**Seal's Professor: A Military Roommate Romance** Piper Sullivan

**Girl genius**

**Dr. Watson**

**People call me a lot of things, nerd, Brainiac, but I prefer Laney**

I started college when I was eleven and now I'm a Professor.

I've never seen someone as masculine, as beautiful, as intense as Bennett Atlas.

Steely blue eyes and a killer smile.

I thought maybe he and I could be friends.

Then someone tried to kill me, and he became my protector.

My roommate.

**Navy Seal**

**Badass**

**I loved all those names, but I loved when she called me Bennett best**

I worked hard to become a SEAL.

Doing my part to keep my country safe.

Which includes playing bodyguard to some nerdy professor.

Only Laney is no egghead. She's a brilliant and beautiful scientist who had no idea how amazing she is.

I was only sent to protect her.

But when the time comes, will I be able to let her go?

**Author's Promise:** A Steamy Bad Boy Nerd Romance with a HEA ending. Bonus content is included for your reading pleasure.

Delaney and Bennett are the perfect blend of sweet and steamy! Delaney has always been set apart from the world by her amazing intellect. It was apparent from a young age that she was gifted and so that she could put her amazing brains to their fullest she has been living at Stamford since she was eleven! While that fostered her intellectual development it stunted her interpersonal relations leaving her woefully behind in terms of social niceties and general experiences. Her work means everything to her and has implications that could change global energy production. Bennett was sent in by his CO to protect Dr Watson and her research at any cost. They cannot let a foreign power possess or suppress this breakthrough. He was just supposed to pose as her TA and figure out who among them is the one looking to harm her. But the more time he spends with Laney, the more he falls for the brainy beauty. Protecting her now is but only his job but his mission in life.

This is a unique SEAL story. Is fun, quick, well written, lovable and sexy characters, and sexy times... you name it! You cannot go wrong with this one, well is usually like that with Piper Sullivan's novels, but I reallyyyy love this one!

Dr. Delany Watson has a brilliant mind. She is a genius, at age 12 she was studying at Standford! She is a little socially awkward but not in a way that make others feel uncomfortable. Besides been brilliant she is a very very beautiful woman even though she doesn't know it. But most important is that she is on the verge of a major breakthrough in renewable energy.

Bennet Atlas is a SEAL and his mission is to protect Delany even when she do not know she is in danger and that he is there to protect her. He didn't know that she was a beauty and a very likable person. He has the hots for her and at first he didn't make a move, but when she gets in danger for the first time all bets are off. He have to have her. But will he want to keep her? Or will she want to keep him when she knows why is he there for?

This book was a fast read for me, I couldn't put it down till I finished it! I devoured it in one day! Such a great story, the cute innocent genius falling for her SEAL protector. There's a lot of heat, danger and love in this story! Absolutely loved it.

I received this ARC in exchange for an honest review.

## **Brandi says**

I love the story with a brilliant professor and the alpha protector.

Delaney (Laney) Watson is one of the smartest people in the US. But she isn't one to rub your nose in it. She tries to make things easier for other people and now is trying to make the world a better place. But that's the issue, with her research she is now a target by people who don't want to lose out on money or power. That brings in Navy SEAL Bennett Atlas. He is there to protect her only she doesn't know it. She even lets him rent a room from her so he is there all the time.

She is attracted to him but doesn't think he is attracted to her since no one has ever showed her true interest before. But Bennett quickly lets her know that is not the case and soon the 2 are involved. But what happens when feelings get involved and the truth comes out, plus there is still someone after her and her research...

Cute, funny, fast read.

### **Good storyline, interesting science aspect**

I really liked the science aspect in this book. The characters were likable but I would have enjoyed learning more about them to get me more invested in the story.; there was little character development for Laney and absolutely none for Bennett. The storyline was interesting. Chemistry between the two was good.

I liked how protective Bennett wanted to be, however he was a very poor bodyguard; on at least four separate occasions, Laney identified signs of danger (noises, being followed) when he was clueless. She was more aware of her surroundings than her supposed bodyguard was!

