I thought the name 'Nightside' was cool until I heard it mentioned about 10 more times in the space of 15 pages. I dearly wanted to enjoy this read, because I really saw potential for a snappy, witty, entertaining read with some of the turns of phrase Green employs. Unfortunately they were so bogged down in amateurish writing and cliches that I couldn't continue. The main character suffers from a serious case of "Nobody talks like that," and I wonder if the book could have been improved upon with some editing and a switch to a third person perspective. The Dark Heart of the Nightside had potential to be clever, but seemed all too aware of that potential and fell over itself trying to be. And that was the biggest impression that I got from it overall: everything about it was trying too hard.

### Omnibus of books 5 & 6 of "Nightside" series.

*Paths Not Taken* (Book 5)

*Sharper Than a Serpent's Tooth* (Book 6)

## Frances says

Quite violent for me but I enjoyed the story otherwise.

Ah the last of the nightside omnibus's read up (ok I know there is another one but the rest of the series I have as single titles and to be honest I am pleased that I have) the book is rather tricky to read when you have two books in one and the introduction sort of feels irrelevant at the start of the second book since I had only just finished reading the previous book a few pages earlier.

Anyway I do love the reference to not only a twisted version of our own reality but also the references to London itself - ok some of them do come thick and fast, so much so that it feels like Mr Green is simply throwing them because he had such a great idea and was determined to use them come hell or high water. And for that I think it lost a star - however there is a truly fascinating set of character, almost a parade of the bizarre and the grotesque however all of them are fascinating and appealing in their own way -if Nightside is

their home then then ARE the nightside - and in this volume you find out that is closer to the truth than you realise.

The whole concept is a great Idea and I like that even though there are truly catastrophic events approaching the series goes on - it does make you ask the question, if they got through that what else can they have thrown at them. Well I guess I will be finding out shortly.
