The Enforcers: Kane Anastasia Wilde

Never trust your heart. Kane Colton, Enforcer of the Silverlake pack, has lived by those words for ten years—ever since Selina Douglass captured him in a sick mating bond that led him down a dark path and turned him into a monster. Now he only cares about three things: protecting his packmates, watching his blood brother's back, and keeping his wolf's bloodlust under control. Friends and romance are luxuries he can't afford—until another woman from his past turns his life upside down.

Rachelle “Raven” Winters has come a long way from her old life as a scrawny street kid in the back alleys of Seattle, where her only protector was a lone wolf shifter called Hunter. Now she works for the Agency, a secret organization illegally hunting genetically altered shifters. Her latest mission is to track down the leader of a gang of criminal rogues: Selina, the woman who lured Hunter into her corrupt web and destroyed him. The last thing she expects is for the trail to lead her to Hunter himself—Kane Colton.

It only takes one chance meeting to find out their platonic teenage bond has turned into full-blown, red-hot passion. But Selina is more powerful than ever—and she never lets go of anything that was once hers. Now Kane and Rachelle are locked in a deadly game of cat-and-mouse with a woman who could destroy them both—and trusting their hearts is the only way to save each other.

Really A Very Interesting Story. Over 18 + Reading

As in the other Silverlake Shifters story this was good. Rachelle (Ki-rin) and Kane (wolf) love story was sweet. Starting as kids on the streets together leaning on each other to survive, till them were separated for life's different roads. Fate leading them to finds each other again 10 years later both on the same kind of job , both undercover for different agencies, both with to many secrets, finally realizing they are mates. Kane's pack mates Jace & Emma, Race & Terin, and Jesse & Sophia also play parts in this story.

A good read that had tears of laughter rolling down my face at one scene.

I would recommend reading the previous books in this series to understand the differences in Kane's character.

We definitely see another side of Kane and find out why he acts as he does. Gone is the stoic, arrogant wolf who kept butting heads and challenging his alpha.

So sad about his past but it was not all his fault, first a bad example for a father then Selina.

Kane and Rachelle have a past history. They were both street orphans named Hunter and Raven and looked after each other until Selina got her claws into Kane.

Fate has them bumping into each other working the same case, except Rachelle has lots to hide from Kane.

Nowadays Rachelle is an undercover agent for an unsanctioned illegal agency who sound very suspect.

Meeting Kane whom she knew as Hunter 10 years ago causes a conflict due to her secrets.

The water fight scene at the lake had tears of laughter rolling down my face.

A long time ago when Hunter was a street kid he had a friend, Raven who he had betrayed when he'd gotten involved with the wrong woman. Though years later he had taken a new identity, Noah, and had broken away from the twisted control of Selina he was still feeling the effects of her manipulations.

Raven has grown up and left the streets and her old name behind, now called Rachelle she works for the Agency and runs into Noah during a job. And though they are both wounded emotionally and are afraid to trust each other they work together to bring down Selina and along the way they find love and healing.

This is a NON-SPOILER REVIEW. The Enforcers: KANE by Anastasia Wilde is Book 1 in the Silverlake Shifters spin-off series Silverlake Enforcers. If you haven't read the Silverlake Shifters series, there are definite spoilers if you start with this series (and trust me, you are going to want to go backwards and read

the Silverlake Shifter series once you meet all the characters!). This is a compelling read. From page one you are hooked, by chapter two you're addicted and on the final page you are begging for more! Raven and Kane's story is sad, funny, chaotic, romantic, steamy and heartwarming. I found myself grabbing the tissues a couple of times. The characters are so well developed and the relationships continue to evolve. This story gives us an amazing view of pack and family! As the first book in a spin-off series, I can't recommend it highly enough. Kane sets the bar high for the next books (Israel and Noah).

Amazing

I cried ugly tears, I had no clue what hid inside Jane and I wasn't expecting so much damage and hurt to his soul. Of course I expected something horrible but what happened to him? Be prepared to cry. This was a good story, the best I think so far about the silverlake pack.

New series, I was looking for a decent PNR, and this came up on my Kindle app. Shapeshifters, old loves, tormented past and secrets ... a looked like the makings of a good book. I enjoyed it and am working through the other related books by Anastasia Wilde.

Kane Colton is the Enforcer for the Silverlake pack, after their original pack was decimated in tragedy, sending all the young wolves scattering to fend for themselves. They have set down roots in Silver Lake and are rebuilding their pack. Kane spent 10 years fending for himself, before old pack mates seek him out, he has secrets that he hopes they never figure out. Things he's done that he's not proud of.

Rachelle "Raven" Winters, grew up on the mean street and has managed to pull herself up and make something of herself. She is shocked to 'Hunter' again after all these years.

4 stars.

Hunter and Raven

Wow! This KU library selection is my favorite of the Silverlake Shifters and Silverlake Enforcers so far. It is mesmerizing and another non-stop read from Anastasia Wilde.

Kane Colton is one of the original pack members, but became separated from his childhood friends when their pack was destroyed. He made his way to Seattle, where he became "Hunter" and befriended a young girl, Rachelle "Raven" Winters, whom he protected. Hunter was lured into a gang and lost track of Raven, but after he broke away from the gangleader, Selina, he and a friend looked for her for years, eventually giving up the search, believing she must be dead. Now he's the Enforcer of the Silverlake Pack and working a job for the Council providing additional security at a shifter owned and operated casino and resort. There he finds a woman named Raven singing a song his Raven sang to him back in Seattle. But who is she, how

does she know that song and what's she doing there?

