## **Impact (Fuzed Trilogy #1) David E. Stevens**

He was dead, but now he is alive and has no identity

Commander Josh Logan is a Navy pilot on a routine flight when his F-18 fighter catches on fire. Preventing the burning jet from hitting a neighborhood, he ejects too late. Paralyzed and hemorrhaging, he lies on the ground looking at the stars as his heart beats its last beat.

One year later, he's found naked and unconscious on the side of a road. He wakes up in a city hospital looking like a multiracial Olympic athlete. His memory is intact, but he realizes his body wasn't repaired, it was replaced; He appears to be a genetic blend of the best genes from every race. With no identity, his beautiful and intelligent ICU nurse, Elizabeth, invites him to stay with her until he can build a new identity as Josh Fuze.

### **Is he losing his sanity or is he the key to humanity's survival?**

He's contacted by a voice he believes represents a secret government agency responsible for his return. He's told a comet will strike Earth in two years, erasing almost all life, and he is the key to humanity's survival. A Navy pilot brought back from the dead to save the world? He realizes that the most likely explanation is insanity... but until proven insane, he decides to take action.

### **Struggling to save humanity and hunted by the CIA. Will he make it?**

Using his insider knowledge of the Military Industrial Complex, he creates a fake classified program and recruits a brilliant international team. Together, they secretly develop the world's most powerful weapon to protect humanity. While installing it on an Antarctic mountain, their operation is uncovered by the CIA. Labeled an international terrorist, Josh is targeted for assassination. With cruise missiles inbound, he fires the device to learn if it can deflect a comet fragment that will destroy London or if he's simply a puppet in a much bigger game.

A winner of the 2016 Eric Hoffer Award for best eBook, the Epic eBook Award for best Action Adventure and ForeWord Reviews Book of the Year, **IMPACT** is a thought-provoking action thriller.

## **Sharon says**

### **Wow**

What a page turner. I just had to know what was going to happen next. The characters were likeable, even when they were not cooperating.

As serious as this story is there was humor too. I really enjoyed the book.

---

## **Gopal Sadagopal says**

Good time pass. Excellent research and description and dialog of various disciplines from science to philosophy. The writing is very good - fast moving. But the author suffers from the typical American author infectious disease of making their hero absolutely super human. He looks like the greek god just like you expect from a Harlequin romance novel but of course can give a discourse on philosophy even as the jet he is flying is running out of fuel over Antartica!

---

## **David Huelsmann says**

The concept is very interesting and the delivery on that concept is also very interesting. Is the hero of the story now supernatural? Are there other beings keeping an eye on our survival? How to you explain the essential kidnapping of our entire military, CIA, Engineering, etc bureaucracies by one man in secrecy to save the world?

---

## **Bette Hillner says**

### **Great reading**

This book was well presented with a whole lot of twists and turns. The suspense is awesome and compelling. Really worth your time to read.

---

## **Lesa Brown says**

### **Loved it**

I can't wait for the next!! Quit and adventure, fast moving, issues that make you think. I don't get caught up on that's not realistic...really..reading is for entertainment. PLEASE KEEP THEM COMING!!

---

## **Howard Carter says**

### **Very enjoyable read**

This book is a fairly easy read, and while the concept (earth getting hit by an asteroid) isn't new, the approach to resolving it is quite original and the science is sound. I'm looking forward to reading the next one.

---

## **Stanley Price says**

### **Excellent written book.**

Well thought subject, going along for the desired ending. Moved onto more interesting ideas for the next book. Look forward to the next book.

---

## **Ollie says**

### **Surprising**

A "4" because there are 2 more to come. On its own, with an ending "Impact" is a "5" ... Suspense .. Twists .. Characters .. Subtle yet direct message. Taking a book brake before breaking out "Imagine".

---

## **Glenda Dykstra says**

### **Scariest book I have read in a long time about real possibilities**

Very well written.the author has the talent and ability to research a difficult subject nd still make it believable. I still have questions but I am positive they will be answered in upcoming books.

---

## **Sherry Wilson says**

### **Edge of your seat exciting & frightening story**

I can't say too much about this book. I was sucked into the story before I'd read the first ten pages. It's so exciting, I couldn't stop and read through that night finishing about 6 am. Looking forward to the movie mentioned at the end of the book.

---

## **Dallas Gorham says**

### **Exciting take on a planetary danger**

David Stevens has a winner here. Fast, believable action. Great protagonist. Excellent plot. I'm a fan. Can hardly wait for the movie.

---

## **Aj Rorie says**

Wow. This book was a real page turner. I couldn't stop reading. It definitely was not the story I thought it was going to be in the beginning. This definitely a must read if you like military thrillers.

---

## **Debra McLean says**

### **Interesting**

I don't know how to review this. Premise realistic and well thought out. Sci Fi ish, mystery, surprises, secondary plots that evolve. No lost info, useless info, plot tracks and grows as it progresses. The book is more than just a fast read entertaining but not a classic. I think the author has talent and will be around a while

---

## **Ye says**

Fast read and some fun chapters. Though there are certain lines that I found flat and no use to the plot nor improve overall writing. They are frequent enough in the first half of the book to bother me enough from giving the book 4 stars.

---

## **Arthur says**

### **Impact (Fused trilogy #1)**

This book will test your belief in a Supreme being who is in total control of the universe we live in. That anything is possible, including a second life to insure preservation of the world and it's people's lives through means that is almost beyond our comprehension and our imagination. It all boils down to believing in something or someone greater than ourselves. I'm willing to let you make your own evaluation and decisions. Thanks for a great read.
