and re-tested until just right. Thank you, ATK!

Chels says

Making my way through. So far super fun, relatively easy recipes to make. Tasty results. Good tips on how to improve cooking technique.

crystal says

if you like the magazine, this is for you! i've already made several of the recipes, and they're awesome, as expected. great book, and lots of additional tips/info for reference.

Amy says

This is a fun read. Seriously :) if you like to read cookbooks. You can learn some fun stuff about various countries and what kinds of foods you are likely to find there. It contains a lot of recipes I am not likely to try, unless of course the next family party is a Russian party (after everybody has finished reading "Train to Potevka").

Margaret Dee says

This is the 2nd time I have taken this book out of the library. Always some interesting tips.

Ally says

Some really awesome sounding recipes. Yea, the book isn't too well organized but the information provided is great. They writers explain all their decisions that went into writing each recipe, why they chose this over that. That sort of thing. I'm excited to start cooking!

Catherine Woodman says

this series from Cook's Illustrated is inspired--all of the cookbooks are excellent