Kane and Rachelle have been through a lot since they parted as teens in Seattle a decade earlier. They are stronger now, but are going up against a powerful and evil force that will tear them apart again, or die trying.

Soul lifting

I love the way even as a teenager their mating bond began and didn't get lost or broken even with a ten year separation. I also like How the light of love can heal even the deepest, darkest parts of them. I could feel the heartache and the love as if it was my own soul aching and being lifted up by love. Well written.

Surprisingly awesome!

I was really surprised I loved this as much as I did!!!! Kane hasn't been the nicest of characters thru the original SilverLake Shifters series, so kudos on turning him into a sexy male lead in this instalment. Raven turns out to be the last of the Kirin species, and there's a mega-awful evil bitch baddie in this one! ?

Loved it! and enjoying these other creatures that we've been introduced to along the way, kind of reminds me of the Teen Wolf TV series with their WereCoyotes etc...

I read this book as part of my Kindle Unlimited subscription (free book but I have to pay £7.99 a month for the subscription) but trust me I've done plenty of bad reviews for free books as well!

Jennifer Holzapfel says

Kane has been trying to make up for his past of murder and mayhem, after being mind screwed by Selina. He is now an enforcer for the Silverlake wolfpack and is trying to prevent a casino robbery. Every night he goes into the lounge to hear a singer named Raven, who sings a song his long lost Raven used to sing to him to help wolf go to sleep. Kane's street name was Hunter and he watched out for Rachelle, aka Raven. He nearly has a heart attack when he finds out the singer is really his Rachelle Raven. She is undercover also trying to prevent the casino from being robbed. She is the only one who can calm wolf, and Kane has been insane fighting with himself for years after losing her to Selina. They need to help each other to stop not only Selina, who has gained even more mind control powers, and Kane needs Rachelle to tame wolf and heal his heart. Will they get a happily ever shifter after, or will Selina kill Rachelle for her powers and bind herself to Kane forever.

There was 1 scene that cracked me up but for the majority the book bored me. I've read a lot of shifter books so maybe that's why I'm so disappointed.

First, reading the alpha books might have helped me understand this book a bit more since the beginning left me confused and wondering wtf was happening.

The over use of the word "boner" was juvenile.

The fact that the ENFORCER shifter can't smell that Raven is human or not is ridiculous.

Claire says

Again the same warming feel of a plot but this one - we finally find out what has been holding kane back from fully integrating with the pack.

it felt like he was the type of character that would never be matched to a mate so it makes sense that it's someone for. his past - someone who knows him, and what he went through. and someone who can bring out the lighter side of him too.

It's not a heavy series- so don't go into this thinking bdb or something like that. it's perfect for holiday reads, reads where you don't want to think too hard etc which is right where I'm at so they're perfect right now!

Karen J Baker says

Kane can't believe what he is seeing or hearing. Could it really be Raven? His childhood friend that he has feared to be dead these many years. Raven can't believe that she has found Hunter (aka Kane). She has to keep that a secret or else others will try to get to Kane in order to make him their lab rat. A very good read that proves that you don't have to be related by blood to be family.

Linda Johnston says

Kane Colton is enforcer of the Silver lake pack for 10 years and isn't happy. Selina Douglass captured him and made him her slave and nobody knew who he was because he is only left her. Raven knew it was him but wouldn't tell anyone. He had thought he lost Raven because of Salina brainwashing him. He has 3 things that he can do: protecting his packages watching his blood brothers back and trying to keep blood list under control. Raven went to work undercover as a singer for the agency. She is trying to find Salina and keep her from stealing anymore money from all places. He is there every night to hear her sing. When she starts

singing that one song he leaves. They were together when it is robbed and he discovers she is working for the agency doesn't tell anyone that he is Hunter the one man that everyone knows about but not the name that left Selina. He finally realized that Raven is his mate and tries to protect her and she gets kidnapped and he has to rescue her

Reviewed at Shifter Haven

Throughout the Silverlake Shifter series Kane has been pretty much... well, let's be frank – a total jerk, for the most part. I believe every reader who got caught up in that series knew that there was a reason for Kane to be the way he has been. And in this new series we're discovering the stories behind the enforcers of the pack, the men who keep to themselves and don't share much of their pasts. In Kane's story we will discover exactly what made him into the man – wolf – he's become... and it is heartbreakingly tragic and will evoke such anger on his behalf. No one should have gone through what he did to simply survive.

I'm finding that I don't want to give too much of this fantastic story away by going into the plot at all. What I can safely say is if you've followed the previous connecting series then you know what Kane is like and within this story you'll discover a very different Kane – a prideful man, a man in agony, a man at war with his wolf and himself. The woman who was so special to him in their younger days has returned and along with her come memories, danger and his true mate. Something he's never believed in. The Enforcers: Kane is action packed,, has some sizzling sexy times, a mystery, traitors and an ultimate evil that you will loathe. Raven is a pretty spectacular character and wait until her animal is revealed. All I can say is simply... wow, never saw that coming.

It was satisfying to finally understand Kane, and his story will touch you in ways you'll not expect. I enjoyed this beginning to the spin-off series and I believe you will as well. Although, for this one I really believe you need to read them in order as each story builds a bit on the previous... that means starting with Silverlake Shifters. As always, in my opinion. I would highly recommend this story and this series to any reader who loves paranormal Romance or Shifter Romance. This one is pretty amazing.