I did get annoyed at the severe lack of commas, especially the ones that altered the meaning of sentences. And Laney was made out to be unbelievably innocent using language like "gosh" and "oh my goodness." So it had a few issues that bothered me and didn't have much depth, but still a good read.

## **SouthernAngel says**

An intriguing and action packed read with some danger, suspense, and drama. When the sparks fly between an independent and strong-willed woman, and an alpha man, a lot of steamy scenes ensue.

A fast paced suspense, mystery, and romance all rolled into one!

I received this book as an ARC in exchange for an honest review.

Delaney is one of the smartest people in the world and someone wants her dead because her research is going to change the world. Bennett is a Navy seal who has been sent to protect her with Delaney's knowledge. She doesn't even know that her life is in danger when Bennett is assigned as her new TA.

As the mystery unfolds and Delaney pieces together that her life is in danger because of her research, she becomes closer to Bennett and knows that she has to finish what she is working on. Together they have to come up with a way to catch who is responsible for wanting Delaney dead and who wants to steal her research.

Bennett's entire life has been the Navy seal's and now there's a little red head that is grabbing his attention and is starting to mean a lot to him. He knows he has to figure out who wants Delaney out of the picture before he loses her forever.

### **Judy says**

This is a unique story about a young woman Delaney who is a genius and leaves home at 11 to attend college. Now Dr Delaney Watson is making strides on revolutionary research and is in unknown danger. Bennett has become Delaney's TA with the disguise he is trying to figure out what he wants to do after the Navy as a Seal. He is a smart man and able to pull off he is undercover to protect Delaney. Some unusual events occur and Bennett needs to figure out what's going on and who has betrayed her and sold out to some unsavory individuals. While Bennett takes care of Delaney he can not help but care for her. They fall into a routine living in the same house and end up allowing their undeniable attraction to one another take them to experiencing each other. After all Delaney has gone through it has only allowed her to become an amazing well rounded woman! I loved how Bennett did what he had to in order to make the next step to his future. This is one hot sexy action filled story. I received an Advanced Reader Copy of this book and I am leaving a voluntarily review.

Another great story by Piper Sullivan. This author never disappoints! Delaney is a genius and a Professor at Stanford. She has lived there and attended college since the age of 12. She's working on her second phd and in the middle of amazing research that will put an end to the United States dependency on overseas oil companies. Unfortunately, some people don't want that to happen so she's in danger. Navy Seal Bennett Atlas has been sent undercover to protect her in the disguise of her teaching assistant. Only thing is, Delaney is not quite so smart in interacting with people and doesn't realize the danger she is in. Bennett ends up becoming her roommate and sparks fly from day one. An intimate relationship could jeopardize the assignment and Bennett tries to fight it but in the end, both give in. Hot and steamy is all I can say! Wow! Next come the attempts on her life and home. A crazy roller coaster ride full of action, danger, blow your mind sex, and science. So much happens in this book. Such an awesome read that you need to grab now! I voluntarily reviewed an ARC of this book.

### **Viper Spaulding says**

Wow - this book has it all! A smokin' hot hyper-protective SEAL, a feisty. sweet, adorably nerdy professor, plenty of action, and even more burning-up-the-sheets action! Dr. Watson - Laney to her friends - is about to complete her breakthrough research project and someone at the university is trying to sell it out from under her, or kill her to get her out of the way.

Bennett is a swoon-worthy hero in every sense of the word. He doesn't want to fall for Laney because he knows relationships don't work with the demands of a Navy SEAL. Laney is beautifully written; the author really captures her super-intelligence without making her lofty or arrogant. She just wants the experience that comes from sharing an intimate relationship; she knows there's likely no chance of it becoming serious but she goes into it with her eyes wide open.

This a unique story with lots of twists and adventures in store, along with a deeply emotional love story that is simply a joy to read. I really enjoyed every page, every paragraph, every step of the way. I voluntarily reviewed an ARC of this book.
