A hapenny should live a simple life, but two years ago Maewyn Bridgepost discovered her magick and saved her village from a troll invasion. Now as an official Protector of the Wedge, Maewyn shares in the responsibility of keeping it's residents safe.

When her mentor, the wizard Callum, leads a Great Expedition, Maewyn joins, knowing that to be the best protector she can be, she must be familiar with what the world holds beyond her tiny village.

When you are only 3 foot tall, the outside world can be a scary place, and the hapennies soon find themselves knee deep in troll trouble. Captured by a gang of trolls the group is taken to a broken-down castle to be servants to the troll queen, Huldfrejya. Unfortunately, Callum is cast into a deep slumber. It's up to Maewyn to rescue herself and her friends before they are entangled by a powerful magickal enchantment that will turn them into slaves to the troll queen forever!

Anne Martin says

a delicious book for readers of all ages, as soon as they master the tool of reading. In a world populated by humans, trolls, and happenies, plus mythical animals, some happenies go on a quest, for trading goods and finding medication. When captured by trolls and others controlled by a bad wizard, they must find a way out, with the help of a little magick. We are not in a Harry Potter like book, more like a hobbit one, where so many things are touched and may be changed by magical sorts. The imagination of the author is limitless, and you find a dragon with a griffon, as well as a unicorn. The happenies, heroes of the book are smart and cute, and of course, they win against evil at the end.

I was delighted while reading it, and for those worrying their kids would find dirty words or deeds, here none of them except a lot of dust, real dust they have to clean.

For all ages, the charm won't vanish if the readers get older.
